▶ **Endurance:** Player's stamina rating.

▶ **Shooting Range:** Set the maximum range in feet that the player is comfortable shooting from.

▶ **Clutch:** Player's ability to perform in pressure situations, with 5 being the highest rating.

▶ **Player Ratings:** There are four rating groups (scoring, defense, rebounds, and control), each composed of four individual ratings, and an endurance rating. You can select ratings from 50 (not very skilled) to 99 (absolute superstar) to tailor the Created player to your liking.

▶ **Modify Player:** This new option lets you modify an existing NBA player's attributes (but not his name). If you modify an NBA player, the data is saved in one of the Custom Player slots, but the player retains his original roster spot.

▶ **Edit Player Screen:** Edit an existing Custom or Modified player.

▶ **Delete Player:** Delete an existing Created player or reset a modified NBA player back to his default attributes. This screen isn't available until you Create/Modify a player.

CUSTOM TEAMS SCREEN

You can create up to four Custom teams filled with the NBA and/or Custom players of your choice.

▶ **Slot:** Select one of the four Custom team slots.

▶ **City:** Edit the name of your team's city.

▶ **Team:** Edit your Custom team's name.

▶ **Logo:** Select one of the available team logos.

◆ To add players to your roster, press ■.

Note: The first time you select a Custom team, all the roster slots are empty. You must fill at least 8 roster slots before you can continue.

RESET ROSTER

● Reset rosters to the default NBA rosters.

SEASON PLAY

You can take a team through an entire season (including playoffs) in *NBA Live 98*. Detailed statistics are tracked for every player in the league, and you can save multiple Season files if you have enough room on your memory card(s).

When you start your first Season, the Season Settings screen appears, followed by the Season Team Select screen.

SEASON SETTINGS SCREEN

Options on this screen get a short description at the bottom of the screen when the option is highlighted. Most are self-explanatory; those that aren't are detailed below.

▶ **Season Type:** Leave at **NBA** for default teams or select **CUSTOM** to choose the 29 teams in your Season (including Custom teams) from the Custom League screen that appears in place of the Team Select screen.

▶ **Schedule Type:** Play a **97/98** NBA schedule or let the computer set a **RANDOM** schedule.

▶ **Playoff Length:** Set the number of games for each playoff round. Choose from **5-7-7-7** (the NBA format; 5 games in the first round and 7 games thereafter), **1-1-1-1**, **1-3-3-3**, or **3-5-5-5**.

Full Stat Tracking: When set to **YES**, 5 memory blocks are used for each Season file. If set to **NO**, only 2 blocks are used, but individual player stats aren't saved.

Always Show This Screen: Set to **YES** to always display this screen when starting a Season, **NO** to skip these options in the future and go directly to the Season Team Select screen from the Game Setup screen.

SEASON TEAM SELECT SCREEN

Determine which teams are user-controlled.

- ◆ To toggle user control **ON/OFF** for the current team, press **X**. You can control as many teams as you want; user-controlled teams are marked with a 'User' stamp.
- ◆ Press **START** to continue. The Season Team Schedule screen appears.

SEASON TEAM SCHEDULE SCREEN

Use this screen to play or simulate games throughout your team's season and access the various Season screens.

Season Stats: The various stat screens let you view stats and standings for the entire league.

- ◆ To open the various stat screens, press **●**, then select the appropriate screen.

Season Review: Review the Season in detail, from team vs. team matchup results to hot/cold streaks, team reports, and daily news reports.

Injuries: Review any injured players by team (available only if there are injured players).

Season Setup: Go to the Season Setup screen to modify the settings that can be changed after the Season begins. From here, you can access more screens (e.g., Options, Rules, Active Teams, etc.) by pressing **●**.

Rosters: Go to the Rosters screen (> p. 22).

EA TIP

Player and Team awards are doled out after the Playoffs completed following a Season. Play big, and you might just win one.

Memory Card: Save your current Season or load another saved series.

Quit Season: Quit the Season in progress.

Go To Playoffs: Go directly to the Playoffs, with the current standings determining Playoff seeding. (> *The NBA Playoffs* below.)

[THE NBA PLAYOFFS]

You can create your own playoff atmosphere any time you want in *NBA Live 98*. Start with an NBA team in Season Play and try to make the Playoffs, or set up your own custom Playoffs as described below.

When you start your first Playoffs, the Playoff Settings screen appears. This screen is similar to the Season Settings screen (> p. 25), except that there are fewer options. When you continue, the Playoff Team Select screen appears.

PLAYOFF TEAM SELECT SCREEN

Select teams (including Custom teams) and user control options.

- ◆ To toggle **USER/CPU** control for the current team, press **✖**. You can control as many teams as you want.
- ◆ To bring up the Navigation menu to switch conferences, press **●**.
- ◆ Press **START** to continue. *The NBA Playoffs* screen appears.

PLAYOFFS SCREEN

The Playoffs screen initially shows the Western Conference matchups. The next matchup to be played is highlighted with a gold box (user-controlled teams are orange), and the current series standings appear next to the team names. As the Playoffs progress, winning teams advance toward the Finals.

The screenshot shows the 'playoffs' screen with a bracket and a list of teams. The list includes Utah (1), LA Clippers (8), LA Lakers (4), Portland (5), Houston (3), Minnesota (6), Seattle (2), and Phoenix (7). The LA Lakers are highlighted with a gold box. The screen also shows 'LIVE' and 'Western to R'.

END OF GAME

After a Playoff game, the endgame screens appear as normal. Press **START** to continue, and *The NBA Playoffs* screen appears. Win/loss records for all teams are displayed next to the team names.

END OF ROUND

- If you win your round, your team advances to the next bracket to face a new opponent.
- If you lose a round, you return to *The NBA Playoffs* screen to see the final playoff results. Press **START** to return to the Game Setup screen.
- If you win it all, press any button to proceed to the Championship sequence. Way to go, champ!

[3 POINT SHOOTOUT]

The goal of the 3 Point Shootout is to nail as many 3-pointers as possible within one minute. There are 5 racks of 5 balls spread around the 3-point arc. Each bucket counts for one point, except for the last ball in each rack—sink the 'bonus ball', and you get two points.

When you choose **3 POINT SHOOTOUT** from the Game Setup screen the following unique 3 Point options appear.

Split Screen: When set to **YES**, two players shoot simultaneously on a split screen (great for head-to-head competition). When set to **NO**, players alternate.

Players: Select 2–8 shooters.

CPU Players: When set to **SIMULATE**, computer-controlled shooter results are simulated.

- The Player Setup screen appears next. Choose the players and **CPU/PLAYER** control (**✖** to toggle), and then the contest begins.

ON THE FLOOR

- ◆ To **grab the next ball** from the rack, press **R1**.
- ◆ To **shoot**, press **●**.
- After your player shoots the fifth ball in each rack, he automatically moves to the next rack.

- ❑ After a round you can change player control and review scores.
- ❑ If more than two players enter the contest, multiple rounds are used to eliminate the shooters with the lowest scores at the end of each round.
- ❑ At the end of the contest, you have the option to **PLAY AGAIN** with the same player(s), return to the 3 Point Setup screen to **SELECT NEW PLAYERS**, or **QUIT GAME**.

How long you hold ● affects the shot's accuracy.
