INTRODUCTION

Join us in our quest. Face the power of Mordor. And help to turn the tide.

In *The Lord of the Rings, The Third Age* you are in command of a small band of brave heroes who undertake a dangerous adventure that leads you into the midst of the decisive battles of The Third Age of Middle-earth. Your group of warriors grows in experience and ability as you journey from the wilds of Eregion to the great battlefields of Gondor.

CHARACTERS

BERETHOR, CITADEL GUARD OF GONDOR

As a Captain of the Citadel Guard, Berethor fought alongside Boromir during the earlier Battle for Osgiliath. After Boromir departed Gondor Berethor was ordered by the Steward to search for him in the far northlands. Berethor's journey places him upon the path of The Fellowship of the Ring, little knowing what chilling revelations of trust and betrayal await him.

IDRIAL OF LOTHLORIEN

Idrial serves the Lady Galadriel in times of dire need. She encounters Berethor south of Rivendell, where she helps him survive an attack by the Nazgul. She then joins with him in an attempt to return to Lothlorien—through the treacherous paths of Moria—and warn the Elves of the dangers upon the roads to the Grey Havens.

ELEGOST OF THE DUNEDAIN

Like Aragorn, Elegost is a member of the Dunedain, the small band of Rangers whose duty is to defend the lands east of the Shire from enemy incursions. This clever warrior is in search of Hadhod, the Dwarf who is his friend and Traveling companion. Together they will join Berethor's band and move south toward the great war that threatens to engulf Minas Tirith.

HADHOD, CLAN OF FUNDIN

Hadhod's ancestral home is Moria, though his kin have long since been driven from those ancient halls. He returns with Berethor's band in search of fragments of his past, but instead finds chilling secrets that turn his heart to stone and unleash in his small frame a terrible Dwarven rage.

MORWEN OF PENMARK

The Gondorian's group encounters Morwen upon the Plains of Rohan. Her village burned to the ground and her life destroyed, this beautiful warrior's only solace is cold wrath. Joining Berethor's party, she drives them forward toward Helm's Deep in search of the remaining members of her family—and the secret past they share.

EAODEN OF THE RIDDERMARK

Eaoden is the final companion Berethor's party encounters as war drives them toward the sanctuary of Helm's Deep. An Outrider for Rohan's Royal Guard, this deadly rider of the Mark carries with him a secret that will turn Berethor's life inside-out.

PLAYING THE GAME ADVENTURING

A series of Quests directs your travels through Middle-earth. Explore various paths to discover special items, collect Epic Scenes, and battle forces of evil.

The upper right corner of the screen displays a radar map of the surrounding region. The small arrow in the center of the map represents your present location. Glowing icons indicate points of interest that may lead to fulfilling Quests or locating valuable items.

❖ To zoom in and out on the radar map, press the  button.

A blue Palantir appears in the upper left corner of the map to indicate that the party is about to enter a planned battle.

If the Eye of Sauron appears in the upper-left corner of the screen, the party has a chance of entering into a random battle.

Both the Palantir and Eye of Sauron glow brighter as the battle grows closer.

BATTLE SYSTEM

In *The Lord of the Rings, The Third Age*, combat unfolds via a turn-based system. In this system, time intervals or "turns" only pass when you command your characters to take action during the battle. The actions each character takes during combat can dynamically change the sequence of events that occur. Learning how to switch characters and use options wisely can ensure you survive each battle.

Hint text—Gives a description of a highlighted item.

Targeted enemy

Character

Command menu

Battle Queue—Indicates the order of all character turns.

Momentum

Meter™—As you attack and unleash damage your Momentum Meter fills. When it is completely filled, you can unleash a devastating special attack (see *Perfect Mode* on p. 8).

Health—Indicates a character's Hit Point (HP) total. Taking damage depletes your HP.

Action Points—Using skills such as spirit powers depletes your Action Points (AP).

BATTLE QUEUE

The Battle Queue displays the order of all character turns. The character or enemy at the top of the queue is next to complete an action. When a character or enemy's turn is complete, they move down in the queue. The order of the Battle Queue changes depending on the actions of each character and enemy, as different actions have "initiative costs." Many factors change the order of battle for all characters, including their choice of attacks, the effect of spirit powers, and the weapons that they wield.

TIP: To scroll through the Battle Queue to see beyond the next six turns, press the **R2** button.

SWITCHING CHARACTERS

Your party may have up to six members, but only three can actively participate in a battle at one time.

- ❖ A character that is switched into battle can act immediately.
- ❖ Occasionally an ally will join your party as a fourth character in battle. Allies cannot be switched out for other characters.
- ❖ To switch characters in combat, press the **L1** button.

