DUALSHOCK[®]2 ANALOG CONTROLLER CONFIGURATIONS

QUICK GAME & EXHIBITION

Quick Game lets you jump right into a game between the teams of your choice while Exhibition allows for deeper customization. Both modes have access to strategy changes and lineup matchups.

In Quick Game, you do not have the option to have a fantasy draft, uniform select, created or classic teams, or arena select. You may only play as the original 30 NHL teams- all you need to do is select the 2 teams and press the **START** button.

In Exhibition after you have chosen the 2 teams you select your uniforms, player lineup, and arena before starting the game.

Team Select

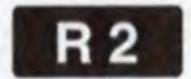

- Move the right analog stick up or down to select a User Profile, or to highlight No Profile, New Profile, or Load Profile.
- To play the game without a User Profile, select No Profile and press the **X** button or the **START** button.
- To create a User Profile, highlight New Profile and press the **X** button or the **START** button. Enter a name on the Virtual Keyboard and press the **START** button.
- To load a User Profile on the Load screen, highlight Load Profile and press the **X** button or the **START** button.
- Press the **L1** button or the **R1** button to change the team.
- Press the **○** button to change the team to a random team. (You can press the **○** button with your controller icon in the center of the screen to randomly change both the Home and the Away Team).
- Press **R2** to access Select Play Style overlay.
- Press the **L2** button to access the Line matchup screen.
- Press the **□** button to view the Help Menu.
- Press the **X** button or the **START** button (with one of your profiles or No Profile selected) to confirm your team.
- Once you've confirmed your team, press the **L1** button or the **R1** button to select the uniform you want your team to wear (some of the uniforms must be unlocked first).
- Once you've found the appropriate uniform, press the **X** button or the **START** button (with one of your profiles or No Profile selected) to advance to the Player Lineup screen.
- At any point, if you want to back up to the previous step, press the **△** button.

Load Profile

(To access, highlight Load Profile w/ right analog stick and press the  button)

If you have a memory card (PS2) with a User Profile saved on it, and it wasn't inserted when you loaded the game, you can access the User Profile by selecting Load Profile on the Select Team screen. Highlight the User Profile that you wish to load and press the  button. You will return to the Team Select screen and the User Profile will now be available to you.

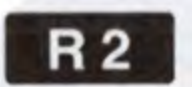

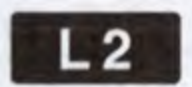

Play Style

(Access by pressing  on the Team Select screen)

If you prefer a certain team's play style and you would like to adapt it to any other NHL team, bring up the Play Style overlay and move the left analog stick UP and DOWN to highlight the desired team's play style.

A custom play style can be created by selecting Customize from the Play style list. This will take you to the Play Styles Screen.

To use the Play Styles Screen

- Press the  or  buttons to switch between Basic and Advanced. (Advanced allows you to set your play style line by line).
- In Advanced, press  or  to change the line (First Line, Second Line, Checking Line, Fourth Line, Five Man Power Play 1, Five Man Power Play 2, Four Man Power Play 1, Four Man Power Play 2, Four Man Penalty Kill 1, Four Man Penalty Kill 2, Three Man Penalty Kill 1, and Three Man Penalty Kill 2).
- Press  to confirm highlighted menu item.
- Once a menu item is selected, move the left analog stick Up and Down to select the desired Playboard. Then, move the left analog stick Left and Right to adjust the slider for that Playboard. Remember, the total value between Playboards will always remain the same; therefore, you must decrease the slider on one Playboard in order to increase another.
- Press **START** to save your changes and exit to the Team Select screen.
- Press  to cancel your changes and return to the Team Select screen.

The following is an explanation of each Play Style setting:

Roughness: Determines how aggressively your players play. Set it high, and players will check more on defense, and crash the net more on offense. However, they may incur more penalties or over-commit and get burned on defense. Set it low, and players will play more conservatively.

Dump/Chase: Determines whether or not the AI will “dump” the puck (hit it towards the opponent’s goal and recover it) or skate and pass the puck down the ice.

