DIABLO

BEGINNER SETTINGS

Following are the default controls for Diablo.

- To view a Status screen (Inventory, Character Info, Quest Log, or Full Spell Book), press **SELECT** to access the Options menu, then select the appropriate screen.

DIABLO

ADVANCED SETTINGS

The Advanced Settings configuration will use Combo Buttons to gain more function from your controller.

COMBO BUTTONS

R2 +	Inventory	R2 + R1	Quest Log
R2 +	Character Info	R2 + L1	Full Spell Book

R2 +	Toggle spell		

ENTERING THE REALM OF DIABLO

As a young man, you are called to the service of the Emperor. You are a member of the Imperial Guard, and you are one of the best. You are a member of the Imperial Guard, and you are one of the best. You are a member of the Imperial Guard, and you are one of the best.

Tristram, Diablo

OBJECTIVES

Battle through Diablo's labyrinth, gaining experience and developing your character along the way (see Characters on p. 10). Eventually, when you face the Lord of Darkness, you must be powerful enough to defeat him.

IN THE TOWN

You begin in your hometown of Tristram. Acquaint yourself with the town and its people before venturing into the labyrinth.

- When you are low on health or in need of a special item, return to town. Tristram's artisans and merchants have various skills and gossip to assist you. (See In the Town on p. 13.)

IN THE LABYRINTH

Find the desecrated church and enter it. The labyrinth is below.

- Over 100 different species of evil stand between you and Diablo. Use brute force and magic to slay these beasts. (See In the Labyrinth on p. 16.)

GAME SETUP

To return to the main menu, press **ESC**.

Press **ESC** to return to the main menu.

To return to the previous screen, press **A**.

Note: Use these controls to navigate menus throughout Diablo.

• Default options appear in **bold** in this manual.

To begin a new game:

1. Select **NEW GAME** from the Main menu. The setup sequence begins.
2. Select the number of players: Select **ONE** to begin a One Player game or **TWO** to begin a Two Player game. The Choose Class overlay appears.

Note: In a multiplayer game, players are restricted to the same screen, and if your weapon strikes your ally, it inflicts damage.
3. Select a character class. Select **WARRIOR**, **ROGUE**, or **SORCERER**. (For descriptions, see Characters on p. 10.) The Enter Name overlay appears.
4. Enter a name. D-Button to highlight symbols and press ***** to select. When the name is complete, press **START** to continue. The Choose Difficulty overlay appears.
5. Select a difficulty level. Select **NORMAL**—only high-level saved characters can enter **NIGHTMARE** (Character level 20) and **HELL** (Character level 30). The game loads and your character appears in the town of Tristram.

GAME SCREEN

The game screen displays items started in your belt and your level of mana (used to cast spells) and health.

To return to the main menu, press **ESC**.

To use an item, press **ENTER**.

To use a spell, press **ENTER**.

To use a potion, press **ENTER**.

To return to the main menu, press **ESC**.

- † For a quick boost, you can press **L1** to consume one health potion or **R1** to consume one mana potion. You must have potions in your pack or belt.
- * To use a belt item, press **SELECT**, then access your Inventory from the Options menu. (See Inventory on p. 21.)
- * To access the AutoMap (Labyrinth only), press **R2**.
- When your armor durability is low, a symbol of the armor appears onscreen to warn you that it needs repair.

CHARACTERS

To defeat Diablo, develop your character to its highest potential.

- Slay the denizens of the labyrinth to gain experience—the amount of experience gained is based on the creature defeated and your current Character level.

When you gain enough experience, the Ankh appears onscreen, and your character advances one level. Access the Character Info screen to distribute points among attributes and view new stats.

- * To access Character Info, select CHARACTER INFO from the Options menu.

Current Character level

Experience gained

Protection provided by current armor

Likelihood of a successful hit

Level of damage you can inflict

Experience points needed to advance one Character level

Resistance to spells is granted by magical items such as rings, swords, etc.

- * To toggle between screens, D-Button ←→.

Physical power

Ability to manipulate magic

Agility and accuracy

Level of endurance

To distribute points among attributes, D-Button ↓ to highlight an attribute and press *
One point is transferred.

- Each class has limits on how high certain attributes can be raised.

