If no previous MKD data can be found on the Memory Card, you will be prompted to create a new **PROFILE COLLECTION**. # SAVE

Mortal Kombat: Deception lets you save accumulated data to your Nintendo GameCube™ Memory Card. We highly recommend using a Memory Card to enjoy the many features you'll find in this game.

Data will be automatically loaded from your Memory Card each time you start your Nintendo GameCube™ system. This prevents you from having to go through the menus to adjust the settings to your liking each time you want to play the game.

Mortal Kombat: Deception includes a Player Profile and Krypt feature (see *KRYPT*, pg. 10, and *PROFILES*, pg. 12) that are best enjoyed using a Memory Card.

If you're using a Memory Card, the game's Autosave feature will automatically save accumulated data to your Player Profile for further use while using the Krypt option. Autosave will also save data during *ARCADE*, *VERSUS* and *KONQUEST* game modes.

Along with game features, your adjusted game options are automatically saved as well. Once saved, the options will automatically be loaded the next time you power up your Nintendo GameCube™ system as long as you have a Memory Card inserted that contains previously saved MKD data.

## IMPORTANT

When you make changes to the default settings for any of the areas within the "Options" menus, these changes will be automatically saved if you're using a Memory Card with a previously created Player Profile. When there are Memory Cards in both Memory Card Slots A and B, the "Options" settings for Slot A will always be used, even if it's set at the default settings.

Mortal Kombat: Deception requires 1 file and 58 blocks to save to the Memory Card.

## MAIN MENU

### KOMBAT

At the Main Menu, highlight the option you'd like to select, then press the **A Button**. As you highlight an option, a brief description of its contents is displayed on the right side of the screen.

### ARCADE

Select a fighter, and travel to many locations. Although the function of Arcade mode is for playing against CPU controlled opponents, a friend can still grab a second controller, and press **START** to join in. You'll go to the Fighter Selection Screen (see *FIGHTER SELECTION*, pg. 18). As you play Arcade Mode, you'll earn Koins along the way with each victory (note: be sure to load a profile first, see pg. 12 for details). Obviously, you'll want to win as many matches as possible to collect these Koins and purchase items in the Krypt (see *KRYPT*, pg. 10).

### VERSUS

Select this option to play against a friend (or enemy). You'll go right to the Fighter Selection Screen (see *FIGHTER SELECTION*, pg. 18).

Press the **Z Button** to view the Background Selection option. Press the +Control Pad Left or Right to cycle through available arena backgrounds. When you find the background you want to use, press the **A Button** to regain access to the Fighter Selection screen.

### PRACTICE

Even if you're a Mortal Kombat veteran, you may require some practice, so select this option, select a fighter and get some practice.

After selecting this option, you'll go to the Practice Mode Fighter Selection screen. Highlight the fighters you'd like to use for your practice, then press the **A Button**.

As you fight, you'll notice that there is no Timer, and the Practice Opponent's Health Bar will refill automatically when drained. You can battle as long as you like until you're comfortable. Controller buttons appear on-screen as you press them, so you can learn which button combinations produce certain moves. Practice is a useful game mode to get familiar with the fighters.

## MAIN MENU

### CHESS KOMBAT

Mortal Kombat: Deception includes this all-new MK game. Up to two players will LOAD or CREATE a team of five fighters: a GRUNT, SHIFTER, SORCERER, CHAMPION and LEADER. The object of the game is to fight your way through the team in an effort to confront and defeat the Leader.

Once you've created a team, you'll be prompted to Save the team to your profile. Select YES, if you'd like to have the option to load the team the next time you want to play Chess Kombat. You must have a Memory Card inserted to save a Chess Kombat team.

### SETTING THE TRAP

Before the match begins, you'll be prompted to set a trap on the square of your choice. Opposing players that occupy that square die immediately. To set a trap, highlight the desired square, press the **B Button** to select then press the **A Button**. Also, you can pretend to set a trap by pressing the **X Button**. A ping will sound to confuse your opponent. Remember, a Trap can only be set on your side of the board.

### THE BATTLES

Each player will take turns moving fighters. Highlight a fighter, then press the **A Button** to make a selection. At this point, arrows will show you which squares are available to move your fighter. Highlight the square you want to occupy, then press the **A Button** again to move the player.

Once two opposing players occupy the same square, they will battle in Kombat mode to decide who will win the square.