Offense: Offense in the Offensive Zone

- **Triangular:** This intermediate system concentrates on maintaining possession of the puck. The Forwards form a triangular formation and cycle the puck between them. The objective is to create a 3-on-2 or 2-on-1 situation.
- **Positional:** This basic, conservative system has two Forwards attack the net while one Forward and the Defensemen think defensively in case the puck changes possession.
- **Overload:** This basic system has the Forwards crowd the area of the net. The Defensemen shoot the puck and the Forwards try to get in position to score off of tip-ins, deflections, and rebounds.

Defense: Defense in the Defensive Zone

- **1-2-2:** In this play, the Center aggressively checks in the zone, while the 2 Defensemen and 2 Wings play back in a more defensive stance.
- **Zone:** This conservative system assigns each player an area of the ice.
- **Box + 1:** This play is designed to completely try and shut down the slot. However, this leaves the opposing team freedom to move around the rest of the zone.

Backcheck: Defense in the Neutral Zone

- **2-1-2:** This aggressive system commits both Wings to apply pressure to the puck. The Defensemen and the Center have to cover more area to make up for them.
- **1-2-2:** This conservative system calls for the Center to forecheck aggressively to drive the play to the Wings on the outside. The Defensemen hang back at the blue line.

- 1-1-3: This defense combines conservatism with aggressiveness. The attack comes from the Center and the puck-side Wing. The off-side Wing hangs back and shuts down the outside lane. This gives the puck-side Defenseman the freedom to be more aggressive.

Forecheck: Defense in the Offensive Zone

- 2-1-2: This extremely aggressive defense calls for constant pressure on the puck by two of the Forwards.
- 1-4: This conservative defense has the Wings and the Defensemen form a wall across the blue line while the Center pressures the puck. This defense essentially gives up the offensive zone.
- 1-1-3: This defense combines conservatism with aggressiveness. The attack comes from the Center and the puck-side Wing. The off-side Wing plays back in position to backcheck and defend against 3-on-2 breakouts. The Defensemen play normal positions.

Breakout: Offense in the Defensive Zone

- Free Flowing: This flexible system relies on good skating and skilled passing. Since it relies on flooding certain areas with skaters, it is more vulnerable should a turnover occur.
- Board: This is a conservative system that is best suited to teams with big strong Wings who dominate the battle for the puck on the boards.
- Positional: This is a conservative system with a balanced approach that uses all of the players and emphasizes high-percentage passes.

Moveout: Offense in the Neutral Zone

- Regroup: This advanced system allows the Forwards free movement to attack openings. Advanced skating, passing, and stick-handling are crucial for this system to be successful.
- Positional: This basic, conservative system stresses filling the lanes and making high-percentage passes. It is especially useful for teams with size and/or poor skating ability.
- Crisscross: This intermediate system is similar to the Positional system, but allows two Forwards to move laterally to flood specific areas, while the other Wing acts as a safety valve with defensive responsibility in case the puck is turned over.

Penalty Kill (Basic only): Defense when you're down a man

- **Box:** This conservative system denies possession of the puck in front of the net or the slot area. This system requires physical players.
- **Diamond:** This intermediate system denies the offense the area in front of the net while putting pressure on the puck.
- **Triangular:** This aggressive system keeps three defenders in front of the net and a fourth player rotates out to challenge the player in possession of the puck.

Powerplay (Basic only)

- **Funnel:** This conservative system has the Defensemen shoot the puck and the forwards in position to tip-in deflections and rebounds. This system is beneficial for teams with big players who have a knack for scoring from close range.
- **Wings Offside:** The Wings are the primary scorers in this system, which seeks to set up the play on the strong side and pass to the weak-side Wing.
- **2-2-1:** This system is comprised of two sets of Forwards and one Defenseman. The Defenseman is generally open for a shot on the net, though a pass to any of the Forwards for a closer shot is generally preferable.

Coach's Tip – Deking

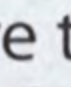

With Classic Controls, when you're in position to score, you can use the  button to deke the goalie. Press and hold the  button to enter Deke Mode, move the **left analog stick** to perform various dekes, and release the  button to shoot the puck.