CLASS DESCRIPTIONS

Each class begins with a special skill and particular abilities and shortcomings.

To use a special skill:

1. Prepare and use a skill as you would cast a spell (see *Casting a Spell* on p. 19).
2. **Sorcerer and Warrior only:** Your pack appears with a flashing icon. D-Button to highlight an item, and press *. The skill is used on the highlighted item.

WARRIOR

The Warrior excels at the art of close combat, but his extensive physical training left him little time to study magic.

Forever on the run, the Warrior learned to repair his own weapons. However, his craftsmanship does not equal that of a blacksmith.

- † Select the Warrior if you intend to muscle your way through the labyrinth.

Save/Load Character

When you save a character at the Save/Load menu (see *Save/Load* on p. 26), you save your current attributes, skills, and possessions. Later, you can begin a new game as your saved character.

- * To load a saved Character, select LOAD CHARACTER from the Class screen in the opening setup sequence.

ROGUE

The Rogue is the undisciplined mistress of the bow. With her unique ability to see great distances, she takes aim and fires upon demons without suffering the damage of close combat. Her understanding of magic is fair, but not nearly as developed as the Sorcerer's.

The Rogue has an unrivaled ability to detect and disarm traps.

- † Once placed, rooms often contain unseen enemies. Shoot first and ask questions later.

SORCERER

Sorcerers spend much time devoted to the craft of magic. Thus, every sorcerer has a deep understanding of spellcasting. An inexperienced sorcerer knows the simplest spells to start and grows in power as he discovers new incantations. His physical power leaves much to be desired, but his most powerful spells provide a weapon more dangerous than the warrior's blade.

The first craft learned by all sorcerers is to recharge one's staff.

- * To cast the spell of a magical staff, prepare it and cast it as you would a normal spell (see *Casting a Spell* on p. 19). The staff uses its own charges rather than mana.

IN THE TOWN

Tristram is your safe haven. Return when you need information or items and when your health is low.

- * To return to town, retrace your steps to the temple entrance or search for shortcuts.
- † To open a convenient portal between your location in the labyrinth and Tristram, learn or buy the Town Portal spell, then cast it wisely. The portal closes behind you when you return to the labyrinth.

INTERACTING WITH THE TOWNSFOLK

Talk with the townsfolk to learn their individual trades. They can oblige you with gossip, quests, or merchandise.

- To initiate a conversation, press **ⓧ** when a character is highlighted. The Conversation menu appears.

D-Button **↑** to highlight an option. Then press **ⓧ** to select.

To return to the game screen, press **ⓧ**.

ARTISANS AND MERCHANTS

If one merchant can't meet your needs, seek another. All merchants do business similarly to Griswold the Blacksmith.

To purchase a basic item from Griswold the Blacksmith:

1. Press **ⓧ** when Griswold is highlighted. The Conversation menu appears.
2. Select BUY BASIC ITEMS. A second menu displays items and prices.

D-Button **↑** to scroll items in his shop and press **ⓧ** to select.

Cost is automatically subtracted from your total amount.

If an item is highlighted, you can also purchase it by clicking the **ⓧ** button next to the highlighted item. (If an item is highlighted blue, it has been previously obtained.)

- You must be able to afford the purchase, and your pack must have space for the new item (see Inventory on p. 21).

QUESTS

Townfolk sometimes request a favor of you in the form of a quest. Completing a quest often provides a reward as well as experience.

Access your quest log to review unfinished quests:

1. Select the QUEST LOG from the Options menu. Quest names are displayed.
2. D-Button **↑** to highlight a quest, and press **ⓧ** to review the details.

IN THE LABYRINTH

As you progress deep into the labyrinth, you encounter hordes of creatures. Collect crucial items, learn magic, and fight to destroy these dark beasts.

- * To fight, press **X**. (To learn more about fighting, see Combat on p. 17.)

- * To pick up an item and place it in your pack or open a door, chest or sarcophagus, press **■**. (To learn more about items in the labyrinth, see Collect Items on p. 20.)
- * To cast a prepared spell, press **▲**. (To learn more about sorcery, see Magic on p. 18.)

AUTO MAP

Use the AutoMap to guide you through the dark, intricate halls of the labyrinth.

- * In small explored areas of the AutoMap, press **R2** + **D**-Button.

