## THE DEFENDER OF THE CROWN LEGACY

Dear Fan,

*"It is a time of legends. A time for heroes.  
A time of bitter strife, when great men rise  
above their peers to perform great deeds.  
A chapter of history in the making."*

It was with these great words in 1986 that Defender of the Crown originally introduced millions of gamers around the world to its unique combination of gameplay, graphics and story elements, marking the first of many successful Cinemaware titles to come.

After 17 years, we are proud to present a new incarnation of Defender of the Crown, featuring the famous exploits of Robin Hood (who appeared as a supporting character in the original title). We have strived to make a title that is fun, accessible and enjoyable to all ages and genders, in the true spirit of the original classic.

# AN OUTLAW TO THE RESCUE!

**IN ENGLAND, IT IS  
A TIME OF GREAT UNREST!**

With King Richard the Lionheart held for ransom, the evil Prince John seizes the throne and declares himself the King of England. The entire nation soon falls into civil war as greedy nobles war amongst themselves and Prince John sends forth armies to shackle the country under his unjust rule.

In this time of lawlessness, only an outlaw can lead the people to freedom. One man, the embodiment of true honor, vows to save the people and restore peace to the land.

This man is Robin Hood.

From small-scale skirmishes with the Sheriff of Nottingham in Sherwood Forest, Robin finds himself drawn into the larger battlefields of England. The hero of the poor must become the savior of an entire nation!

With the support of Maid Marian, Friar Tuck, Little John, and his band of Merry Men, Robin must use his mastery of archery, swordsmanship, jousting, siege warfare and combat strategy to lead the people of England to victory.

Along the way, his resolve and skills will be tested against such villains as the Sheriff of Nottingham, the mysterious and deadly Guy of Gisbourne, and Prince John himself!

# OFF YOU GO!

## SHERWOOD FOREST

The game begins as the Sheriff of Nottingham vows to rid Sherwood of its famous outlaw. With the help of a wealthy merchant, the Sheriff assembles a small army to finish Robin Hood once and for all!

To win, you must:

- + RAID the Sheriff's stronghold and caravans for gold.
- + RECRUIT men to fight.
- + ATTACK the Sheriff's army.
- + Finally, to secure Sherwood, you must defeat the Sheriff by attacking his stronghold and destroying his army.

## RAIDING

Robin needs gold to recruit forces for his band of outlaws. To acquire enough gold, Robin must raid enemy caravans and strongholds. Select RAID ENEMY from Robin's Action Menu. Then select a territory to raid.

- + If the territory contains an enemy stronghold, Robin will undertake a Swordfighting Raid (see page 7).
- + If the territory contains an enemy caravan, Robin will undertake an Archery Raid (see page 9).
- + If the territory contains neither, is not controlled by an enemy, or is controlled by Robin, that territory will not be selectable as a raid target.

## ENEMY STRONGHOLDS

Most lords are proficient in the science of swordplay and train their stronghold guards well. When raiding an enemy stronghold, you'll have the entire garrison at your throat if you tarry long in pursuit of

your goal. What is worth defending is usually defended well!

- ✦ Successfully avoiding an enemy attack will stun the enemy, leaving him open for attack.
- ✦ Take heed, however, for if the enemy blocks your lunge, you will be vulnerable to attack!
- ✦ Keep an eye on your health bar — if you receive too many blows, you'll be captured!

## SWORDFIGHTING CONTROLS

left analog stick	Advance, step back, crouch, jump

## **AVOIDING CAPTURE**

The price on your head is high and defeat will mean rotting in the dungeon. Should you find that you've come ill-prepared to defeat all opposition, it is best to retreat with your hide intact. To retreat, press the  button and select **RETREAT** from the Options Menu.

However, should you wake up bloody, bruised and shackled, you'll have two options: attempt an escape or bribe the guards. If you want to see the sun rise on England again, you'd better choose wisely.

While you idle away the time in an enemy lord's prison, your enemies continue their goal of putting a new King on the throne of England! Don't dawdle too long, or you'll lose precious opportunities!

# ARCHERY RAIDS

9

## ENEMY CARAVANS

Transporting equipment, troops and gold isn't easy in these lawless times, especially when Robin and his men have an interest in the cargo.

Enemy lords are not fond of losing their monthly income, so if you decide to raid an enemy caravan, be ready to fight. The nobles' finest bowmen often accompany transport caravans to ensure a safe and timely delivery.

- + Shoot footmen carrying saddlebags to capture a goodly sum of gold.
- + Shoot wagon drivers to capture a king's ransom!
- + Be sure to look — and listen — for incoming arrows. Accurate arrows glint in the light and make a whistling sound.

# RECRUITING

Once Little John joins Robin, you gain the ability to attack the Sheriff's troops. Start recruiting troops by selecting **RECRUIT FORCES** from Little John's Action Menu.