Note: Intermediate and Advanced Controls (listed below) have their own controls for deking. In Intermediate, you press and hold the **L1** button and press the  button to deke. In Advanced, you press and hold the **L1** button and press the  button to deke. These control setups allow you to manually control whether you dump the puck or deke.

Coach's Tip – The Wrap Around

The entire rink is fair game in NHL hockey, including the area behind the net. You can attempt to skate behind the net and execute a lightning-quick sweep of the puck into the goal, all the while using the net itself to protect the puck. To execute a wrap-around shot, while behind the net, move your player to either side of the net and attempt to shoot the puck. You will automatically attempt a wrap around.

Coach's Tip – One-Timer

A one-timer is when an offensive player catches and shoots the puck in one quick motion. The speed of the one-timer can deny the goalie enough time to react, making it easier to score a goal. To perform a one-timer when passing to a computer-controlled player, press the  button to pass and immediately press the  button, before the other player receives the puck. During multiplayer games, to perform a one-timer when another player passes you the puck, press the  button before the puck reaches you.

Coach's Tip – Intense Contact

On-ice aggression is taken to a new level this year to help keep opponents at bay. When close to an opposing skate, move the **right analog stick** towards his position relative to your skater's position. Depending on the player, angle, and distance, your player will attempt to spear, hook, trip, or elbow him. While playing dirty can get you an advantage, it increases tension and there is always the chance the referee sends you in the penalty box for a 2 minute minor.

Coach's Tip – Total Control Dekes

Perform 7 special moves with the **right analog stick**. Moving the **right analog stick** in a given direction to perform the desired action.

Up to Up-Right = Short deke right

Up to Up-Left = Short deke left

Up-Right to Right = Long deke right (for players with high puck-handling rating)

Up-Left to Left = Long deke left (for players with high puck-handling rating)

Right to Down-Right = Side-step right (does not let go of the puck)

Left to Down-Left = Side-step left (does not let go of the puck)

Down-Right to Down-Left = Full stop (does not let go of the puck)

Note: Hold the **L1** button and press Up on **right analog stick** for flip deke.

Note: Think of 'Up' as pressing directly up on the **right analog stick**, and 'Right' as pressing directly right on the **right analog stick**. A combination of these two, ie 'Up-Right', would be pressing at perfect 45 degree angle in-between 'Up' and 'Right'.

Learn the button commands for each situation or customize them to your liking.

- Press the **R2** button or the **L2** button to cycle through the command scenarios.
- Press the **L1** button or the **R1** button to view the controls as modified by the **L1** button or the **R1** button.
- To customize the **X**, **O**, **□**, and **△** button controls, press the **O** button to initiate Button Swap Mode.
- To select a button whose function you wish to reassign, press **O**, then press that button. The button's function will appear highlighted in yellow. Press the other button whose functionality you wish to swap with the first button. The buttons will swap.

Pull Goalie / Replace Goalie

If you have the puck late in the game, and you're losing, it may make sense for you to press your goalie and replace him with a skater to increase your chances of scoring. Just keep in mind that, if the other team gets the puck, your goal will be vulnerable.

Team Strategy

Strategies

This screen is the same as the Strategy screen. (See Quick Game)

Edit Lines

Use this screen to control which of your players play in which lines.

- Press the **R2** button or the **L2** button to cycle through the following categories: Offense, Defense / Goalies, Power Play, Penalty Kill, and Extra/Shootout.
- Press **○** to switch between the full roster and similar lines.
- While viewing an active line, highlight a player in that line and press **⊗** to select the player. Then, highlight another player off the bench and press **⊗** to swap him with the previously selected player.

Chemistry

When editing lines, notice the Chemistry bar for any particular line. The Chemistry for a line is effected by how often those individual players practice and play with each other. The more a line practices and plays with together, the more comfortable they get with each other's play style. Because of this, they are able to play as a more cohesive unit and each player in that line will play better. If one of players in a line is subbed out for another player, keep in mind that the move will affect the chemistry of that line.

Matchups

This screen is the same as the Line matchup screen. (See Quick Game)

Call Timeout

Call timeout if you want to give your players a quick rest. You can only call a timeout during a break in play (for example, before a face-off).

