GOOD EEEVENING!

Step into the shadows of the deadliest dwelling on Earth. You've arrived at Castlevania, and you're here on business: To destroy forever the curse of Evil Count Dracula.

Unfortunately, everybody's home this evening. Bats, ghosts, dead heads, every kind of creature you can imagine. You'll find them all over the place. If they don't find you first.

And to survive you've got to sneak and creak through six monstrous floors before you meet up with the master of the house. Your mystic whip will help, and you'll probably find a weapon or two along the way.

But the fun will really begin when you make it to the tower, where you can count (get it?!) on a duel to the death with the death defying Count.

YOUR MAIN OBJECTIVE (BESIDES JUST SURVIVING!)

The object is to move through the passages and stairways of the castle to reach the tower, dodging or destroying every creature in your path until you find and destroy the Count. Use the controls, as directed, to activate your mystic whip, special weapons and magical items you'll find along the way. Be sure to capture hearts and crystals.

A hint from the Great Beyond: Be sure to watch for magic walls that lead to secret doors and passageways.

THE SECRETS OF THE PASSWORD INSTRUCTIONS

After the game has loaded, you will be asked to enter a password to start playing. Look up the four digit number in the password book (located in the center of the manual) by looking at the correct row number and column letter.

For example, if you are given Quest B5, then look across to column B and down to row 5 to find the correct password number.

Enter the password number and press **RETURN** to start your adventure.

A game screen will appear requesting you to select one of the following:

START A NEW GAME
CONTINUE A SAVED GAME

HOW TO BEGIN

Once you've entered the password and chosen CONTINUE or NEW GAME, press the Joystick Fire Button (Commodore & Amiga) or RETURN (IBM) to begin your jugular journey through Castlevania.

HOW TO SAVE YOUR NIGHTMARE FOR ANOTHER DAY

At any time during the game, you can use the SAVE GAME FEATURE by simultaneously pressing the CONTROL and the S keys. The screen will briefly flash "SAVING GAME" to confirm your command.

The SAVE GAME FEATURE allows you to save your game status as you progress from one level to the next. You can use the SAVE GAME FEATURE at any time and as often as you wish, but only one game status is saved. Each time you save a game, the current game status replaces the last saved game.

The next time you re-boot the game, you can select CONTINUE A SAVED GAME on the introduction screen and return to the beginning of the stage in the Castle where you finished your last nightmare.

STARTING A SAVED GAME

When you first load the game, you will be asked whether you wish to: START A NEW GAME or CONTINUE A SAVED GAME.

If you select CONTINUE A SAVED GAME, you will resume playing the game from the point where you last used the game save option.

If you select START A NEW GAME, you will play the game from the beginning of the adventure.

ENDING YOUR QUEST

When you are ready to exit Drac's terror resort, simultaneously press the CONTROL and Q keys. You will then be asked whether you wish to: START OVER or END.

If you select START OVER, you will restart the game at the beginning of the first level. You will not need to re-enter the password or reset any game configurations.

If you select END, you will have a last chance to save your game status before quitting.

If you select YES, to the SAVE GAME question, your current status will be saved for future use.

If you select NO, to the SAVE GAME question, your current status will not be saved and the adventure will come to a "dead" end.