COMBAT

Every monster you slay brings you one step closer to Diablo.

ATTACK

Your effectiveness in combat depends on factors such as strength and dexterity. Understand your attributes before charging into combat. (See Characters on p. 10.)

- * To attack the nearest creature with the weapon in your hands, press **X** when the creature is highlighted.

The flight
remains of slain
warriors can be
traced often.

MAGIC

Magic is a powerful force. Invoke magic when brute force is not enough.

- Some creatures are immune to certain spells. Do not use magic indiscriminately.

A spell consumes mana when cast—more powerful spells require more mana. Consume a potion to replenish your supply.

Spells

Learn spells from books or scrolls you find in the labyrinth or buy them from Adria the Witch. Three classifications determine the manner in which a spell is cast:

AREA Spell originates from caster and radiates outward (e.g., Flash spell).

DIRECTIONAL Spell is cast directly at a targeted creature. If no target appears, spell is cast in the direction caster is facing (e.g., Fireball spell).

- When you prepare a Directional spell, a round highlight marks potential targets.

TARGETING Spell is cast in a predetermined location (e.g., Town Portal spell).

† **MULTIPLAYER TIP:** Both players should find or buy the Resurrect spell to bring an ally back to life.

CASTING A SPELL

For the fastest way to prepare and cast a spell, access the Speed Spell book.

- To access the Speed Spell book, press L2. (To close the book without making a selection, press ▲ or L3.)

To prepare a spell, D-Button to highlight an area, then press ▲ to select.

The selected area flashes as the spell is prepared. The spell is ready to cast.

To cast a spell:

1. Press ▲ to cast the prepared spell. Area and Directional spells are cast.
 2. **Targeting spells only:** A target cursor appears. (To cancel, press ✕.) D-Button any direction to set a location, then press ▲ a second time. The spell is cast on that spot.
- Press ●, then L2 and prepare a second spell. You can then press ● to toggle between two prepared spells.

Swift but powerful Koffee does linger in dark corners, waiting for footsteps.

Full Spell Book

- To review and prepare spells you've learned, select FULL SPELL BOOK from the Options menu.

Shrines

Worship at a shrine and you are sure to gain, though it may come at a price.

- To worship at a shrine, press **[Enter]** when it is highlighted.

Collect Items

As you explore Diablo's realm, you discover items that aid your expedition (weapons, potions, etc.).

- To pick up an item, press **[Enter]** when it is highlighted. The item is stored in your pack. If two or more items are near, the Multiple Item overlay appears. **[D-Button]** to highlight an item, and press **[X]** to select or **[A]** to exit.

Note: You must have room in your pack or belt for a new item.

- Treasures are often hidden. Press **[Enter]** to open a door, chest, or sarcophagus when it is highlighted.

Inventory

- To examine and equip items stored in your pack, select INVENTORY from the Options menu.

- To toggle between your pack and the equip screen, **[E-Button]**.

- Descriptions displayed in blue indicate magical items, and descriptions in red indicate that you are not yet qualified to use the item.

To use a new weapon or piece of armor:

1. Highlight the item in your pack and press **★** to select.
2. D-Button **↑**. The item appears in the appropriate window.
3. Press **★** to accept. If you replace an item, return the original item to your pack.

Your pack has limited space. To create room, shuffle items or drop or sell an item in town. (To sell an item, see Artisans and Merchants on p. 14.)

- ★ **To shuffle items:** Highlight an item and press **★**. D-Button to a slot, then press **★**. The item slips into place.
- ★ **To drop an item:** Select the item, then press **■** or **▲**. When you return to the game screen, your character drops the item on the ground.

ITEMS

Collect weapons, armor, gold pieces, and magical items and temporarily stow them in your pack.

WEAPONS Weapons range in durability and potential damage inflicted. To learn exact values, examine the weapon in your inventory.

- Equip your character with the weapon best suited to his class (e.g., The Warrior excels in close combat, the Rogue is the mistress of the bow.)
- Most weapons require minimum attribute ratings to wield. If you currently don't meet the requirements, you can sell the weapon to Griswold or drop it for your ally in a Multiplayer game.

ARMOR

Any armor is better than nothing. Combine armor for the highest possible Armor Class (AC). To learn your current AC view the General Character Info screen. (See Characters on p. 10.)

