

BOMBFUSION

A terrorist group has planted bombs throughout the Sellerscale Nuclear Processing Plant and you, as ex super hero (ex after the 'Boris affair') have to go in and save the plant and possibly the Northern Hemisphere from destruction.

The Plant's computer control system has malfunctioned causing even more problems.

This computer system controls the movement of used fuel capsules from the ejection port to the packing case for storage and re-processing. Each capsule has an onboard computer that will lock on to you whenever you are on range enabling you to manually guide it into the packing case.

All this, coupled with the fact that you also have the bombs to defuse should tax your super hero powers to the limit

So pull up in your customised C5 (with fuel injection and go faster stripes) and Go For It!!

HINTS:

Although you have super powers, there may be platforms and bombs that you cannot reach. To help you there are pressure pads which, as soon as you jump on them, will propel you higher than a normal jump would do.

You should always watch out for live bombs as you can only survive about 3 explosions, providing that you haven't come into contact with The Balloid.

Your Radiation level is reduced to normal at the start of each level.

Some bombs on the bottom row can be defused by careful jumping at the top.

Look out for safe spots where the Balliod cannot reach you.

CONTROLS:

Z	Left
X	Right
Return	Jump

Or use Joystick

F10	Music On/Off
Help	Pause
Delete	Continue after Pause

LOADING INSTRUCTIONS:

Insert the 'Bombfusion' disk at the Workbench (tm) prompt. The game will then autoload.

FRENCH

Bombfusion

Un commando de terroristes vient de placer une bombe dans une usine de traitement du combustible nucléaire. Désamorcez les bombes et manœuvrez les capsules pour les mettre dans la boîte. Evitez la grosse boule pour ne pas augmenter la radioactivité. Sauvez l'usine—et peut-être tout l'hémisphère nord—de la destruction.

Instructions de chargement

Introduisez le disque 'Bombfusion' dans l'unité de disques à réception du message 'Workbench'. Le jeu se chargera automatiquement.

GERMAN

Bombfusion

Eine Terroristengruppe hat in einer nuklearen Aufbereitungsanlage Bomben gelegt. Entschärfen Sie die Bomben, und manövrieren Sie die Kapseln in den Behälter. Die große Kugel ist zu meiden, da sie die Radioaktivität erhöht. Bewahren Sie die Anlage—und vielleicht die gesamte nördliche Erdhalbkugel—vor der Zerstörung.

Ladeanweisungen:

'Bombfusion' Diskette auf die Meldung 'Workbench' einführen. Darauf lädt das Spiel automatisch.

ITALIAN

Bombfusion

Un gruppo di terroristi ha minato un impianto di trattamento di combustibile nucleare. Disinnescare le bombe e porta le capsule nella casella. Evita la grossa sfera perché questa fa aumentare la radioattività. Salva l'impianto e forse anche tutto l'emisfero settentrionale dalla distruzione.

Istruzioni di caricamento:

Inserire il disco di 'Bomba confusionaria' all'apparire del segnale 'Workbench'. Il gioco si autocarica.
