Hit the Dice Block to see how many spaces you'll move.

The space you land on may trigger an event.
(Repeated for each player.)

Play a Mini-Game.

If bonuses are turned on, three bonus prizes will be awarded after the set number of turns have been played.

See the results!

Rules Explanation

Before setting the rules in Party Mode, you can view an explanation of the rules on a special tutorial board. We recommend checking this out at least once.

RULE SETTINGS

There will always be four players on the board. If you don't have four humans playing, then the game will substitute computer players (COM).

Press the A Button for the next screen

Press the B Button for the previous screen

Choose a Character

Use the cursor to select the character you would like to play. You can also choose the computer-controlled characters.

Choose the difficulty of computer-controlled characters by tilting the Control Stick to the left or right. There are three settings to choose from: Easy, Normal, and Hard.

A

B

Rules

There are two ways to play Party Mode:

BATTLE ROYAL

Four players compete against each other.

TEAM MATCH

Two teams of two players each compete against each other.

- Teams compete to get the most coins and Stars.
- There will be no 1 vs. 3 Mini-Games.
- 2 vs. 2 Mini-Games will always be divided by the teams you set.

Tilt the Control Stick to the left or right to choose Battle Royal or Team Match.

Number of Turns

Set the number of turns you want the game to last. You can set it to between 10 and 50 turns, in multiples of 5.

Mini-Games

Set the Mini-Games which can appear during the game. Choose one of the following three options:

- All – All Mini-Games will appear.
- Easy – Only easy games will appear.
- Custom – Only the Mini-Games you choose will appear. See pg. 44 for more details.

A

B

Bonus Settings

If you choose "Bonuses On," then the Board Map will contain Hidden Blocks that award you coins, or Stars when you find them. Also, at the end of the game, three bonus prizes of one Star each will be awarded to players based on their performance. See pg. 34 for more details. If you choose "Bonuses Off," then no bonus awards will be handed out, and the winner will be decided based only on the number of coins and Stars found during the game.

Handicap

Set a handicap for a player by changing the number of Stars next to his or her character. Tilt the Control Stick to the left or right to choose a character, then tilt the Control Stick up or down to set the number of Stars.

Once you have finished all settings, you will see the message "Are these settings OK?" Choose "Yes" to start the game or "No" to change the settings.

Determining the Turn Order

Hit the Dice Block at the start of the game to determine the turn order. The character with the highest number goes first.

Put on your party best, 'cause you're all set to go!

This page explains board spaces and Board Map layout. (You cannot choose games from this screen.)

Dice Block

Characters hit the Dice Block and move forward the number of spaces shown. The block is normally numbered from 1 to 10.

Board Events

Passing through spaces marked with an arrow triggers different events. See pg. 24 for more details.

Stars

When you land on a space with a Star, you can pay 20 coins to take the Star.
❖ Spaces with Board Events and Stars are not like other spaces. Your character will stop there momentarily for the event and continue moving afterward.

Junctions

When you reach a junction, use your Control Stick to choose the direction you want to move.

Spaces

When you finish moving, an event takes place. What exactly happens depends on the type of space on which you landed. See pg. 26 for more details.

GAME SCREEN

The background reflects the color of the space you are on.

Computer-controlled character

ON THE BOARD MAP

Before you hit the Dice Block, you can perform various functions by pressing the following buttons:

B Button Use an item you're carrying.

Z Button View the Board Map to look ahead and see where you might land.

R Button View the entire Board Map.

MINI-MEGA SYSTEM

The Mushroom items make your character bigger or smaller for a short period of time. Both options have good and bad points, so learn when to use each!

GET MEGA!

Your character becomes larger when you use a Mega Mushroom or a Super Mega Mushroom on the Board Map.

• Pros of being Mega

- Hit two dice blocks in a row (three with the Super Mega Mushroom!). If you roll doubles, you'll be rewarded 10 Coins!
- You'll take 10 coins from every player you step on.

• Cons of being Mega

- You'll skip over all Event Spaces and Star Spaces.

GET MINI!

Your character shrinks when you use a Mini Mushroom or a Super Mini Mushroom on the Board Map.

• Pros of being Mini

- You'll pass through small openings, like pipes.
- You can play the Mini Mini-Games.

• Cons of being Mini

- Your Dice Block will only roll numbers from 1 to 5. (When you use the Super Mini Mushroom, you'll have two Dice Blocks, rolling 1 to 5 each.)

❖ Your character automatically returns to normal size when you've finished moving for the turn.

BOARD EVENTS

Whenever you pass a space with an arrow mark, you will start a Board Event.