### SPELLS

Press the **L Button** to display the Spells Menu. A spell can be used only one time during the match, so use them wisely. When you select a Spell, on-screen instructions tell you how to go about using the spell.

*NOTE:* Spells are cast by the two Sorcerers. When they die, their list of spells are no longer available.

### GREEN CELLS

The Green Cells on the board provide a +100 Health to the player that occupies the square. All other characters owned by that player receive +25 Health. If an opponent occupies the green cell, you'll need to win the square and obtain the +100 Health for that character, as well as the +25 Damage increase to the rest of the characters on the opposing team.

## MAIN MENU

### PUZZLE KOMBAT

The objective is to keep the **BLOCKS** below the red **KAUTION BANNER**. The banner is located at the top of the puzzle. The user that has Puzzle Pieces above the Kaution Banner is the loser.

A Puzzle Piece consists of 2 objects, comprised of **BLOCKS**, **BREAKERS** and

**BOMBS**. **BLOCKS** and **BREAKERS** can be one of four colors. Colors vary, so keep an eye on the "Next" window to see the upcoming grouping of **BLOCKS**. **BLOCKS** are used as the building **BLOCKS** for this mode. **BLOCKS** are to be placed at the bottom of the screen and can be positioned however you like.

**BLOCKS** can be paired up with other **BLOCKS**, **BREAKERS** or **BOMBS**.

### BREAKERS

**BREAKERS** are used by dropping them on like colors to remove the **BLOCKS** from game play. When the **BLOCKS** are broken, any **BLOCKS** above will fall down where the previously broken **BLOCKS** once existed. Try staging non-matching colored **BREAKERS** on top of groups of like colored squares. If you happen to break apart the like-colored group of squares a **BREAKER** is resting upon, you'll want it to fall on top of squares of the same color, so they will then break apart. This is a Combo that will help boost your **SUPER METER** and increase the number of blocks dropped on your opponent.

**NOTE:** When you break apart squares, that same number of broken squares falls onto your opponents stack, so break apart as many as possible.

### BOMBS

**BOMBS** are used to clear all blocks of one color. This is done by dropping the **BOMB** on the desired color. When a **BOMB** touches a specific color, it will break all squares of that color. A **BOMB BONUS** is performed when a **BOMB** is not dropped on a block or **BREAKER** but on the bottom of the puzzle. The **BOMB Bonus** boosts your Super Meter.

### THE SUPER METER

As you break down squares, your Super Meter will gradually fill up. Once the meter is full, press the **B Button** to perform your fighter's **SPECIAL**. Each fighter has their own special attack. Remember, you must use your Special within 20 seconds.

**NOTE:** Special moves differ based on which character you choose. Characters with strong Special Moves will not fill up the Super Meter as fast as other characters, because their Special move has a greater effect.

## MAIN MENU

### KONQUEST

This is where you'll really learn how to play the game. Faced with hundreds of different challenges, you'll get instructions and learn how to perform all types of different moves and fighting styles. Along the way, you'll also earn Koins to make purchases in the Krypt (see below).

Once you've started your Konquest, read on-screen instructions to learn Mortal Kombat skills you'll need to complete your difficult journey (see **KONQUEST REALMS**, pg. 17, for more information).

Before you can begin in Konquest mode, you'll need to enter your saved player Kode created using the Player Profile option (see **PLAYER PROFILE**, pg. 12). Konquest mode can only be played if you're using a Memory Card (see **SAVE**, pg. 6).

### THE KRYPT

The Krypt is an enormous room filled with 400 coffins. Using the Koins you've earned, you can "purchase" coffins to open and reveal the hidden Kontent. Sometimes you'll discover big items like new characters or backgrounds to fight in, and other times you'll find something small or nothing.

Before you can enter the Krypt, you must enter your saved player Kode created using the Player Profile option (see **PROFILES**, pg. 12). The Krypt can only be accessed if you're using a Memory Card (see **SAVE**, pg. 6).

Once you've entered the Krypt, press the +Control Pad Up, Down, Left or Right to move from coffin to coffin. Press the **A Button** to open it. The number and Koin on the coffin indicate the amount of color-coded Koins you'll need to take a look inside.

Purchased items, such as sketches and photos, are saved to your profile name. You can view them using the **KONTENT** option on the Main Menu (see pg. 11).

