THE UNFORTUNATE STORY

If you are interested in playing a fun-filled game with cute furry heroes and helpless princesses, you have chosen the wrong game entirely. This game includes a sinister villain, a loud noise, an umbrella, a parked car, three clever orphans and many dangerous situations.

This is the story of the Baudelaire siblings, Violet, Klaus and Sunny. After a mysterious fire destroys their parents, their mansion and their previously happy lives, the children are sent to live with Count Olaf, one of the world's six worst villains and four worst actors. Joined by his troupe of creepy henchmen, Count Olaf will do anything to get his greedy hands on the vast Baudelaire fortune.

Violet, Klaus and Sunny must rely on their unique talents and each other if they are to outwit Olaf and his villainous associates. They'll need Violet's clever inventions, Klaus' bookish intellect and Sunny's four very sharp teeth. While *they* are doomed to battle treachery on every level, *you* are free to do something more pleasant with your time. Wouldn't you rather play something else?

CHARACTERS

Each character needs to use different inventions to complete missions. As you progress through the game, you'll need to use specific characters to complete the levels. Press the  button to switch between Violet and Klaus. Certain missions require Sunny to step in and lend a hand (or a tooth).

THE BAUDELAIRE ORPHANS

VIOLET

Violet, the oldest Baudelaire sibling, is one of the finest 14-year-old inventors in the world. Whenever her hair is tied up with a ribbon to keep it out of her eyes, it means Violet is thinking about pulleys, levers and gears as she works out another complicated device. The orphans often rely on Violet's inventions to save them from imminent danger, sometimes mistakenly.

KLAUS

Klaus Baudelaire, the middle Baudelaire child, has read more books at 12 years of age than most people read in their entire lives. He is highly skilled at solving puzzles and finding and deciphering clues, a phrase which here means “it probably won't make a difference because these children are so unlucky.”

SUNNY

Sunny Baudelaire, an infant, is small enough to crawl into very tight spaces and has four sharp teeth with which she likes to bite things—useful qualities when one is faced with terrible treachery. Because she is so young, Sunny speaks only in a series of unintelligible shrieks, but you probably would too if you were being chased by a man with hooks instead of hands.

VILLAINS AND WELL-MEANING ADULTS

COUNT OLAF

Count Olaf is a terrible villain and worse actor who will stop at nothing to get the enormous Baudelaire fortune. Nothing is a word which here means “certainly not three clever orphans.” He only has one eyebrow, which would normally make him easy to spot, but he often wears disguises as he hatches his sinister plots.

MR. POE

Mr. Poe is a banker and family friend who is responsible for overseeing the Baudelaire family's affairs. He is kind-hearted, an expression which here means “completely unhelpful.”

UNCLE MONTY

Dr. Montgomery Montgomery—or, as the Baudelaire children call him, Uncle Monty—is a world famous snake expert. He is currently planning a trip to Peru with the orphans to research exotic reptiles, but he probably won't make it.

AUNT JOSEPHINE

Aunt Josephine is a widow who is scared of nearly everything, including doorknobs, which just might suddenly explode into a million sharp pieces and injure you. Unfortunately, she isn't very good at detecting the most obvious perils, like the appearance of a terrible villain.

PLAYING THE GAME

During gameplay, you'll need to use each of the three orphans' individual strengths and abilities to progress through the game. You should always be looking for objects that can be used to build Violet's inventions. Once you build the inventions, find creative ways to use them in order to complete missions.

At any time, if you're not sure what you're supposed to do, press the  button to pause the game and select "What now?" to see your current objective. Your heads-up display also provides important information about your current situation.

HEADS-UP DISPLAY (HUD)

Character Portrait—Character portraits are at the top right-hand corner of the screen that shows you which character you're controlling.

Misery Meter—The misery meter is located just under the character portrait. As your character takes damage, the line decreases. If the meter falls to empty, you'll go back to an earlier point and will have to try again.

Timer—The timer is displayed only during timed missions.

Boss Meter—This indicates the amount of the boss' health. It reduces as he takes on damage.

Invention/Collectible Display—The invention or collectible display appears either on the right or left side of the screen when an invention or collectible part is picked up. The display shows the objects you've collected and which objects you still need to find.

Puzzle Pieces—The puzzle piece counter appears just to the left of the character portrait any time one of the orphans picks up a puzzle piece. You can also view the puzzle piece counter in the Pause menu.