ITEM SHOP

You can buy items here and use them to gain an advantage. If you don't have any coins or already have three items, you won't be able to buy anything.

LOTTERY SHOP

You can pay 5 coins to play a lottery game here. Each game has first, second, and third prizes, ranging from coins to mushrooms to other items. Or you may win nothing at all! It's all based on the luck of the draw!

☐☐☐ Lucky Party Ticket ☐☐☐

The first time you enter the Lottery Shop, you'll receive a free Lucky Party Ticket.

During the Last Five Turns Event, a lottery drawing takes place. The winner of the drawing receives a Star! Players can only receive one ticket each.

BOO HOUSE

You can hire Boos to steal coins or even a Star from your opponents! Pay 5 coins to have a Boo steal coins for you or 50 coins to have one steal a Star. If Boos are after you, press the A Button repeatedly to foil their attempt. If all goes well, you just might lower the number of coins they take from you.

GATES

In order to pass through a gate, you must use a Mini Mushroom to turn small before you start moving. You cannot pass through a gate unless you're Mini. On the other side of a gate, you might find spaces where you can play a Mini Mini-Game.

Mini Mini-Games

You can only play these one-person Mini-Games while your character is Mini. Here's an added chance for you to win items and coins!

SPACES

BLUE SPACES

These blue spaces give you three coins when you land on them. If you are playing with bonuses on, then they might also contain Hidden Blocks.

RED SPACES

If you land on these red spaces, you'll lose three coins!

HAPPENING SPACES

If you land on one of these green spaces, a Board Event will begin.

WARP SPACES

If you land on this space, a spinner with the other three characters' faces will appear. You'll then warp to the same space as the player chosen by the spinner.

MUSHROOM SPACES

If you land on this green space, then one small and one large box will appear. Use your cursor to select one, and you will receive either a Mega or a Mini Mushroom.

BATTLE SPACES

If you land on this green space, a Battle Mini-Game will begin. All players will then have to contribute the number of coins determined by a spinner. Players who do well in the Mini-Game can win these coins back when the game is over. The player that wins a very expensive Battle Game could suddenly become the one with the most coins!

BOWSER SPACES

If you land on this red space, Koopa Kid will appear to play a trick on you! Sometimes, it might trigger a Bowser Mini-Game, in which the losing player forfeits coins or items!

Bowser's Mini-Games include
Darts of Doom
Fruits of Doom
Balloon of Doom

FORTUNE SPACES

If you land on this space, you can play a round of Reversal of Fortune.

Reversal of Fortune

The player who lands on the Fortune Space plays Reversal of Fortune. A quick game of pinball determines who gets items, who loses items, and which items are lost!

Who knows, you may wind up receiving a Star... or giving one away!

ITEMS

You can carry up to three items for use during game play. To use an item, press the B Button before you hit the Dice Block at the beginning of your turn.

Mini Mushroom

This makes you smaller and allows you to pass through pipes. However, the Dice Block is limited to 1-5.

Mega Mushroom

This makes you bigger and allows you to hit two Dice Blocks. You will take 10 coins from any opponent you pass. However, you won't stop to get a Star or experience any Board Events.

Super Mini Mushroom

This makes you smaller and allows you to pass through gates, but you will be able to hit two Dice Blocks. (The Dice Block will still only show numbers from 1-5.)

Super Mega Mushroom

This makes you bigger and allows you to hit three Dice Blocks. You will take 10 coins from any opponent you pass. However, you won't stop to get a Star or experience a Board Event.

Mini-Mega Hammer

This makes a randomly chosen player bigger or smaller. You may not use this item on yourself.

Warp Pipe

Whoever uses this item switches places with another player. Spin the roulette to determine which player.

Swap Card

Whoever uses this items exchanges items with another player. Spin the roulette to determine which player.

Sparky Sticker

Place this sticker on the space on which you're standing, and any player who touches this space will lose 10 coins, as well as any Mushroom effects.

Gaddlight

This single-use item protects you from Boos who are out to steal your coins or Stars. The Gaddlight disappears after you use it.

Chomp Call

Use this item to change the location of the Star. Time it so that you use it when your opponents get close to a Star!

Bowser Suit

Put on this suit to intimidate your opponents! Roll the Dice Block once and take 30 coins from each player you pass!

Boo's Crystal Ball

Use this to call a Boo to steal coins or a Star from your opponent. You must pay 5 coins to have a Boo steal coins and 50 coins to steal a Star.

Genie Lamp

Use this item to call the Genie of the Lamp. The Genie will then take you to the Star's location, where you can exchange your coins for a Star.

