For safe use of this product, carefully read the following section of this manual and the Precautions section of the instruction manual supplied with the PSP handheld entertainment system before use. Retain both this software manual and the instruction manual for future reference.

Health precautions

- When operating the unit, play in a well-lit room and keep a safe distance from the screen.
- Avoid prolonged use of the system. Take a break of about 15 minutes during every hour of play.
- Do not use the system when you are tired or short of sleep.
- When using headphones, do not turn the volume up before putting the headphones on. Also, do not listen at loud volume levels for extended periods of time. Stop using the system immediately if you experience any of the following symptoms. If the condition persists, consult a doctor.
- Lightheadedness, nausea, or a sensation similar to motion sickness.
- Discomfort or pain in the eyes, ears, hands, arms, or any other part of the body.

Use and handling precautions

- This disc is PSP™ (PlayStation®Portable) format software and is intended for use with the PSP system only. If the disc is used with other devices, damage to the disc or to the device may result.
- This disc is compatible for use with the PSP™ system marked with FOR SALE AND USE IN U.S. ONLY.
- Depending on the software, a Memory Stick™ Duo or Memory Stick™ PRO Duo (both sold separately) may be required. Refer to the software manual for full details.
- Do not use while driving or walking. Do not use in airplanes or medical facilities where use is prohibited or restricted.
- Set the PSP™ system's wireless network feature to off when using the PSP™ on trains or in other crowded locations. If used near persons with pacemakers, the signal from the PSP™ system's wireless network feature could interfere with the proper operation of the pacemaker.
- If paused images are displayed on the screen for an extended period of time, a faint image may be left permanently on the screen.
- Store the disc in its case when not in use and keep in a place out of the reach of children. If the disc is left out this may result in warping or other damage to the disc.
- Do not leave the disc in direct sunlight, near a heat source, in a car or other places subject to high heat and humidity.
- Do not touch the opening on the rear of the disc (recording surface of the disc; see drawing). Also, do not allow dust, sand, foreign objects or other types of dirt to get on the disc.
- Do not block the opening with paper or tape. Also, do not write on the disc.
- If the opening area does get dirty, wipe gently with a soft cloth.
- To clean the disc, wipe the exterior surface gently with a soft cloth.
- Do not use solvents such as benzene, commercially-available cleaners not intended for CDs, or anti-static spray intended for vinyl LPs as these may damage the disc.
- Do not use cracked or deformed discs or discs that have been repaired with adhesives as these may cause console damage or malfunction.
- SCE will not be held liable for damage resulting from the misuse of discs.

Ejecting the disc

Press the right side of the disc until it is in the position shown in the drawing and then remove it. If excess force is applied this may result in damage to the disc.

Storing the disc

Insert the bottom side of the disc and then press on the top side until it clicks into place. If the disc is not stored properly, this may result in damage to the disc.

Story

10 years ago, PoPoLoCrois was turned into an icy wasteland, covered in snow and whipped by chilly winds. This horrible change was caused by the Ice Demon who came from the Land of Ice. The Ice Demon attacked PoPoLoCrois, along with his four evil wizards. The people of PoPoLoCrois did not have the power to stop them and they began to give up hope.

Then, one day, a beautiful dragon came down from the heavens to protect PoPoLoCrois. The Ice Demon and the dragon fought day after day, for many weeks, until finally the Ice Demon was defeated. But when the Ice Demon fell into the World of Darkness, he took the Dragon with him.

Time has passed... And in peaceful PoPoLoCrois, King Paulo's son Pietro is celebrating his tenth birthday. The people of PoPoLoCrois have put on a wonderful celebration for Pietro, and many well-wishers have sent him cards and gifts.

But... for some reason, Pietro still seems lonely.

Weapons

Swords and canes that increase attack power when equipped.

Esper Items

When used in battle, they summon monsters that fight for the party.

Accessories

Items such as rings and bracelets that have effects when equipped.

Important Items/Souvenirs

These are items related to the game's story.

Special Skills

Special skills are distinctive magics and attacks that each character possesses. Special skills consume the character's MP when they are used.

To use a special skill, follow the directions below:

- Select character to use special skill.
- Select which special skill to use.
- Select the target that the special skill is directed.

Special skill name / Level / MP consumed

Special skills that can be used on the field are enclosed by blue lines.

Special skill experience

Indicates the selected special skill's experience and the experience needed to reach the next level.

- **About special skill level up.**

When the party defeats monsters in battle, each character will earn experience points for each special skill that the character has learned. When enough experience points are earned, the character's special skill levels up.

*At the start of the game, the default battle setting is set to auto AI battle. If you wish to use "Manual" for battle, please change the setting to "Manual" with "AI Command."