IN-GAME PAUSE MENU

To access important information and options during gameplay, press the  button to bring up the Pause menu with the following options:

- **Resume Game**—Return to gameplay.
- **Secret File**—View picture clues you've unlocked to help find secret rooms.
- **What Now?**—Get more information about your current mission.
- **Options**—Change gameplay settings.
- **Quit Game**—Quit to the Main menu.

SECRET FILE MENU

This menu displays picture clues pointing to secret rooms hidden throughout the game. In each secret room, you'll find a VFD package that will unlock new bonus materials in the Main menu.

- **Picture Clues**—Scroll through the unlocked picture clues at the bottom of the screen to bring up a larger version at the top of the screen.
- **Puzzle Pieces**—Along the bottom of the screen, you can view the number of colored puzzle pieces you've collected. Each time you collect 25 puzzle pieces of the same color, a picture clue will be unlocked for you to view here. Use these clues to find secret rooms hidden throughout the game.

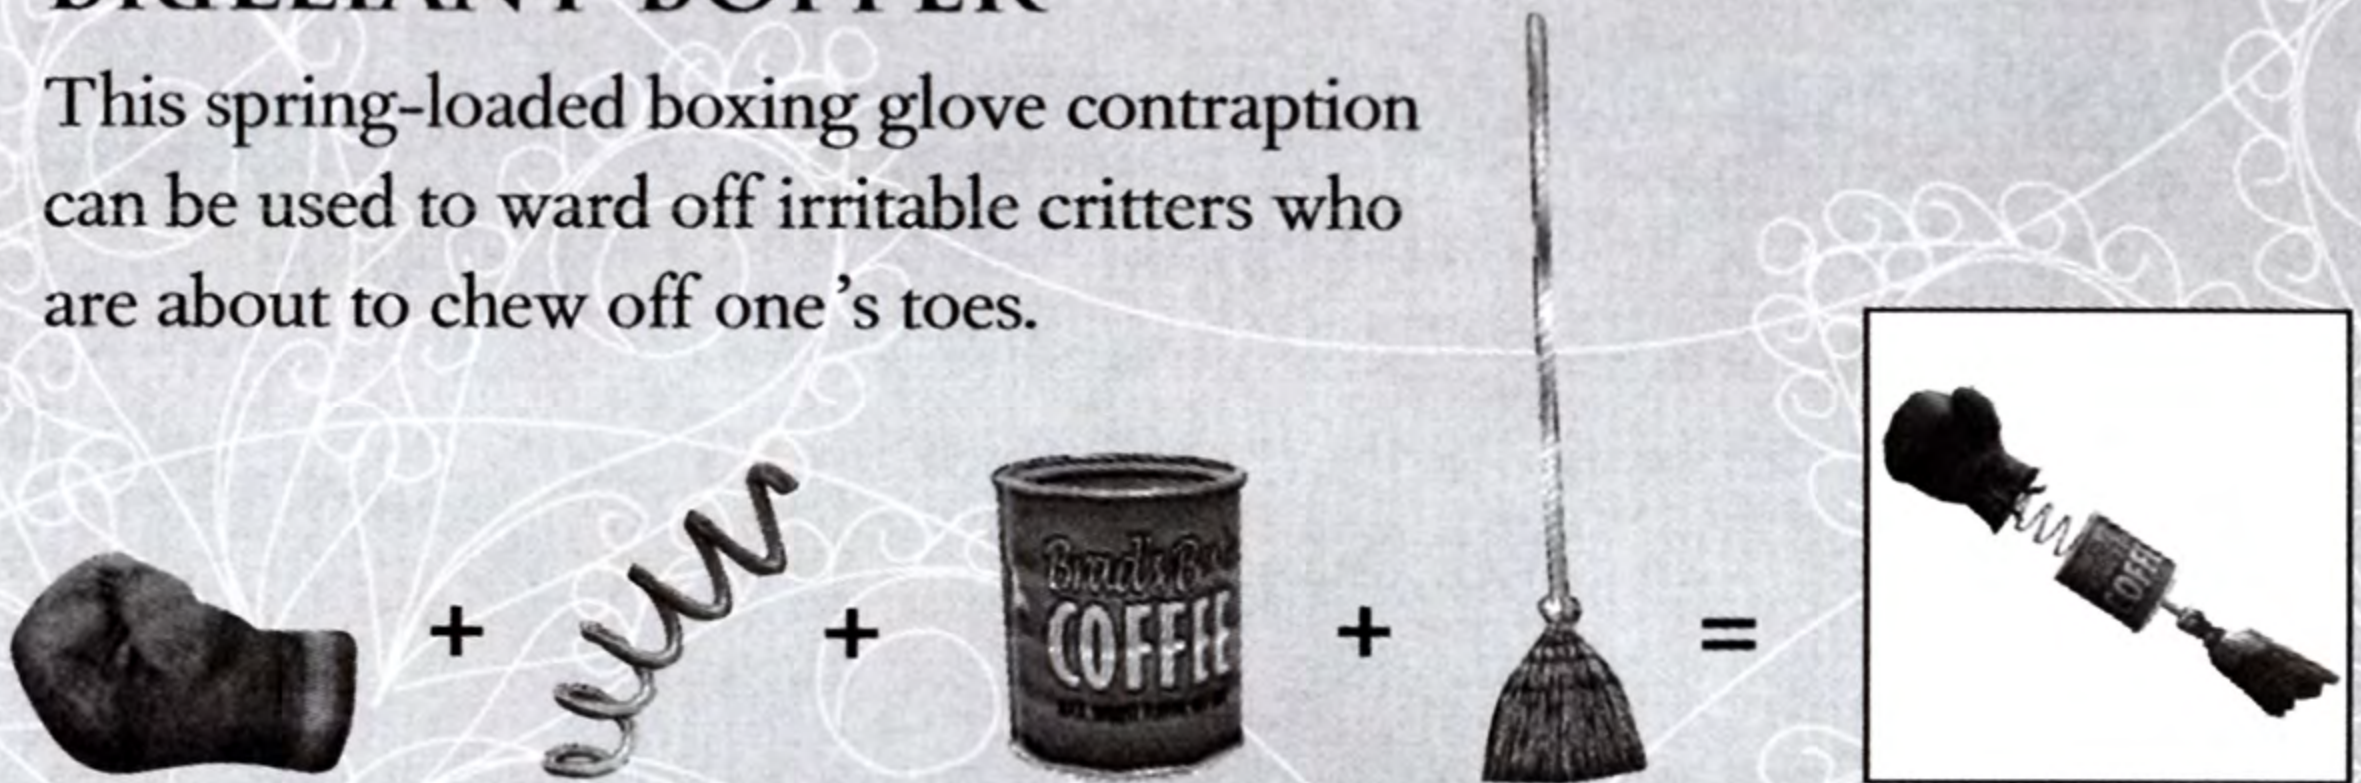

INVENTIONS

Like the Baudelaires' lives, the books and movies based on their lives and the lives of other orphans pursued by villains, this game is filled with terrible situations. On every level, the orphans must be brave, creative and physically dexterous to foil Count Olaf's plans. It is often necessary for Violet to quickly construct an ingenious invention, like one of those listed below, to help solve a difficult problem. It's impossible to know what might become useful for a crucial invention of Violet's, although a boxing glove on the floor is certainly mysterious. For this reason, it is important to look carefully for such parts everywhere you go.

BRILLIANT BOPPER

