SUPER BEE

SUPER FRELON

Instructions for use

The encircled figures in the text refer to the illustrations you will find on the fold-out flap of the rear cover of this booklet.

When using a Videopac game computer with built-in black and white monitor, you should set the contrast control at position 5/6.

SUPER BEE

(1 or more players)

First press  (RESET)

Next press 

1 Super Bee has entered the magic garden. It's still empty, but soon there will be an abundance of delicious fruit. They keep popping up, left, right and everywhere. Every time Super Bee eats one, a new fruit appears. It almost looks like a true paradise for Super Bee.

It's dangerous however, and his life is in **your** hands! First of all you have to see to it that he does not bump into the fences surrounding the magic garden. You can steer him with the joystick of the right hand control

Super Bee will only fly in a horizontal or vertical direction. If you release the joystick or when you move the joystick diagonally, he will keep flying in the same direction he was before. Until he crashes! You have quite a responsibility!

Eating fruit and scoring points

The object of the game is to have Super Bee eat as much fruit as he possibly can without crashing. Every time he eats a fruit you score points. How many depends entirely on the fruit:

	(yellow)	A lemon. 5 points
	(red)	An apple. 10 points
	(green)	A pear. 15 points

	(grey)	A plum. 20 points
	(red)	A strawberry. 25 points

To make him eat the fruit, you should make him pass over it in such a way that his eye passes right over the centre of the fruit!

2 The computer will keep a running record of your score during the game.

Extra handicaps

3 Every time Super Bee eats one of the fruits, it is immediately replaced by a magic barrier! You have to be very careful, because when Super Bee bumps into one of the barriers or fences, he crashes. He, quite obviously, needs your guidance. If you let him go by himself, he will crash almost immediately!

There's another handicap: as the game progresses, Super Bee, in his enthusiasm, will start to fly faster, making it more difficult to control his movements. The first acceleration takes place after about 45 seconds.

Bonus rounds

If Super Bee manages to eat enough fruit to gather 105 points, he has survived his first round. The next round will be a little tougher still, because now he has to score 120 points for the next bonus round and fifteen more for every bonus round after that (135, 150, 165 etc.). The bonus round, like the very first round, starts automatically.

Bonus points

When reaching his bonus target (105 points for the first round etc.), a big and ugly spider appears in the left-hand top corner of the screen, asleep while supposed to guard the magic, golden fruit! If Super Bee manages to reach the golden fruit without bumping into the spider, you earn 50 bonus points

End of a game

- Each game can end in three different ways:
- Super Bee crashes into one of the surrounding fences.
- Super Bee crashes into one of the barriers appearing after eating a fruit.
- Super Bee crashes into the sleeping spider when trying to reach the golden fruit.

In every case the great bad spider will appear, descend upon him and carry Super Bee off!

The next game

The next game will start almost immediately. When playing in competition with others, quickly hand over the hand control to an opponent.

Competition play

Playing in competition with others, the computer automatically registers the highest score of the series. That score will remain there until another player has reached a higher score.

When you type in the name of the highest scoring player you avoid quarrels afterwards. That name (maximum six characters) will remain there until the high score has been surpassed.

10 different skill levels

The game can be played at 10 different levels of skill, depending on the starting maze.

1 Open garden without obstacles.

0 Playing in this mode you will go through all the above successive mazes, one for each new round.