Battle Flow

Battles are fought in a real-time turn-based method. Each character has an active gauge, which increases. When a character's active gauge is full, that character takes a turn.

ACTIVE GAUGE INCREASES

When the gauge is full, the character's battle commands are displayed.

END TURN

Once a battle command is selected, the character's turn ends and its active gauge empties.

FULL GAUGE CHARACTER TAKES TURN

A number appears when the character attacks an enemy or uses a healing spell.

White numbers: Normal attack damage
Yellow numbers: Critical hit damage
Green numbers: Healing
Blue numbers: MP is restored

Watch out for status changes

An icon is displayed above the character's head if the character's status is not normal after getting attacked by an enemy. The status change will go away after a certain period of time, but items or spells can also remove the status. Status changes can cause the character to act slow, stop, sleep and more. It's wise to immediately remove any status change that one of your characters has.

-  **Stone** Character's body is paralyzed and active gauge stops, making movement difficult.
-  **Sleep** Character falls asleep and active gauge stops, making any action unavailable. The character wakes up when hit.
-  **Poison** Character's body is inflicted with poison, causing damage over time.
-  **Chaos** Character's mind is struck with chaos, causing confusion. The character will randomly attack enemy or party members.
-  **Slow** Character's agility is decreased, making the active gauge slow down.
-  **Age** Character's body feels old, decreasing movement and evasion.
-  **Stun** Character's body is stunned by magic, and cannot move. But, the character can still attack and use items.

When all enemies are defeated...

After defeating all enemies or all enemies run away, the party wins the battle. Victory confirmation, Exp and special skill Exp earned, gold earned, and items obtained are displayed in that order. Also, when a character levels up, a message is displayed.

When a character is knocked out in battle, the character rejoins the party with 1 HP after the battle.

When the party is defeated...

When a character's HP reaches 0, that character is knocked out and is not able to fight. When all members of the party are knocked out, the party loses. If the party loses in battle, the game will resume from the last saved point with half their gold total. Earned experience remains the same if the party loses the battle.

See page 13 about saving the game.

*In some occasions, depending on the scenario, the game might resume from a certain point after the party loses in battle.

Battle Commands

Move / Attack

This command allows the character to move and then attack. You can also choose to only move or only attack without moving.

Target field (Red)
Character attacks when an enemy is within this field.

Area that the character can move

ATTACK / MOVE ORDER

Use the direction buttons to move the character to the area you wish to move (character doesn't have to move). Use the L button and R button to change the direction the character is facing.

After you have moved the character to the desire location and direction, press the **X** button to confirm the movement. When a monster is within the target field, the character automatically attacks the monster and the damage amount is displayed.

**When attacking a monster from the side or behind, the damage is increased.*

USING COMBINATION ATTACKS

If "Move/Attack" is selected when the focused attack gauge is full, two characters can perform a combination attack.

When the two characters are positioned on the field in a certain way, the target field will turn pink. Press the **X** button when the target field is pink to perform the combination attack. There are many different characters and positions that allow for combination attacks. Try experimenting with many different positions.

See page 21 for focused attack gauge info.

- * Only one combination attack can be used per battle.
- * If the monster is not within the target field when positioning the combination attack, the target field will not turn pink.

Special skills

Special skills use MP. Characters can use special skills to attack enemies and heal party members. When a special skill is selected, the target field is displayed. Select the target field you wish to use the special skill on and press the **X** button.

USING SPECIAL SKILLS

The target field color changes depending on the special skill used.

Red (Attack): Character will attack the monster(s) within the target field.

Green (Heal): Character will heal the character(s) within the target field.

Items

This command allows you to use medicines and Espers.

USING MEDICINE ITEMS

When a medicine is selected to use, a green target field is displayed. Select the character to use the medicine on and press the button.

USING ESPER ITEMS

When an Esper item is used in battle, it summons a character (monster) that joins the party and fights with enemies. You are able to control summoned characters with battle commands. When the summoned creature's HP reaches 0, or the battle ends, it disappears.

Magical monster:
Jewel items summon monsters. A Jewel can only be used once. After it's used, it disappears.

Warrior:
Orb items summon a warrior from another world. They can be used as many times as you wish, but they cost MP to use.

Flee

This command allows you to flee from battle. The party can flee from battle at anytime (except when facing a boss). When fleeing from battle, the party will drop some of their money.

* The party cannot flee from some battles.

