With a re-designed passing system and precision tackling, *FIFA Soccer 2002* gives you total control of the ball. Find a breaking forward with a perfect 40-yard ball into open space, embarrass the defense with cunning one-twos, or execute a deep swerving cross to leave the goal keeper stranded. *FIFA Soccer 2002* for the PlayStation 2 console brings the beautiful game to life like never before.

COMPLETE CONTROLS

Soccer is a game of control and finesse. Dribbling and passing are essential to winning, but they're just the beginning. Master the fundamentals first, then learn the more advanced moves to keep the other guy off balance. Use all the weapons in your arsenal—charges, feints, challenges, dekes, and more—in your quest to steal the ball or find the open lane to the goal.

BASIC CONTROLS

ATTACKING

Add ball spin left (press during power-up)

Add ball spin right (press during power-up)

SPRINT—Tap or hold the ▲ button. Each tap gives the player a short burst of speed

SHOOT—The longer you hold the ● button, the harder you shoot (see *Power Meter* on p. 8)

PASS—Hold the ✕ button to power up your pass and use the D-Button or left analog stick to aim it

LOB—Send an aerial pass

DEFENDING

SPRINT—Tap or hold the ▲ button. Each tap gives the player a short burst of speed

CONSERVATIVE TACKLE—The safest way of stripping the ball from your opponent

SWITCH PLAYER—Swap control to the player closest to the ball. Watch for the control highlight that appears over the closest player

SLIDE TACKLE—Your player makes an aggressive attempt to tackle the ball away from an opponent. Use with caution—this can result in bookings!

EA TIP: Sprinting tires players more quickly. Check the Player Status Bar for the player's level of fatigue (➤ *Player Status Bar* on p. 16).

NOTE: A slide tackle can draw the attention of the referee and may even injure your opponent. Be sure to have your timing down when you attempt this move.

EA TIP: Sliding from behind almost always lands you a penalty, but a well-timed slide from the front or side is a great way to block a pass or shot.

THROW-IN, FREE KICK, CORNER KICK AND GOAL KICK IN POSSESSION

Move target	D-Button or left analog stick
Take kick/throw ball	✕ button

NOTE: The power meter works for free kicks, corner kicks, and goal kicks as well (➤ *Power Meter* on p. 8).

Icon Attack	■ button, ● button, or ▲ button

- ❖ Potential kick/throw receivers have button icons displayed above their heads. To select a player to throw or kick to, press the button that corresponds with that player's icon.

IN DEFENSE

Switch player	✕ button

PENALTY KICK/SHOOTOUT

KICK TAKER

Switch kicking side	■ button
Shoot	● button (hold down for increased power)

KEEPER

Choose direction of save	D-Button or left analog stick
Attempt save	■ button, ✕ button, or ● button

INTERMEDIATE CONTROLS

You've done your drills and learned to handle the ball pretty well. Now you need to take your skills to the next level. Read on to add power and accuracy to your game, and to learn a couple tricks for the highlight reel.

AIMING THE SHOT

Pressing the ● button sends a shot in the general direction of your opponent's goal wherever you are on the pitch. As with passing, the power of a shot in *FIFA Soccer 2002* is determined by how long you hold the relevant button. Use the D-Button or left analog stick to aim your shot to any corner of the net.

NOTE: You can also score by lobbing or passing the ball into the net or by heading or volleying (➤ *Heading* on p. 9 and *Volleying* on p. 9).

NOTE: Pressing the ● button while in possession on your own half of the pitch clears the ball.

POWER METER

When you press a button to shoot, pass, or take a free kick, corner kick, or goal kick, the power meter appears. As you hold the button down, the meter fills and the power of the kick increases.

- ❖ You should release the shot *before* the meter fills completely. If the meter turns red, you've overpowered the shot (making it less accurate).

PASSING

The new passing system in *FIFA Soccer 2002* gives you complete control of the destination of your passes. Press the ✕ button to pass the ball along the ground or press the ■ button to execute a lob pass.

To control the power of the pass, use the power meter (➤ *Power Meter* above). For a quick pass to a nearby teammate, simply tap the relevant button. For a pass that requires more power, hold the button down longer.

To aim your pass, press the D-Button or left analog stick while pressing the pass/lob button. The ball travels in the direction you are pressing when you release the pass/lob button.

BALL SPIN

You can curl your pass, shot, or lob by holding the **L2** button (ball curls to the left) or **R2** button (ball curls the right) while powering up.

EA TIP: Ball spin in open play is especially useful when you want a cross to curl away from a goalkeeper's attempted catch or when trying to place a shot around a keeper and inside the far post.

