Setting Up

HARDWARE SETUP

SONIC MEGA COLLECTION™ is a collection of games for one or two players. Connect the NINTENDO GAMECUBE CONTROLLERS to the Controller Sockets 1 and 2 (depending on the number of players participating).

MEMORY CARD

SONIC MEGA COLLECTION™ is compatible with the NINTENDO GAMECUBE MEMORY CARD 99 (sold separately). Insert the Memory Card to Memory Card Slot A. 2 blocks of free memory and one free file are needed to create the system file (which includes all game data for Sonic the Hedgehog 3 etc.).

When the data is being saved, manually or automatically, a message will be displayed to notify that such action is taking place. Never turn OFF the NINTENDO GAMECUBE power or remove the Memory Card while the game data is being saved or loaded.

Please refer to the NINTENDO GAMECUBE instruction booklet for directions on how to format and erase Memory Card files.

CONTROLLER NEUTRAL POSITION RESET

If the L or R Buttons are pressed or the Control Stick or C Stick are moved out of neutral position when the power is turned on, those positions will be set as the neutral position, causing incorrect game control during game play.

To reset the controller, release all buttons and sticks to allow them to return to the correct neutral position, then hold down the X, Y and START/PAUSE Buttons simultaneously for 3 seconds.

Controls

*All controls explained in this manual are in "DEFAULT 1" configuration. See PB for details on Controller Configuration (of Options Menu).

MULTIPLAYER GAMES

With some games, more than one player can participate either simultaneously or alternating.

• SIMULTANEOUS PLAY

With simultaneous play, players use their own controller to play (connected to Controller Sockets 1 and 2).

• ALTERNATING PLAY

With alternating play, each player takes turns playing the game using one controller (connected to Controller Socket 1).

Sonic Status: "Too Baaaad," when you get another shot at the level.

GAME STRATEGY

Each level has a number of Chaos Emeralds you must collect before confronting the boss robot and completing the level. A variety of halfways and other obstacles stand between you and the Emeralds. These can only be passed by flicking hidden switches, and by repeated Sonic attack force.

Follow the directions marked in the background to make sure you hit the right spots.

With the blockages cleared, follow the path to find the Emeralds.

When all the Emeralds have been gathered, Sonic must destroy the level boss.

BONUS ROUNDS

At the end of each level, there is a Bonus Round.

This is a game of regular pinball and you have 3 balls to play.

PLAY TIPS

- Launch Sonic by tilting both flippers together with the X Button. This is a safe and easy tactic for beginners.
- Watch out for lights and arrows showing important spots and routes in the background.
- Catch Sonic on the flippers by holding them up as he enters the Alley Ramp. This way you can aim him more accurately.
- To shoot straight up, fire when near the hinge of a flipper. To launch at an angle, let him roll towards the tip first.
- Don't forget to watch the Status Strip for extra gameplay hints!

DR. ROBOTNIK'S MEAN BEAN MACHINE™

Original Release Nov 1993

Dr. Robotnik is changing the jolly folk of Beanville into devious little robots that will help rid Planet Mobius of music and fun forever. Group the beans together to help them escape while working your way up to the wilyer henchbots.

DR.ROBOTNIK'S MEAN BEAN MACHINE

• GAME OBJECTIVE

Remove the beans by stacking 4 of the same coloured beans together. Attack your opponent by creating chain reactions, but watch out for counter-attacks!

Beans drop from the top of the dungeon in pairs. When 2 beans of the same colour touch, they will link. When 4 or more beans are linked together, they disappear from the dungeon. Try to arrange the beans into groups as they drop to prevent them from overflowing.

BEANS

Link 4 or more Beans of the same colour to make them disappear from your dungeon. Link them vertically, horizontally, or in clumps.

If you drop a pair of beans horizontally on an uneven surface, any Bean left hanging will drop to the lowest point of the column.

The descent rate of the Beans can suddenly speed up dramatically, even in the early levels. Don't panic though! This is only temporary.

• REFUGEE BEANS

Refugee Beans will drop into the opponent's dungeon whenever a player successfully releases a group of Beans. Refugee Beans cannot be linked to any colour, and can only leave when neighbouring beans disappear.

DR.ROBOTNIK'S MEAN BEAN MACHINE

Check the top of your dungeon for advance warning of how many Refugee Beans will drop (See below).

One Small Clear Bean: One Refugee Bean.

One Big Clear Bean: Six Refugee Beans.

One Big Red Bean: Thirty Refugee Beans and big trouble!

The Greater the number of Beans that vanish (especially in a chain reaction), the greater the number of Refugee Beans will drop into your opponent's dungeon!

SCORES

- Earn points when your Beans vanish. The bigger the chain reaction, the more bonus you can earn!
- Earn points by speeding up the descent rate of the Beans falling into your dungeon.
- If you win a game within a certain amount of time in Scenario Mode (110 seconds for a normal game), you receive a special Time Bonus for each second remaining.

If you've achieved a high score by the time you end the game, a High Score Screen will be displayed. Use \uparrow/\downarrow to select the letters and press the A, B, or X Buttons to fill in the next letter of your initials (up to 3 letters). Use \leftarrow to return and correct any mistakes.

PASSWORD

A password appears when you win a Stage in Scenario Mode. Use this password to start future games from the next Stage up.

First choose Scenario Mode from the Game Menu, then select "CONTINUE." When the Password Screen is displayed, use \leftarrow/\rightarrow to highlight the type of Bean you want to fill in the space and press the B, or X Buttons to enter the Bean into the password.
