MANHUNTER™

HINT BOOK

Introduction

Greetings *Manhunter*. Are those Orbs getting you down? Are you lost in New York with no place to go? Cheer up! With this handy little book you'll be covering new ground in no time - but first, some background.

As you make your way through *Manhunter: New York*, you will learn what the evil orbs are up to, discover secrets of the underground human movement and find yourself on the trail of a deadly killer. To make progress in *Manhunter*, you will do, use, or find things at various locations. Sometimes the solution is obvious - you would naturally use a crowbar to open a stuck window. Other solutions have clues in other parts of the city. Keep your eyes open. Search each location by moving your marker over every object that you see. If you get stumped, travel to the other locations in the city. The clue you need may be across town.

There is no score in *Manhunter*. If you make it to the end of the game, you've won. This hint book will get you through to the end. If you have a problem that isn't covered here, feel free to contact Sierra's 24-Hour hint line at (209) 683-6858.

How to use a hint book

If you reach a point where you can't go any further, look through this book and find the day that you are in and your location. Use your Adventure Window card by placing the red window over the patterned area to read your desired answer. Hints progress from mildly helpful to a direct answer. It's best to read them individually, and in sequence. Be sure to read only those hints you really need.

How not to use this hint book

The Orbs will not like it if you just scan through the book reading all the answers! You will lose a lot of enjoyment (and sleepless nights) in discovering the game. Read only those hints which are absolutely necessary, and as few of those as you can.

If you have finished *Manhunter*

After you have "won" the game, we invite you to check out the back of this book. It contains more interesting information. But be very cautious using this section! Don't even look at it until you have actually seen the end of *Manhunter*.

Thank you for purchasing *Manhunter* and this book. If you like this kind of game, let us know. Remember, the Orbs are watching you!

Figure 10.10 shows the relationship between the number of people in the household and the number of people in the household who are employed. The relationship is positive, indicating that as the number of people in the household increases, the number of people in the household who are employed also tends to increase.

The former version dealt with issues of the importance of an already issued Patent in a Patent Appeal.

You need to tap the shoulder of the target you have been following. Be careful though, the rest of the audience came for the music and won't appreciate it if you bother them!

Which one is the target you are tracking? Think about it for a minute and if you can't figure it out, I'll tell you.

The members of the audience at the Wretched Excess are wearing their designer robes. The target you are looking for just ran in here off the streets to hide after breaking into Grand Central Terminal. If you still can't figure it out, look at the next answer and we will spell it out for you!

The target is wearing the brown robe. Get ready to grab the keycard that she drops!

You should have 13 keycards now. If you only have 12, go back inside and get the last one.

If you have 13 keycards, open MAD. Select Tracker. Tag the second target by positioning your marker over the middle target and press ◀ENTER▶.

Vend-o-Deli

What do I do at the deli?

The mayor and I look at the different brands. Which one do I like best?

Now we have to exchange ideas so we can take things with us. We can't wait here. There's no Central Park.

Central Park

I keep dying at the park, what gives?

There's something you have to do to get through the park.

Look at the map. You can find your path on the map of Central Park that was included with the game. Put an oval next to each stop on it. Close the map and you can find your way through the park.

If you still don't find your way through the park, we have a solution. We can use a map to locate the correct path. We can also take the elevator when you find it.

Go inside and look at the bulletin boards. Which note did your target leave?

You don't have enough clues yet to determine which note he left, but you will soon. Travel to Central Park.

There is only one safe path through the park.

Look at the tracker and outline their path on the map of Central Park that was enclosed with the game. Put an X at every spot that they stop at. Close the computer and use your map to find your way through the park.

If you still can't find your way through the park, use your Adventure Window card to locate the correct path. Be sure to take the crowbar when you find it.

What is tried to write on the desk is the last name of the murderer?

What do you think is his first name?

The answer is on the desk card. Select Dean Carl from inventory.

And stamped? I would say that the murderer is female.

That is wrong.

Yes that is the murderer's first name and his last name is Carl something.

We were told another clue to the murderer's last name right after you left at this sign in Security. Pick it. Go back and look again.

Don't get your arms crossed. The last sign of the murderer is Carl. It says Carl. Open 25699 select first and type in Carl. Press. Then press back to the desk.

Vend-o-Deli

I traveled back to the deli but now what?

Look at the children's card that the suspect went to. It says look at the picture to display the crime.

It was the picture that was on the back wall. The front and find the name that is. Uncover him.

It is the only name that is related to a murder during WWII in the museum.

The similarity in the park is Harriet O'Brien. From M.A.D. select the O'Brien in the list. Select O'Brien and type in Anna. Choose. Anna O'Brien is Harvey's wife and the name was picked on day 1.

I'm still a little confused. Who are Anna and Harvey?

She is the one that got the word to be brought to see what was going on around. Then she told something at Dean O'Brien. She went to the children's card to copy the name. At the desk, there is a picture of a park. She took the name from the sign on the sign and dropped the information on the desk before going to her home. The next night, Anna, her husband Harvey and someone else broke into Dean Carl's house and murdered him. Then they hid out and Anna went to the Museum to work. That is when the name was typed out. Then she returned home the next day.

I found another corpse, what should I do now?

Position the marker over his head and press ◀ENTER▶.

Position the marker over his forehead.

Back up.

Position the marker over the staff on the ground next to the body and press ◀ENTER▶.

Back up.

Notice the word the corpse tried to write on the rock.

What he tried to write on the rock is the last name of his murderer!

What do you think is his first name?

The answer is on the data card. Select Data Card from Inventory.

Still stumped? I would say that the murderer is trouble.

Phil is trouble.

So Phil is the murderer's first name and his last name is Cook something.

We give you another clue to the murderer's last name right after you look at the sign at Strawberry Fields. Go back and look again.