Add ball spin left	Hold the L2 button (during power-up)
Add ball spin right	Hold the R2 button (during power-up)

KEEPER CONTROL

Keeper charge	Hold the L1 button
Drop the ball	L1 button
Kick the ball (drop kick)	X button or ● button
Throw the ball	■ button

EA TIP: Executing a keeper charge leaves your goal open. Use this cautiously, or you may find the ball in the back of your net.

HEADING

Header on goal	Hold the ● button
Header pass	Hold the X button
Header lob	Hold the ■ button

❖ The earlier you attempt a header the better. Press the D-Button to control the direction of the header.

VOLLEYING

Volley or bicycle kick shot	Double tap the ● button
Volley pass	Double tap the X button
Volley lob	Double tap the ■ button

- ❖ Volleying requires more time and space than heading—remember, a header connects with an airborne ball before a volley but a successful volley has far more power behind it!

SHIELDING

When you let go of the D-Button or left analog stick while in possession of the ball, your player shields the ball from defenders.

EA TIP: When you are in possession of the ball, use this move to protect the ball from an incoming tackler or when you just want to hold the ball up.

ADVANCED CONTROLS

You're already one of the best FIFA players around, but you want to be the most feared player on the pitch. These advanced moves can start you on your way to that goal.

ONE-TOUCH MOVES

A one-touch occurs on a loose ball when you kick it without first trapping it. To execute a one-touch, tap the appropriate button while the ball is loose or being passed.

One-touch pass	✕ button
One-touch lob	■ button
One-touch shot	● button

- ❖ You can power-up one touch shots as you would normal shots (➤ *Aiming the Shot* on p. 8).

THROUGH RUNS

Through runs are forward runs by attacking players in an attempt to lose their marker for long enough to get a shot on goal or set up a goal-scoring opportunity. To execute, the player in possession must lead the breaking runner. A perfect 'through ball' should result in the runner receiving the ball in space without having to break his stride.

Players making through runs are highlighted by a broken line on the pitch showing the path of their intended run and a motion blur. The line should give the player in possession a good idea of where to pass the ball to in order to play it into a runner's path.

- Send a player on a run by facing the ball carrier in his direction until the run indicator appears under his (the runner's) feet, and pressing the **L1** button.

NOTE: When CPU Runs is turned ON (> *AI Options* on p. 13), some players may make a through run automatically, without you pressing the **L1** button.

ONE-TWOS

You can make the player in possession perform a "one-two" (a swift exchange of passing) with a teammate by quickly pressing the right analog stick in the teammate's direction. Your player passes the ball to the teammate, who attempts to return it immediately to the passer (wherever he has moved to on the pitch).

EA TIP: One-twos are ideal when you have a two-on-one situation (two of your attackers up against a single defender).

SKILL MOVES

To activate Skill Moves, tap or press the following buttons:

Stepover	Tap R1 button
Double stepover	Double-tap R1 button
Reverse stepover	Hold sprint (▲ button) and tap R1 button
Stepover and drag	Hold sprint (▲ button) and double-tap R1 button

TEAM MANAGEMENT

You can have the best ball handlers in the world on your team and still get blown out if you don't have good team management. Take control of every aspect of your team's performance on the field and find that magic formula to propel you to the top of your league. The Team Management section lets you make changes to your lineup, formations, strategies, and kick takers, plus conduct transfers to change the makeup of your team entirely. When you're done, you can save your changes or restore the game's default settings.

- Press the ■ button to save all of your Team Management changes.
- Press the ▲ button to return options to their default settings. You are then asked if you want to RESET ALL TEAMS?, RESET ALL TRANSFERS?, or go BACK to make further changes.
- ❖ Changes made from the Team Management screen accessed through the Game Modes screen are applied in all game modes.

- ❖ Any team changes made within a Season, Tournaments or Qualification game are specific to those competitions and are saved automatically when the respective game is saved.
- ❖ Changes made from the Pause menu are reset after a game is finished.

STARTING LINEUP/SUBSTITUTIONS

Before the game begins, you can access the Starting Lineup screen to change your roster as you see fit. During the game, access the Substitutions screen to give a fatigued player a rest and bring in a fresh pair of legs.

To change the starting lineup or substitute players:

1. Select STARTING LINEUP or SUBSTITUTIONS in the Team Management screen.
 2. Press the D-Button to highlight the name of the first player that you wish to swap and press the **X** button.
 3. Highlight the name of the second player you wish to swap (the first name remains highlighted) and press the **X** button. The two players are swapped.
- Highlight a player and press the **▲** button to appoint him as your new Captain.