Item Bag

This special bag contains several unknown items. If you buy this when you have no items, then it will contain three items. You cannot buy this if you already have three items.

PLAYING MINI-GAMES

A Mini-Game will begin at the end of each turn once all players have finished moving. The type of Mini-Game will change depending on the colors of the spaces where players have stopped. Before the Mini-Game begins, green spaces will randomly change to either Blue or Red Spaces.

4-Player Mini-Games (All players are on same-colored spaces.)

In these four-player free-for-alls, defeat your rivals or be the last player standing to win.

1 Vs. 3 Mini-Games (One player is standing on a different color)

In 1 vs. 3 Mini-Games, one player must prevail over all others to win.

2 Vs. 2 Mini-Games (Two players are on same-colored spaces.)

In these 2-on-2 Mini-Games, players must team up and work together to achieve victory.

Team Match Mini-Game Types

When playing Team Match, 1 Vs. 3 Mini-Games will not appear. Also, in 2 Vs. 2 Mini-Games, players will play according to their own teams, regardless of the colors of the spaces they land on.

Mini-Game Roulette

The Mini-Game Roulette will determine which Mini-Game will be played. Games that have not yet been played will be shown as "?????" on-screen.

Mini-Game Explanation Screen

The color of these tiles will change depending on the color of your team.

Mini-Game Instructions

Press the R Button to view the controls and read a piece of advice about the game. Press the Z Button to practice the Mini-Game, or just press START/PAUSE to play the game. You can change the settings in the pause menu so that the Mini-Games starts without ever displaying this screen. See pg. 38 for more details.

Mini-Game Results

RESULTS	
1st	0-40
2nd	0-38
3rd	0-30
4th	0-18

Coins are given out based on the results of the Mini-Game. The winning player or team always receives the most coins.

DECIDING THE PARTY STAR

The Last Five Turns Events can make for dramatic turnarounds! Before the last five turns begin, a drawing is held to see if there's a winner for the Lucky Party Ticket. (See pg. 24 for more details.) The current standings are announced, and the player in last place will be asked to spin a large wheel to determine a new rule for the last five turns.

New Rule Variations

- Blue/Red Spaces give or take twice the number of coins as usual.
- Stars are now free if you pass them on the board.
- All Red Spaces become Bowser Spaces.
- All Blue Spaces become Fortune Spaces.

With these new rules, there's always a chance for a comeback. Don't give up!

Final Results

When the last turn ends, the game is over. If you are playing with Bonuses on, then three Bonus Stars are awarded at the end of the game.

Mini-Game Star

The player who won the most coins in Mini-Games.

Coin Star

The player who collected the most coins.

Happening Star

The player who landed on the most Happening Spaces.

The ultimate Party Star is the player who has the most Stars and coins. If there is a tie, players have to hit the Dice Block to decide the winner.

BOARDS

Toad's Midway Madness

Difficulty ★

Toad built this board to look like an amusement park. The coffee cups on the Board Map move you in a different direction whenever you reach them.

Riding the Roller Coaster lets you cover a lot of ground quickly and get coins as you do so!

Goomba's Greedy Gala

Difficulty ★★

Goomba loves the high-rolling lifestyle, so he designed his board to resemble a casino. If you stop on a star mark, you get to choose which direction you want to move, and you win 20 coins as well!

The ball on the roulette wheel determines your direction on this board. If the ball lands on a star, you get to choose which direction you want to go, and you win 20 coins as well!

Shy Guy's Jungle Jam

Shy Guy's a little too meek to go adventuring, so he designed a board that looks like a wild jungle. Catch a ride on the raft to move to other areas on the Board Map. This board will surely bring out the adventurer in you!

You might have to make a wish to the Shy Guy Statue. Choose one of the two options and hope it's the right one! If not, there will be a great flood, and the bridge will be washed out.

Difficulty ★

Koopa's Seaside Soiree

Koopa always wanted a tropical resort, and now he's got one...in board form! Ride on the backs of dolphins as you relax in this sun-kissed paradise!

When you pass the Koopa mark near the top of the board, Koopa will ask you to invest 5 coins to help him build his magnificent resort hotel, the Koopa Kabana! If you land on the Happening Space in front of the hotel, you'll have to match the total amount that all the players have invested in the hotel, so be careful! Paradise isn't cheap!

Difficulty ★★

Boo's Haunted Bash

Boo knows a little scare every now and then is good for the heart, so he built a board that looks like a haunted house. Watch out for the Red Boo bridge—it flickers in and out of existence! You might not be going in the direction you thought you were...

When the Red Boos have disappeared, you can ride a Mystery Train made of coffins!
