Hints on Playing the Game.

Whatever you do don't go swimming, the water seems to be pretty polluted. Not at all good for your health.

Experiment with the Pick-ups as each has its own good and/or bad points.

Use 'big jump' to reach otherwise unobtainable heights and also to jump down from walkways to the ground below.

Avoid taking damage. Trying to walk through things is a costly way of killing them.

And remember: Practice makes perfect, almost!
