Heavy Attacks

Heavy attacks are performed by pressing the **□** button and take longer to perform than a light attack but deal more damage.

Block

By holding the **R1** button the character's sword will block most attacks, including ranged attacks, preventing damage. However, block is not effective against some heavy attacks such as those used by bosses.

PIRATES *of the* CARIBBEAN

Dodge

While holding down the block button, moving the **Left analog stick** will allow you to quickly roll left, right, leap forward, or leap back to evade enemy attacks.

Combos

To deal devastating attacks on enemies combos can be performed by chaining together attacks. Some of these combos are unlocked by progressing through the game. Others are available at the start of the game.

X + □ = Jumping Overhead Slice

X + X + □ = Lunge

□ + X = Vault Kick

Saber-Lock

Pressing the **O button** will initiate a Saber-Lock on an enemy – once the character is locked you will have one second to initiate either of the following Saber-Lock moves:

Pressing the **X button** will initiate the Shoulder Throw.

Pressing the **□ button** will initiate the Critical Strike.

NOTE: Bosses and some larger enemies are not susceptible to the Saber-Lock.

Special Abilities

Jack

Grog Bombs

Jack employs Grog-bombs – fiery jars filled with flammable grog. Grog-bombs explode when thrown and, despite their limited range, are very useful against multiple enemies.

Grog-bombs can be thrown with the **Δ button** once this attack is unlocked.

Flame Cutlass

By dousing his sword in flammable grog and striking it on the ground to set it alight, Jack turns his sword into one of the most formidable weapons in the game. It can be used with light attacks to deal extra damage or in a single-use special attack that does massive area effect damage to all nearby enemies.

To use this move, you must have the maximum grog item in your inventory. To set the sword alight, press the **R2 button**.

Will and Elizabeth

Hatchet Attack

Will and Elizabeth both use hatchets and are quite adept at throwing these at long range. Hatchets can be thrown with the **Δ button** once this attack is unlocked. (This also works the same with fish you may find.)

THE LEGEND OF JACK SPARROW

Blade Barrage

A special attack only, this does massive area effect damage to all nearby enemies and can be initiated with the **R2 button**.

Item Dispensers

These handy dispensers hold the items needed for Jack, Will and Elizabeth's special abilities. Item dispensers are unlimited use, so you can always return to retrieve more. There are two types:

Kegs o' Grog – used to replenish Jack's Grog-bombs.

Hatchet/Fish Barrel – used to replenish either Will or Elizabeth's hatchets (or fish).

To use an item dispenser approach it and press the **O button**.

Interactive Objects

There are many types of interactive objects within the levels of *Pirates of the Caribbean: The Legend of Jack Sparrow*.

Thrown objects

Many items can be picked up and thrown – these can be useful in battle and often have treasure inside to boot! Press the **O button** to pick up or drop an object, and use either the **X button** or the **□ button** to throw it.

Placed objects

Explosive crates cannot be thrown. These items are picked up but must be set into position to be used. Use Jack's grog-bombs to set these off.

Interactive levers

There are levers that activate trap doors or re-route mine carts scattered throughout the game. To activate simply strike these with a light or heavy attack.

Destructible objects

There are a number of destructible items in the world – ropes, crates, barrels, doors, beams, posts, and more. Some of these items will have treasure inside!

X Marks the Spot

Treasure Chests

There are treasure chests that can be found on nearly every level. Ordinary chests yield fabulous treasure. Chests with green jewels embedded in their tops contain health pickups.

PIRATES *of the* CARIBBEAN

Hidden Treasure

There is hidden treasure throughout every level of the game. Sometimes it is hidden behind wooden doors or barricades.

Along with hidden treasure there are also map pieces that unlock content on the location map and upgraded swords that do more damage.

Skull Spots

When approaching an item where a specialized action can be performed you'll be prompted with a skull-shaped icon. Position the selected character within the icon and press the **O button** to activate. You may need to win a mini-game to complete the action.

Mini-games *Struggle*

This is a test of your skill with the controller. Move the **Left analog stick** in the direction indicated to win the struggle puzzle.

Agility

Match the button prompts displayed to complete these sequences.

Strength

Show what you're made of – rapidly press the **X button** to power through these sequences.

Concentration

Press and hold the **X button** patiently to complete these sequences.

Cannons

At several points throughout the game, you will have the opportunity to use additional firepower in the form of cannons. When you find a cannon, press the **O button** to activate it. Then aim the cannon with the **Left analog stick** and press the **X button** to fire. Press the **O button** to discontinue using the cannon.
