Hi. I made this list of all the countries in Neo Geo Cup 98 because I was curious about which teams were good and which teams had certain combinations of skills. The clock counts down so fast that you hardly have any time to decide which team you want to be but here is a way you can decide at your leisure. I got all this information directly from the game itself, so I'm not really sure if I have any rights to this information, but please don't steal it without giving me credit. It took me a long time to get all this info off of the game and it also took a while to type it all in.

Also, note that if you don't like the stats of your favorite team, you can play super sidekicks 3 which is almost identical (except a little harder), and get different stats probably.

Each team has 0, 1, 2, or 3 strengths. It stands to reason that the best team will probably have 3 strengths, unless you like an unusual combination like attack & defense. So, here are the nine teams that have three strengths (sorted for visual effect):

Croatia	Spd, Pwr, - - Att	3-5-2
Nigeria	Spd, Pwr, - - Att	4-4-2
Italy	Spd, - Tech, Def -	3-5-2
France	Spd, - Tech, Def -	4-5-1
Holland	Spd, - Tech, - Att	4-4-2
Brazil	Spd, - Tech, - Att	4-4-2
Argentina	Spd, - Tech, - Att	3-5-2
England	- Pwr, Tech, Def -	3-5-2
Germany	- Pwr, Tech, Def -	3-5-2
Spain	- Pwr, Tech, Def -	3-5-2
Denmark	- Pwr, Tech, - Att	4-4-2
Colombia	- Pwr, Tech, - Att	4-4-2
Mexico	- Pwr, Tech, - Att	4-4-2
Romania	- - Tech, Def, Att	4-4-2
Portugal	- - Tech, Def, Att	4-5-1
Yugoslavia	- - Tech, Def, Att	4-5-1

Spd = Speed (how fast your players can run)
Pwr = Power (how hard your shots on goal are)
Tech = Technique (whether you can do dribbling tricks)
Def = Defense (how good your team is on defense)
Att = Attack (how good your team is on attack)

Below is a list of all the teams. Note that for each skill there are only two possibilities: strong or weak. So, for speed either you have it or you don't. Visually in the game there are pentagons and each point of the pentagon either extends to the edge or is towards the middle. There are only 2 positions the point can be in.