Along the bottom of the screen, the various player stats are abbreviated in short form:

SKILL KEY

FIT = Fitness

SPD = Speed

SHT = Shot

PSS = Passing

STR = Strength

SKL = Keeper Skill

POS = Keeper Positioning

AGG = Keeper Aggression

HDR = Headers

TKL = Tackling

BC = Ball Control

NOTE: If you are substituting players during a match, you are limited to choosing players from your starting lineup and subs. From the Starting Lineup screen (accessed via Team Management before the start of a match), you can select your initial lineup from a much wider selection of players (including reserves) and move players between the Substitute and Reserves lists.

FORMATIONS

Press the D-Button **↔** to change your current Formation and to adjust the emphasis of your team between defending and attacking. Try a formation geared toward defense when playing a tough offensive team, or go for a strong attack against a team with a weak defense.

STRATEGY

Every team you play is different, so your approach to how you play them should be different as well. Press the D-Button \leftrightarrow to adjust your Attacking and Defensive Styles. If a team seems to have your number, try experimenting with radically different strategies.

KICK TAKERS

Put your best legs in a position to do some serious damage. Set your kick takers for corners, free kicks, and penalties.

To select your kick takers:

1. Highlight the player you wish to assign and press the **X** button.
2. Choose the type of kick that you wish the selected player to take and press the **X** button to insert him into that slot.

NOTE: For penalty kicks, you must assign five different players.

TRANSFERS

Is your lineup getting depleted by injuries? Or maybe your "star" player isn't living up to his billing. Search around the league for the key player to fill that big question mark in your roster and get your team in good position for the playoffs.

To buy a player:

1. Press the D-Button to select a selling team and the player you wish that team to sell. The player's value and statistics appear on the right-hand side of the screen.
2. Scroll through the players at the bottom of the screen to select which player you wish to transfer.
3. Press the **■** button to bring the selected player to your club or the **●** button to return to the Team Management screen.

NOTE: Any team changes made during a Season are specific to that competition and are saved automatically when the respective game is saved.

To sell a player:

1. Press the **▲** button to toggle between the Buying and Selling screens.
2. Press the D-Button \leftrightarrow to select the player you wish to sell. The player's value and statistics appear on the right-hand side of the screen.
3. Press the D-Button to select the team to which you wish to sell your player.
4. Press the **■** button to sell the selected player or the **●** button to return to the Team Management screen.

NOTE: Each team must have a minimum of 16 and a maximum of 32 players.

REWARDS

It's true that success is its own reward, but it isn't the only reward—not in *FIFA Soccer 2002*, anyway. Polish off your opponents in FIFA World Cup Qualification mode (➤ p. 20) and unlock new tournaments that you can access in Tournaments mode (➤ p. 21). The Rewards screen displays your achievements in each of the tournaments. You can also view those competitions you have yet to unlock. Win a tournament to unlock a Panini box cover—which is displayed when the Tournament is highlighted—as well as a new competition.

NOTE: Winning the European Champions' Cup and the EFA Trophy do not unlock Tournaments.

➤ To find out how to unlock a Reward, highlight it and view the ticker at the bottom of the screen.

NOTE: Unavailable Tournaments are displayed as "???".

SAVING AND LOADING

Select LOAD AND SAVE from the Game Modes screen or SAVE GAME from the icon bar in a given game mode to Save, Load or Delete your progress and settings.

NOTE: Never insert or remove a memory card when loading or saving files.

NOTE: You can save up to five competitions on one memory card.

❖ If you exit a game mode without saving, you lose all progress made during that game play session.

To save a Tournament, Season, or World Cup Qualification competition:

1. At the Standings, Knock-Out, Cross-Qualifier, or World Rankings screen, press the ▲ button to access the icon bar.
 2. Highlight the SAVE GAME icon and press the ✕ button. The Load and Save screen appears.
 3. Press the D-Button ↕ to highlight the unsaved game you wish to save and press the ✕ button. The status of your game changes to SAVED.
- If you are overwriting a previously saved game, confirm this at the prompt.
4. Your progress is now saved. Press the ● button to exit.

NOTE: A saved competition has its own database. Any changes made to teams from within a saved game stay specific to that game and do not alter original settings.

To load a saved FIFA Soccer 2002 game:

1. At the Game Modes screen, select LOAD AND SAVE.
 2. Press the D-Button \updownarrow to choose the game data you wish to load and press the \times button.
- \rightarrow Press the D-Button \leftrightarrow toggle between the Save and Load pages.
 - \rightarrow To delete a game, highlight it and press the \blacktriangle button.
 - \rightarrow To load or save options settings, \rightarrow p. 13.
