PLAYING THE GAME

Calling A Play

Once a team has received the ball, the play selection screen will appear where you will make your offensive and defensive calls for each down. You can also check the time on the play clock, time remaining in the quarter, your timeouts remaining, your field position, your down status, and yards-to-go.

To select an offensive or defensive play:

- Press ← / → to cycle through the available formations.
- Press □, × or ● to select a formation and bring up the play selections. To return to the formation selection, press ↑ or ▲ from the play selection.
- Once the formation is set, select the play. To flip the play and run a mirror image of that play, press **R1**. To return to the original play, press **R1** again.

Use the no-huddle offense when your team needs to score quickly or as a way to catch the defense off guard. When time is a factor and your team is moving the ball, after the whistle blows to end a play, use the no-huddle offense to hurry to the line of scrimmage and run the same play again.

To run the no-huddle offense:

- Press L3 + R3 (press analog sticks down like buttons) when play ends.

NCAA GAMEBREAKER 2003

HOT ROUTES

A Hot Route is an audible called by the QB at the line of scrimmage before the snap. It enables you to change any and all of your receiver's routes associated with the play that was called in the huddle.

To create new hot routes:

- Press **L1** to move back the camera and view all of your receivers.
- Press **↓** to highlight a receiver for a route change. His icon will now be spinning above him.
- Press **L2** + **←** / **→** / **↑** / **↓** to choose a new route for that receiver. Pressing **↑** results in a fly pattern, **↓** results in a curl pattern, **←** or **→** results in an arrow route or a slant over the middle, depending on whether the receiver is lined up on the left or right side of the quarterback.
- Press **L1** when done to return to the play or press **⊗** to snap the ball.

VIEW PASSING ICONS

You can view the passing icons of your receivers before the play starts. When you choose a play from the play calling screen, GameBreakers will appear in yellow.

- Before the snap, press **L1** to draw back the camera and view the passing icons associated with each receiver.

QUARTERBACK PITCH

The key to the option play is for the quarterback to hang onto the ball as long as possible to draw in the defensive pursuit. Whether the defender commits to going after the quarterback or covering the running back determines what the quarterback does with the ball. If the defender makes his move toward the quarterback, pitch the ball to the running back by pressing **L1** or **R1**.

On Defense

DEFENSIVE PACKAGES

On defense, choosing the right defensive package will help shut down any high-powered offense.

COACHING CAREER

Coaching Career enables you to perform the duties of a head coach. From among the NCAA's Division I-A teams, you'll be able to select an available job from a smaller school to help build their football program. After selecting a job, and playing out a Season, your coaching will be evaluated and you may become a candidate for a coaching promotion or a better job offer from a more prestigious program. This will depend on the success of your team and the specific area of your coaching expertise. It is also possible that your team will perform poorly and your school may decide to let you go.

You will only be able to start recruiting players when you have finished coaching a full Season. Recruiting players will be dependent upon the coaching position you hold. For example, if you are a defensive coach or coordinator, you will be recruiting defensive linemen, linebackers, and defensive backs.

When beginning recruiting at the start of a Season, be sure to check the positions your team needs to fill by evaluating the list of graduating seniors from the Graduating Seniors screen. Also, from the Convert Player screen, you can press **□** to view your team's current needs.

From the list of new job offers:

- Press **← / →** to choose a coaching position.
- Press **↑ / ↓** to select the school name option, and then press **← / →** to select a school.
- Press **X** to accept the job offer and continue to the Career Menu where you can view team rosters or edit your team's schedule.
- Press **↑ / ↓** to the Play Next Game menu item, and then press **X** to continue to the Weekly Season screen.

NCAA GAMEBREAKER 2003

- Press **X** to play the next game on your schedule and continue to the Choose Sides screen.
- Press **← / →** to choose a team, and then press **X** to play the game.

NOTE: From the Career Menu during your Coaching Career, select Career Progress to keep track of your coaching statistics.

Convert Players

After your first year of coaching, you have the opportunity to look over your team's roster and convert any player to a new position. By evaluating your team's player position needs, create more flexibility in your recruiting efforts by having some of your current players switch positions. For example, a third string quarterback is usually big and agile enough to grow into the safety position.

- Press **□** to view your team's position needs.
- Press **X** to exit the popup box.

If you want to convert a player(s):

- Press **↑ / ↓** to select a player on the roster.
- Press **○** to cycle through the available positions on your team.
- Press **X** to continue.
