Playing Tips

When learning a new round, be sure to punch everything that comes your way. You never know when a very valuable hidden power-up will appear!

The hidden power-ups are always in the same positions. Learn their locations and use them to your advantage during each game.

Take it easy! Don't try to rush through each round or you will find yourself facing more opponents. Use the kick and punch frequently to slow down the enemy's progress. Using the auto-fire function (turbo switches up) will help you do this.

Up - B
to continue

There are several techniques that can be used to fight the boss characters at the end of each level. Master their patterns to discover when to attack.

On the Bonus Round, you **MUST** time the power meter correctly, so that it hits to the highest mark if you are to receive the 20,000 point bonus.