To help you find items in this vast area, we've included a Krypt Reference Table, pages 13-14, to help you out. It's also available on the internet at [www.mortalkombatdeception.com](http://www.mortalkombatdeception.com).

#### NOTE:

Krypt Keys can only be acquired in Konquest Mode.

## MAIN MENU

## MAIN MENU

### PROFILES

With a Memory Card inserted in Memory Card Slot A or B, you can create a Player Profile and earn Koins to purchase items in the Krypt (see *THE KRYPT*, pg. 10). These options allow you to create and manage your saved profiles:

#### CREATE A PROFILE

The first step you'll encounter is to give your profile a name. Highlight a character, then press the **A Button** to make a selection. Repeat this process to spell out your name. Select "SPACE" to place spaces between letters, "BACK" to delete letters and "DONE" when you're finished.

#### Choose Icon

Highlight an icon to represent your profile, then press the **A Button** to select.

#### Enter a Kode

Use your controller to select a sequence of button presses to create a Kode that will be the password to your profile. As you press buttons, the Kode Window will display asterisks until you've completed entering the Kode. After you've entered a Kode, you'll be asked to confirm the Kode by repeating the sequence. It's a good idea to write down your Kode on the *KRYPT REFERENCE TABLE* in this manual, pages 13-14, so you won't forget the next time you want access to your profile. If you forget your Kode, you won't be able to access your saved profile.

#### Select Save Location

Your Memory Card offers 8 slots for saving your individual profiles. Press the **+Control Pad Left** or **Right** to select the appropriate Memory Card Slot, then press the **A Button** to save the profile. After saving, your icon and profile name will be displayed for future reference.

#### VIEW PROFILE

Once you've created one or more profiles, view your statistics and how many of each type of Koin has been accumulated. Press the **+Control Pad Left** or **Right** to select saved profiles (if you have more than one).

#### DELETE PROFILE

Press the **+Control Pad Left** or **Right** to select saved profiles, then press the **Y Button** to delete profiles you no longer want. This may become necessary once your Memory Card fills up.

#### LOAD PROFILE

Press the **L Button**, enter the code, and select a profile.

# MORTAL KOMBAT REALMS

## THE STORY KONTINUES...

An ancient ruler of Outworld has returned from beyond death to claim all of reality as his own. The warrior Shujinko has been charged by the Elder Gods to recover six powerful items to be used against this foreseen threat. As Shujinko searches through the realms, his fighting skill grows. Ultimately, he must use his knowledge of kombat to defeat this threat born of deception.

## KONQUEST REALMS

Explore the realms of Mortal Kombat as Shujinko, "Champion of the Elder Gods". Through his journeys, you will meet many great warriors, and learn their fighting styles. There are many secrets to discover and items to unlock.

### EARTHREALM

Shujinko begins his tale here in Earthrealm, home to such legendary heroes as Johnny Cage, Sonya Blade, Jax and Liu Kang. The Thunder God Raiden also defends this realm from the forces of evil.

### OUTWORLD

Outworld is a realm of constant strife. The Emperor Shao Kahn claims this realm as his own and sends his minions to conquer other realms in his name.

### NETHERREALM

The fiery depths of the Netherrealm are inhospitable to all but the most vile. A realm of demons and shadowy warriors, the Netherrealm will leave a lasting impression on your soul.

### SEIDO, THE REALM OF ORDER

The inhabitants of Seido prize structure and order above all else...even at the expense of freedom. The Seidan Guardsmen enforce the law without compassion or leniency. Be mindful of the rules when travelling in this realm.

### THE REALM OF CHAOS

The Realm of Chaos does not abide by the same rules that may apply to other realms. In fact, its inhabitants do not abide by any rules whatsoever. Constant turmoil and change are worshipped here.

### EDENIA

Majestic Edenia has finally been separated from Outworld. Although free once more, they are still under attack from outside forces. Shao Kahn still lays claim to this gem of a world and will stop at nothing to get it back.

### THE NEXUS

The Nexus was created by the Elder Gods to aid their Champion as he searches for the six Kamidogu. The Nexus lies in the Void outside reality and acts as a central hub, connecting the realms with portals.

# FIGHTER SELECTION

At the Fighter Selection screen, highlight an available fighter, then press the **A Button** to make a selection. Player 1 selects using the Red selection box, Player 2 uses the Blue.