Focused Attack

When this command is selected, the character skips one turn and can attack the enemy next turn with greater damage. When the focused attack command is selected, the active gauge changes to the "focused attack gauge" and is displayed in red. If a character attacks an enemy when the focused attack gauge is full, damage to the enemy is greater than a normal attack. Also, focused attacks can be used to perform combination attacks. Remember that the active gauge returns to normal next turn, even if the character does not use a focused attack when the focused attack gauge is full.

See page 19 for combination attack info.

AI Battle Command

This command lets you change your auto-battle set-up. During battle, characters automatically move and select battle commands unless "Manual" is selected.

Commands

- | | |
|--------------|---|
| Manual | Player manually selects battle commands. |
| Full Assault | Members use the strongest attacks / skills. |
| Attack | No skills are used. |
| Defensive | Members focus on keeping their HP high. |

SWITCH AUTO-BATTLE TO MANUAL?

When an auto-battle mode is selected, battles progress automatically. When you wish to control your characters manually, press the button when it is the character's turn. The battle command menu will be displayed and you'll be able to change the character's battle command.

* At the beginning of the game, the AI battle command is set to automatic. Unless "Manual" is set, you cannot control battles.

Characters

☞ Pietro ☞

The prince of PopoloCrois Kingdom — our hero. He is a boy who, because of harrowing circumstances, is asked to grow up quickly. He has lots of spunk and drive. A very determined fellow, he can also be rash at times in his eagerness and fervor. He is smart, funny and just at that age where girls are starting to matter. He is also loyal, caring and fun-loving (when there is time). He is driven by the love he has for his mother and father, his friends, and his sense of justice. His personality doesn't allow him to say no when he is asked for help. The story begins as he turns 10 years old.

☞ Narcia ☞

A forest witch (a good witch...think "little Earth Mother") who lives in Flonel Forest with her sister, Guilda. She is loyal, fun-loving, brave, and wears her heart on her sleeve. While she is a bit shy, she is also whip-smartfearless, and very sensible. Her body has a horrible obversion to saltwater. She helps Pietro by being at the top of her game, magically speaking.

☞ Witch Guilda ☞

She is a forest witch and Narcia's sister. She is difficult, but very kind.

☞ White Knight ☞

A "brave knight" traveling the world in search of a legendary sword, the King Knight's Sword. He might not be as brave as one who like a knight to be, but when it counts, he is ready to fight. He is valiant when it really matters.

☞ Gabo ☞

A dragon baby born in the Earth Dragon's nest. Because White Knight was the first thing it saw after hatching, it follows him, thinking he's its mother.

☞ Gami Gami Devil ☞

A maniac inventor who calls himself a "Devil." He is in love with Narcia and he sees Pietro as his romance rival.

~*~ *Gon and Don* ~*~
They are PopoloCrois Castle guards. Because they are the youngest soldiers in the castle, they are often ordered to travel with Pietro.

~*~ *Jilva* ~*~

She is princess of Roma, the music country, and an expert dancer. She is very tomboyish and quite outgoing. Once she gets an idea into her head she really clings to it.

~*~ *Leona* ~*~

She is a strong, and exceptionally skilled, archer with the ability to understand animal languages.

~*~ *Kimendoji* ~*~

A mysterious Samurai who joins Pietro as a guard. He wears a scary looking mask, but he has a phobia of dogs.

~*~ *Queen Sania* ~*~

Pietro's mother. She fell into a mysterious sleep soon after Pietro was born.

~*~ *Elena* ~*~

The princess of PopoloCrois Kingdom. She was born when Pietro was 12 years old. She likes Pietro a lot and doesn't like to share.

~*~ *King Daulo* ~*~

The king of PopoloCrois Kingdom and Pietro's father. Well meaning, loving, sensitive and thoughtful, but not the strongest king we've ever seen. He loves Pietro very much, but worries a lot about him (and everything) as well.

❧ Maira ❧

The great lord, Jurius's daughter. Her arrogant personality and actions toward other people's beauty caused her to be banished from heaven and turned into a beast.

❧ Ice Demon ❧

The ruler of North Land and master of ice magic. In the past, he attacked PopoloCrois but was defeated by a dragon and fell into the World of Darkness.

❧ Hints and Tips ❧

Try pushing objects...

The party might be able to push certain rocks and other objects that appear in dungeons and around the world. New passages or holes might be found by moving objects or a door may open by moving objects.

Leona can talk to animals!

Leona can understand animal languages. Once Leona joins the party, try talking to animals around the world. Animals might have important hints.

Gami Gami Devil's Slingshot!

Gami Gami Devil's special skill, "Slingshot" can fire "Items" and "Unknown items" at enemies. The damage differs depending on the items used for the slingshot. Try experimenting with many different items.

See page 9 for info about "Unknown Items."