When recruiting:

- ✦ First, select a territory that you control, where you'll place your newly recruited troops.
- ✦ Next, decide whether to place those troops in a **COUNTY GARRISON** or in the **CAMPAIGN ARMY**. County Garrisons are stationary defenders used to protect territories from an enemy invasion. The Campaign Army can be moved to attack neighboring areas.
- ✦ Next, select the troop type (directional buttons/left analog stick  $\uparrow/\downarrow$ ) and number of troops to recruit ( $\leftarrow/\rightarrow$ ). Press the  $\times$  button to finalize the selection.

Robin can only recruit as many men as he can afford with the amount of gold he's acquired — check your treasure chest often to see how much gold your coffers hold!

Spend your gold wisely — a well-balanced army is vital to your success in battle!

## **ATTACKING**

Use your Campaign Army to seize new territories in Sherwood. Each additional area you control adds to your income at the beginning of your next turn.

To attack, first select **ATTACK COUNTY** from Little John's Action Menu. Next select an area to attack. You can only select areas adjacent to areas you already control (colored green).

- + When attacking an unclaimed area (non-colored), your Campaign Army moves in and claims it without bloodshed.
- + When attacking an area controlled by the Sheriff (colored purple), your army enters into battle with the Sheriff's army.
- + The winner takes control of the contested area.

## **DEFEATING THE SHERIFF**

Robin must defeat the Sheriff before the enemy overruns the outlaw encampment. To accomplish this, attack and defeat the Sheriff's army at its base of operations.

# ENGLAND

Once he defeats the Sheriff of Nottingham at Sherwood, Robin Hood is called out to fight Prince John and the other nobles for control of all of England. You will have to expand your mastery of additional action sequences. You will also have access to a larger party of characters, who provide you with expanded gameplay options. Among them are:

As **ROBIN HOOD**, you can continue to raid castles and caravans, but in many more locations than before. After selecting Robin, if you raid territories that contain a castle, you will attempt to steal the castle's gold coffers in swordfighting duels. If you select territories that contain a target icon, you will ambush caravans to lighten their purses. Choose wisely!

**LITTLE JOHN** is your battlefield general. He is able to recruit troops, place garrisons, move armies and siege castles. Select him to access his commands, and ensure your territories are well defended and your army appropriately staffed.

As the only noble knight sympathetic to Robin's cause, **IVANHOE** is greatly useful in tournaments, which he can join to win fame, gold and land. Ivanhoe can also assist in the building of castles on your own territories — as long as you have enough gold!

**MAID MARIAN** will occasionally appear to give Robin her assistance. As a noble, she enjoys the confidence of the other lords — but only for a limited time. Send her away on spy missions to uncover any enemy information that might prove vital for your victory on the battlefield....

The good old **FRIAR TUCK** attends to the general needs of the people. You might choose to occasionally provide him with a donation, thus improving your status among the population. Tuck is also your link to the kidnapped King Richard the Lionheart — if you collect enough gold, you can ask Tuck to pay off the ransom and return the good king back home!

# BATTLE

13

## BATTLE BASICS

To gain control of new areas in England, you must recruit, maintain and lead an army against enemy forces. Ultimate victory is decided upon the open field of battle.

Battles begin when either you or an enemy lord attacks an area that contains a rival garrison, campaign army or stronghold. To battle, follow the steps on these pages. You and the commander of the opposing force will repeat the battle cycle until one of the armies is crushed or retreats from the field.

### STEP 1: SELECT YOUR ATTACK UNIT

Press the directional buttons/left analog stick  $\uparrow/\downarrow$  to cycle the selector among different unit types. Press the  $\times$  button when the unit you want is selected.

### STEP 2: SELECT YOUR TARGET

An indicator will appear on the battlefield pointing to the enemy target. Press the directional buttons/left analog stick  $\uparrow/\downarrow$  to select where to place your troops. Press the  $\times$  button when the position you want is selected.

If you have archers or catapults, press  $\leftarrow/\rightarrow$  to choose a target for a ranged attack. In this type of attack, catapults and archers will fire over incoming units to attack an enemy unit's home base.

### STEP 3: CHARGE YOUR ATTACK LEVEL

Press and hold the  $\times$  button to charge your attack. The longer you hold down the button, the larger the attacking force will be. You can send a maximum of 200 troops into battle in any single attack.

## STEP 4: UNLEASH YOUR ATTACK

When your troop strength reaches the level you want, release the **X** button to unleash your attack.

## ADVANCED BATTLE

Over the course of the game, your units will learn Special Attacks. These come in two forms: offensive and defensive.

- + Offensive attacks are great when you want to pack an extra punch to cut through an enemy's advancing attack.
- + Defensive attacks will bounce an enemy to its home base, canceling its current attack.
- + When Special Attacks are available, you can change them by pressing the **O** button.
- + You can only use a Special Attack once per battle, so use them wisely!

# BATTLE UNITS

Peasants

**PEASANTS** are the common men and women of the land. Their faith in you as their leader gives them strength in numbers. Beware though — they are poorly prepared for the rigors of battle.