- Heavier armor requires more Strength to equip.
- Add a shield and helmet as soon as you find or purchase them.

JEWELRY

Amulets, rings, pendants, and amulets can increase (and or times reduce) specific attributes.

POTIONS

Potions cure what ails you: red potions restore health, blue potions restore mana, and good potions restore both.

ELIXIRS

Elixirs increase specific attributes.

SCROLLS

Scrolls contain spells that do not require mana. Once you cast the spell, the scroll disintegrates.

- ★ To cast a spell from a scroll, select the scroll from your belt or pack or prepare it as any other spell. (See Casting a Spell on p. 19.)
- **BEWARE.** If you read a scroll, then press **★** (cancel), the parchment disintegrates without casting the spell.

BOOKS

Books contain clues to quests, spells, or other wisdom. To read a book of magic:

1. Pick up a book and stow it in your pack. (Certain tomes immediately become scrolls.)
2. Select INVENTORY from the Options menu, then D-Button to highlight the book.

Note: If the book is red, you do not yet meet the requirements to read its contents.

3. Press **●** to read the book. The spell is recorded, and you can prepare it any time. (See Casting a Spell on p. 19.)
- If you already know a spell, any subsequent book on that spell can increase its power.

GOLD

Demons hoard gold. Collect these pieces and use them to buy items from the merchants in town.

The corpses of executed men are slow but persistent.

OPTIONS

Main menu Options allow you to alter your default controls and the game's appearance before you begin. In Game Options offer similar solutions plus the opportunity to save or load.

Main Menu Options

VOLUME Adjust the sound effects, speech, and music volume and the adjustment stereo and sound settings.

CONTROLLER BEGINNER SETTINGS Highlight then press **X** to activate default controls recommended for a beginner.

ADVANCED SETTINGS Highlight then press **X** to select a more advanced controlled combination.

MOVEMENT Toggle between ABSOLUTE D-Button to move relative to your screen and RELATIVE D-Button to move relative to the scenery.

COMBO BUTTON MENU ENABLE onscreen Combo Button help text.

COMBO BUTTON Assign a Combo Button to wait more function from your controller.

To customise controls

- 1 D-Button to highlight an action then D-Button **→** to highlight its assigned button.
- 2 Press any button. The action is assigned the new button.

Note When reconfiguring your controller, you must assign a button to ACTION, ATTACK, and CAST SPELL.

- SCREEN ADJUSTMENT** Control the game screen.
- VOICE** Select a language for audio and text information.
- LANGUAGE** Select a language for audio and text information.
- CREDITS** View a list of the developers who created Diablo.
- HELP** View the command summary and miscellaneous tips.

In-Game Options

To access the In-Game Options menu, press **SELECT**.

- VENTORY** Examine and equip collected items. (See Inventory help.)
- CHARACTER** Distribute points among attributes and view general Character information. (See Character help.)
- QUEST LOG** View your current quest. (See Quest Log help.)
- FULL SPELL** Recharge your spells. (See Full Spell Book help.)
- CON**
- SAVE/LOAD** Load a saved game or save your current game character or options. (See Save/Load help.)
- GAME SPEED** Adjust the pace of the game. Toggle between NORMAL and FAST.
- QUIT** Exit the game and return to the title screen.

In-Game Options also allow you to adjust volume, screen, and controller setup.

SAVE/LOAD

From the Save/Load menu, you can save your current game, character, and options or load a saved game or options.

Note: Never insert or remove a Memory card when loading or saving files.

- SAVE GAME** Save a game in progress. To save your game:
1. Press **SELECT** to access the Options menu.
 2. Select **SAVE/LOAD**. The Save/Load menu appears.
 3. Select **SAVE GAME**. Diablo reads your Memory card.
 4. Select a Memory card slot. The game saves.
- LOAD GAME** Load a saved game. (You can also load a saved game from the Main menu.)
- SAVE CHARACTER** Save up to six characters on your Memory card. When you save a character, you save your current attributes, skills, and possessions. (Load a saved character from the Class screen during setup.)
- SAVE OPTIONS** If you adjust your options, you can save them as the default.
- LOAD OPTIONS** Load your saved options.