This spring-loaded boxing glove contraption can be used to ward off irritable critters who are about to chew off one's toes.

FRUIT FLINGER

This fan-powered device can launch rotten fruit an impressive distance—for instance, to splat targets in difficult-to-reach places, or to express horror at Count Olaf's acting.

BABY BOOSTER

With this invention strapped to Sunny's back, she can launch herself over very tall objects, like a huge pile of tissues that have been soaked with tears.

STEADY STILTS

These stilts can be used to reach high places, walk through sludge or appear taller.

OTHER THINGS YOU SHOULD KNOW ABOUT

During their treacherous journey, the Baudelaire orphans encounter many things, most of them unpleasant:

Memories—These gold locket contain pictures of the Baudelaire parents, who perished in a terrible fire. Collecting them can heal an orphan's misery, but only in a video game.

Puzzle Pieces—Collecting these unlocks clues in your Secret File that help you find secret rooms hidden throughout the game. There are five different colors of puzzle pieces. Collecting 25 pieces of one color unlocks a clue in your Secret File.

VFD Packages—These packages are hidden in secret rooms throughout the game. Use the clues found in your secret file in the Pause menu to help locate these secret rooms. Each package unlocks unique bonus photos and content from the movie *Lemony Snicket's A Series of Unfortunate Events*, which is unlikely to make anyone feel better.

Breakable Objects—Like recording devices, coded communications and moldy fruit, Puzzle Pieces and Memories are often hidden inside boxes and pots, which can be broken using the Brilliant Bopper invention.

Moveable Objects—Some crates, stones, pots and other objects can be moved in order to clear new paths or solve puzzles, as if that will do any good.