Don't get your goose "cooked"... The last name of the murderer is Cook...k! Phil Cook! Open MAD, select Info and type in Phil Cook. Then travel back to the Deli.

Go to the bulletin board that the suspect went to. If you forgot, use the tracker to replay that scene.

It was the bulletin board nearest the back wall. Go there and find the note that H. Osborne left.

It is the only note that is signed by a name starting with an H. (Harvey).

The dead man in the park is Harvey Osborne! Open MAD, select Info and type in Harvey Osborne. Select Repeat and type in Anna Osborne. Anna Osborne is Harvey's wife and the target you tracked on day 1.

She is the one that set the bomb at the hospital to see what was going on inside. Then she hid something at Trinity Church. She went to the Flatbush bar to copy the maze. At the ladies room at Prospect Park, she used the three-flush code to get to the sewers and dropped the medallion on the dock before leaving in her boat. The next night, Anna, her husband Harvey and someone else broke into Grand Central to steal a maintenance robot. Then they split up and Anna went to the Wretched Excess to hide. That is when she knocked you out. Then she returned home (W. 82nd).

Meanwhile, Harvey went to Vend-o-Deli to put a note on the bulletin board. Here he met up with Phil who he thought was a friend. Phil lured him into Central Park, where he murdered him. And you still haven't found the stolen robot!

Open MAD and select Tracker. At Grand Central, tag the third target.

When the third target gets to the American Museum of Natural History, trace his path on the diagram of the museum that is on the map that was enclosed with the game. Travel to Harvey and Anna's apartment on W. 82nd.

Yes! Go inside and position the marker over the sack on the floor. Take the key and then back up.

Press the button on the back wall by the door.

Position the marker over the body and press ◀ENTER▶. It looks like Phil got here before you!

Travel to the museum.

Position the marker over the right side of the building. When it becomes an arrow pointing to the right, press **◀ENTER▶**.

Usually you use a key to open a lock.

Select the key from Inventory (the one you got at the Osborne's apartment). Position the marker over the open door and press **◀ENTER▶** to enter.

Follow the path that the target in the Tracker took. You should have drawn it on the diagram of the museum that is on the map that was enclosed with the game.

Or you can follow the arrows.

THE END

The power is on now, what next?

This would be a good place to save a game.

Several buttons are active now. Try pressing some of them.

I've tried more buttons than I can count, what is the right thing to do?

You need to close the hatch first thing. Press the hatch button. It is the middle one at the bottom.

You need to open the exit door on the right wall before you take off. If you have taken off without opening the exit door first, land the ship on the pad that it took off from. Then you will have the opportunity to open the exit door.

I saw Phil take off in his ship and I wish there were a way to hijack his ship. What do I do now?

Make sure that the four bombs are armed. They are just right of the view screen. If they are not lit up, press the switch at the base of the four lights.

If the viewscreen is not on, press the button below it.

When the view screen is on, position the marker over the screen and press **◀ENTER▶** for a closeup.

What should I do now? There are four orb strongholds.

I'm ready to go, but I don't know what to do.

You have four bombs and there are four targets for you to bomb.

The four targets are the four orb strongholds that you learned about when you used Phil's computer.

Your four targets are:

1. Alpha: Bellevue Hospital. The orbs are using the hospital to experiment on using humans as a food source and most of the orbs are concentrated here.
2. Beta: Grand Central Terminal. The orb fleet of spaceships are stored here, including the mother ship. (Remember Harvey's note in the deli, "We saw the mother...")
3. Gamma: Statue of Liberty. This is where the orbs make the red gas that they pollute the atmosphere with. (Remember the data card message, "Destroy the Lady...")
4. Delta: the Empire State Building. The Orb Alliance's Main Computer is located here.

If you don't know where the Statue of Liberty, the Empire State Building, Grand Central Station or Bellevue Hospital is, you can find them on the map that was enclosed with the game.

After you bomb the four sites, you have smashed the orb presence in the city and made it safe once again for humankind!

WALK THROUGH

Don't read the following area unless you have finished and want to learn the most efficient way to complete the game or unless you've given up because you think the game is too hard and just want to be led through it. It is more fun to use the hint section first but this way is faster.

Note: Usually the spacebar will work in place of ◀ENTER▶.

Watch the title page sequence. (It will repeat when done.)

Press ◀ENTER▶ to begin the game.

Day 1

Don't read the following area unless you have finished and want to learn the most efficient way to complete the game or unless you've given up because you think the game is too hard and just want to be led through it. It is more fun to learn the hard way but the fun way is faster.

You start at the same place you did when playing the game. Everywhere there was a magic square in the game, there is a keycard in the tunnels. Move around, collecting all 12 keycards as you work your way to the end of the maze.

You will see a close-up of the view screen map with your ship represented by a top down view of it. You can now bomb things.

You have four bombs.

There are four orb strongholds that you need to bomb. These are the four sites that were in Phil's computer:

1. **Alpha:** Bellevue Hospital. The orbs are using the hospital to experiment on using humans as a food source and most of the orbs are concentrated here.

2. **Beta:** Grand Central Terminal. The orb fleet of spaceships are stored here, including the mother ship. (Remember Harvey's note in the deli, "We saw the mother...")

3. **Gamma:** Statue of Liberty. This is where the orbs make the red gas that they pollute the atmosphere with. (Remember the data card message, "Destroy the Lady...")

4. **Delta:** The Empire State building. The Orb Alliance's Main Computer is located here.

Avoid Phil's ship while you bomb the four sites.

After you hit the fourth one, you are done, watch the ending.

One more thing you can try is to destroy your game in Phil's office. Select Gamma Security and change from Ground Patrol to Air Defense. Now try to bomb the Statue of Liberty.