The fighter's name and attributes appear on-screen. Locked fighters are darkened out until they're unlocked. To unlock fighters you can accumulate Kurrency and go to the Krypt to purchase (see *KRYPT*, pg. 10), but most of them get unlocked by finding hidden keys in Konquest that get used in the Krypt to open special coffins.

### Stage Select

When in Versus Mode or on the Practice Mode character select screen, press the **Z Button** to bring up the Arena Select Screen. Press the +Control Pad Left or Right to view each arena. When the desired arena is displayed, press the **A Button** to select it.

### LOAD PROFILE

If you've created a Profile (see *CREATE PLAYER PROFILE*, pg. 12), you can load it to save fight results to your profile. Press the **L Button** to bring up the Enter Kode window. Enter your Kode if a profile has yet to be loaded. If it's entered correctly, your profile name will be displayed. If you want to change the profile name, press the **L Button** again, then press **START** to unload the current profile. The profile code window will be available again for you to load another profile.

### HANDICAP

The handicap option allows you to handicap your match. This means you can reduce the amount of Health that your fighter has at the start of a round in order to give a weaker opponent a more competitive match. Press the **Y Button** to display the Handicap window. Press the +Control Pad Left or Right to adjust the handicap's percentage. Your fighter's Health will then be adjusted for the next match only. You can choose a value between 100% (full Health) and 20%.

### WAGERING

If two players have loaded profiles with Kurrency, they can bet Koins on a Versus mode match. At the Fighter Selection screen, both players press the **R Button** to view the wager screen. Next, decide the type of Koin to bet, and the amount (note: you can only bet the type and amount of Koin you have saved in your profile). The amount being bet is then instantly removed from each player's profile.

After the fight, the winner gets credited with the Koin amount won. **IMPORTANT:** If the match is ended before it's completed (like quitting from the Pause Menu), both players lose the Koin amount wagered.

## IN MORTAL KOMBAT

### ROUND TIMER

By default, each round has a **ROUND TIMER**. If the time is up before either combatant has been defeated, the warrior with fewer injuries is declared the victor. The winner takes the match and moves on to the next opponent.

### VICTORY SKULLS

Each time a fighter wins a round, a **VICTORY SKULL** is earned. The first fighter to earn two (in the default setting) wins the match and is declared the victor.

### COMBO

To advance your fighting skills to the highest level, you must learn how to do Combination Attacks. When a combo is executed, the **COMBO METER** briefly appears to display the amount of damage that has been done to an opponent. The more complex the combination, the more damage is done.

### FIGHTING STYLES

Mortal Kombat: Deception includes three **FIGHTING STYLES** per fighter. Press the **L Button** during any match to toggle between them. If you often change your fighting style to confuse your opponent, you may lose track, so take a quick look at the bottom of the screen to see which fighting style you're currently using.

### FIGHT STATE INDICATORS

Your Red indicator light comes on when your fighter is attacking. While lit, you're vulnerable to his attacks and cannot block them. Your Blue indicator light is on when you're stuck in your opponent's combo (like the red light, you cannot block the attack). Your Yellow light indicates that you are close to a hazard within the environment.

## IN MORTAL KOMBAT

### HEALTH BARS

In all Mortal Kombat battles, **HEALTH BARS** in the upper portion of the screen measure each warrior's diminishing Health. The meters begin each round reflecting Health at 100%, but the amount of Health is reduced with each blow taken. The reduction amount depends on the type of attack and whether or not it was blocked. When a fighter's Health Meter is depleted, he/she is knocked out and the round goes to the opponent.

### COMBO BREAKER SYSTEM

At the beginning of each round, you're given three Combo Breakers to use for each round during the match. Press **FORWARD** and **BLOCK** to break the combo. Each time you perform a Breaker, one of the icons will disappear.

### LEVEL ADVANCE

In one player Arcade mode, the Level Advance screen will appear between matches (as long as you've won the match). It displays your next opponent, the fight environment and the amount and type of Koins the match is worth.

The **TIME** displayed top/left of the screen is the cumulative amount of fight time for your victories. Each match will get more difficult than the last, so the **DIFFICULTY** percentage is also displayed.

### MOVES LIST

Discovering and learning fighter moves are a very important part of the game. During a match, press **START** to view the Pause Menu. Select **MOVES LIST** to view the moves for your character. Press the +Control Pad Left or Right to cycle between the three fighting styles and special moves, then press Up or Down to scroll through all the moves for that style.

The Moves List is available in all game modes, including **PRACTICE**.