COMMAND MENU

Use the Command menu to perform attacks or actions during a battle.

- ❖ To select an action from the Command menu, press the D-button  to highlight your desired action and press the  button.
- ❖ Press the D-button to select a target for your selected action.
- ❖ Some actions cost Action Points (AP) which are listed alongside the action in the Command menu.
- ❖ To cancel a command selection, press the  button.

TIP: Hint text at the top of the screen provides helpful information during a battle.

The following are some common commands you can use during a battle:

ATTACK	A low damage attack with no AP cost.
ITEM	Immediately use an Item to aid or attack.
CHANGE WEAPON	Change the character's weapon.
SKIP	Skip this turn in the Battle Queue.

PERFECT MODE

The Momentum Meter fills as your characters successfully execute actions in battle. Unleash a powerful attack when the Momentum Meter is full by selecting PERFECT MODE from the Command menu. Perfect Mode attacks are skills which your characters learn by earning skill points.

GAME OVER

If all of your active characters are knocked out during a battle (HP depletes to zero), the game ends even if there are inactive characters still alive.

MENU SYSTEM

The Menu System allows access to your statistics, equipment, items, skills, Quests, Epic Scenes, and game options.

- ❖ To access the Menu System, press the  button or  button while adventuring. To exit the Menu System, press the  button or  button again.
- ❖ To switch characters while in the Menu System, press the **L1** button or the **R1** button.

STATS

EXP (Experience Points)	Points gained from fighting battles and completing Quests.
LEVEL	Earn experience points to "level up" your characters. Higher level characters are always more powerful.
HP (Hit Points)	Indicates your health.
AP (Action Points)	Used to execute certain actions in battle.
ARM (Armor Rating)	Determines how your armor protects you against attacks.

You receive points each time a character gains a new level. These points can be used to improve your character's stats.

STR (Strength) Increases a character's base damage with both ranged and melee weapons.

SPRT (Spirit) Increases a character's max AP along with an increase in base spirit power damage.

CONST (Constitution) Greatly increases a character's max HP and increases defense against spirit power attacks.

SPD (Speed) Increases initiative, melee and ranged defense, and decreases time between attacks.

DEX (Dexterity) Increases the chance of successfully striking an enemy with both melee and ranged weapons.

EQUIP

Equip your characters with the weapons and armor that you acquire during gameplay.

❖ If weapons or armor are equipped, they are displayed in the main Equip window. If no item is displayed, the words "None equipped" appear.

NEW EQUIPMENT Review and equip newly-acquired items.

TIP: Press the  button to view details on an item or weapon.

ELFSTONES These rare artifacts offer a wide variety of help such as allowing you to learn new crafting abilities, boosting your armor rating, or increasing your HP. Some Elfstones can even unlock entirely new skill trees (Light Crafting, Shadow Crafting, and Item Crafting). Each character may equip up to four Elfstones at a time. Unlike other equipment, Elfstones are shared and can be equipped by any character.

USE ITEM

All of your party's consumable items are inventoried on this menu. All items can be used in battle and many can be used outside of battle by selecting them through this menu.

TIP: Using items while adventuring is especially helpful in restoring HP and AP after a battle.

SKILLS

Learn new skills to expand the number of actions that your characters can perform in battle.

❖ Each character has a unique set of skills he or she can learn.

❖ Successfully using a skill in battle earns skill points that are automatically applied to learning the next skill in the same category.

- 
- ❖ Use the Skill menu to select the skill in each category that you would like to learn next.
 - ❖ Unlock more advanced skills by first learning the more basic skills that precede them in the skill trees. Once a new Skill has been learned, it is immediately available for use in battle.
 - ❖ Skill points are never lost or wasted. They are always applied to the next available skill even if you have not manually selected one.
 - ❖ Skill points for Perfect Mode and passive skills are earned after you gain an experience level.

QUESTS

A list of unlocked Quests can be viewed in the Quests menu. Read descriptions and find out if they are completed or outstanding.

- ❖ Completing Quests awards experience points (EXP) to your currently-selected adventuring character.

EPIC SCENES OF MIDDLE-EARTH

Gandalf speaks to you of events in Middle-earth. Key information is often revealed through these Epic Scenes.

- ❖ To access an Epic Scene, select an orb and press the **X** button.
- ❖ New orbs are unlocked as you find them throughout your journey.

TIP: Press the D-button **↓** to jump five orbs at a time.

OPTIONS

Use these controls to adjust sound, enable or disable subtitles and the on-screen radar, toggle the pitch and rotation of the camera, change the difficulty setting of the game, or quit the game.
