Press the A Button to begin entering the password. The cursor will move under the first character of the password. Use the Up and Down directions to change the letter. Use the Left and Right directions to move from one character position to the next. When you have correctly entered your password, press the Left or Right directions until the cursor appears to the left of the password. Next, use the Up or Down direction to move the cursor to END and press the A Button. You will then begin your game from the chosen level.

## The Objective:

The objective is to gather up all the Woodstocks, while avoiding Spike and the bouncing balls. In the 2 Player game, the second player becomes Spike (Snoopy's brother) and must compete against player one (Snoopy) to finish the screen first. There are over 100 different screens, each challenging in its own unique way.

## How to Play:

You begin the game with 5 lives. You receive an extra life for each level you complete within the allowed time. You lose a life when you run into a bouncing ball or Spike, or time runs out. The amount of time remaining is indicated by the changing of the color of the border around the game screen. This border gradually changes color as time passes, starting from the top of the screen and moving counter-clockwise. Time has expired when the entire border has changed color.

There are several types of special items that you will encounter:

## Regular Blocks:

You can sometimes move these blocks by pushing on them.

**Fragile Blocks:**

These blocks can be eliminated by pushing on them while pressing the A Button. When eliminated, these blocks leave a hole behind that does not affect anything else.

**Disappearing Blocks:**

These blocks will disappear and reappear.

**Teleporter Squares:**

When you enter this square, you will appear on another teleporter square. This can be helpful in avoiding the bouncing ball.

**One Way Squares:**

When you enter this square, you are automatically moved one square in the direction of the arrow.

In addition, there are two special hidden surprises that will occasionally appear:

**Power:**

When you touch this symbol, you will begin flashing. While flashing, you can eliminate bouncing balls by running into them. Be aware that this only lasts for a short time!

**Clock:**

When you touch the clock, time will stand still for a short while.

When you have lost all your lives, you will be given the opportunity to continue from the current level. You will also be given the password that will allow you to start from this level at a later time.

**Scoring:**

You receive 1000 points each time you rescue a Woodstock or and 100 points for each unit of time remaining when you complete a level.