Challenge Mode

This screen shows what user challenges you've accomplished.

- Press the **L1** button or the **R1** button to cycle through the following lists: Level One, Level Two, Level Three, and Skills.
- Completed challenges appear with a red check mark.

Note: The Skills Challenges are accessed in Game Modes – Skills – Challenge Mode.

Online Desk

See the Online section for more details on Online Desk. Several other game modes (like Battle Mode and Dream Team) allow you to access Players / Friends, 2K Sports Messaging, and Online Options, but their functionality is all the same.

- Game Type: Exhibition, Battle Mode, Skills, and Mini-Rink - Pick the game type you wish to play.

- Offside: TAG-UP, (default) Regular, and OFF – Turning this option OFF, and players will be able to cross the offensive blue line before the puck crosses it. TAG-UP is the current standard NHL offside ruling where as Regular is the older offside rule.
- Two Line Passing: On (Default) or Off - In the NHL, a Two-Line Pass infraction is called when a player passes to a teammate across both the red line and a blue line. It carries the same penalty as Offside: the two teams face-off at the location of the infraction. Turn this option OFF, and players will be permitted to make passes that cross both the red line and either blue line.
- Icing: NHL (Default) International, Auto or Off - In NHL rules, an Icing infraction is called when a player behind the red line in his end of the rink shoots a puck past the goal line in his offensive zone when both teams are playing at equal strength or the offending team is on a power play, and a player on the opposing team touches the puck first. The teams then face-off at the face-off circle closest to where the play occurred. Turn this option OFF, and teams will not be whistled for icing.
- Game Speed: Use this slider to adjust the game's speed.
- Penalties: On (Default) or Off - Turn ON or OFF all penalties in the game.
- AI Sliders: On or Off (Default) - Adjust the CPU's playing skill.
- Camera: 3/4 Camera (Default), 3/4 Non-Predictive Camera, Overhead Camera, Rink Camera, Side Camera, or Rink Action Camera - 3/4 CAMERA: This is the default diagonal camera view of the action. It also tries to stay ahead of the action to allow you to see what's going on

around you better. **3/4 NON-PREDICTIVE CAMERA:** This camera is similar to the regular 3/4, but is a bit more zoomed out from the action and always stays centered on the puck. **OVERHEAD CAMERA:** This is a top-down view from directly above the puck. **RINK CAMERA:** This is a close-up view of the action from a 3/4 angle. **SIDE CAMERA:** This is a side angle camera, similar to TV broadcast. **RINK ACTION CAMERA:** This camera angle brings you the very closest to the players and the ice.

- **Camera Zoom:** Use the slider to adjust the camera distance.
- **Sequence Type:** (Battle Mode only) Winner Pick (default) Random. Decides if the winner gets to select the party game type or if the game type is random.
- **Game Count:** (Battle Mode only) The amount of Battle Mode games per session. 1-18.

Note: If you frequently experience difficulty joining a NHL® 2K6 online game and are using an Internet sharing device (e.g. broadband router or firewall) you may need to enable Port Forwarding (sometimes called Virtual Server) on the device. Please refer to the manual that came with your Internet sharing device for specific setup instructions. You will need to forward UDP port 3658 to the IP address assigned to your PlayStation®2 console. This may require changing Your Network Configuration file from an "Auto" IP address (DHCP) to a "Manual" IP address. NHL® 2K6 includes a Network Configuration GUI for setting up and modifying these files. If you continue to experience difficulty joining online games, try bypassing your Internet sharing device by connecting your PlayStation®2 console directly to your DSL, modem, or cable modem. In this case, you may need to create a new Your Network Configuration file before your PlayStation®2 console will connect to the Internet.

2K Games Videogames reserves the right to discontinue online service for this title with 30 days notice.

This game is presented in Dolby Pro Logic II. Connect your game console to a sound system with Dolby Pro Logic, Dolby Pro Logic II, or Dolby Pro Logic IIx decoding to experience the excitement of surround sound. You may also need to select "Dolby Pro Logic II" from the audio options menu of the game.