The backbone of any victorious army, **FOOTMEN** are the grunts of the battlefield. Although costlier than peasants, they are much better trained and prepared against other military units.

Footmen

Archers

Excellent long-range attackers, **ARCHERS** make up for their defensive weakness in speed. However, be careful to protect them as they can be easily and quickly decimated.

Noble warriors and rulers of the battlefield, **KNIGHTS** are well trained to combat any enemy unit efficiently.

Knights

Catapult

As heavy artillery, **CATAPULTS** can induce deadly ranged attacks on any enemy unit. However, they are also quickly damaged, and very expensive to acquire. Catapults are also required in order to siege castles.

# TOURNAMENT

## THE JOUST

Only knights and nobility are allowed to participate in tournaments. It is fortuitous, then, that an outlaw like Robin Hood has Sir Wilfred of Ivanhoe as an ally and clandestine representative.

Participants of tournaments journey great distances in hopes of gaining fame, fortune, or even a settlement of land from a fallen opponent.

Ivanhoe, like all noble guests, may participate in tournaments provided he brings 100 gold coins for the entrance fee.

## TOURNAMENT ROUNDS

All tournaments consist of three rounds of Joust.

- + Winners of the first round are graced with a boost to their Fame.
- + Winners of the second round receive 400 gold coins.
- + The winner of the third and final round is declared the Tournament Champion. This knight may seize control of any territory controlled by his fallen opponent, as long as there is no stronghold in the desired territory. The most skilled knights can expand their domains by gaining victory in Jousts.

## ROUND SCORING

The first champion to reach three points in a round of Joust is declared the winner. Points are awarded only if you break your lance.

- + One point is awarded for a hit to the opponent's body.
- + Two points are awarded for a hit to the opponent's head.
- + Three points are awarded for unseating your opponent. This rare feat is only achievable by charging your horse to its maximum speed, and demonstrating great precision in aiming.
- + Any knight who strikes his opponent's horse will be disqualified from the tournament.

## CHOOSING OPPONENTS

Choose your opponents with care, for, if you lose, they may unburden you of your most prized holdings.

- + Press the directional buttons/left analog stick ◀/▶ to select an opponent.
- + Press the X button to confirm.

## CHARGING YOUR STEED

All knights know that the faster your horse is traveling at the moment of impact, the more force is thrust on your opponent. The greater the force of impact, the better chance you have of breaking your lance on your opponent's body.

- + To charge your steed, press the X and O buttons alternately in rapid sequence.

## AIMING THE LANCE

The vital instant before combatants collide is the briefest of moments. You have no more than a handful of precious seconds to steady your lance.

Aim for your opponent's body, or if you are so skilled, aim for his head for best results.

✦ Use the left analog stick to aim your lance.

## ENEMY STRONGHOLDS

Capturing undefended territory is easy.

Laying siege to a defended stronghold is far more difficult.

## INITIATING A SIEGE

To initiate a siege, direct your Campaign Army to attack a territory that is home to an enemy stronghold. A proper siege requires catapults and men, which must be purchased beforehand. You may bring as many catapults as you want to the siege, but only ten will be active at any one time.

## CHOOSING A WALL TO ATTACK

You can siege a stronghold from its Eastern, Western, Northern or Southern walls. Behind the wall of each side lies an interior building housing specific types of troops. Select the side, destroy the wall, and take out the building to gain the numerical advantage in the ensuing battle.

- ✦ Select a side by pressing the directional buttons/left analog stick ◀/▶. Little John will scout the side and report on its defensive strength and type of building behind the wall.
- ✦ Press the X button to confirm.

## CATAPULT OPERATION

Direct payloads at enemy walls by increasing and decreasing the tension on the catapult arm.

- ✦ Rotate the left and right analog sticks simultaneously in opposite directions to adjust the payload trajectory.

## FIRING PAYLOADS

- ✦ Fire payloads by pressing and releasing the X button.
- ✦ The longer you hold down the X button, the more catapults you will fire at your target.
- ✦ You can charge a maximum of 10 catapults to fire, but be careful — as you charge your payloads to fire, enemy arrows will rain down on your army.

## CHANGING PAYLOADS

When laying siege to enemy castles, death and destruction are delivered in three forms: boulders, Greek fire, and diseased payloads. Learning the advantages of each will prove extremely valuable.

- ✦ Press the O button to cycle through available payloads.
- ✦ Special payloads do not charge.
- ✦ You only get one special payload per day during the siege.
- ✦ The disease payload is not accessible at the beginning of the game — you'll have to uncover its secrets!

## RUSHING A CASTLE

After at least one wall has been destroyed, you can elect to rush the castle and proceed directly to battle against the defending army.

- + Press the  button and select RUSH CASTLE from the Options Menu.

## WITHDRAWING FROM SIEGE

A good commander knows when he has underestimated his adversary. A loss of honor on the battlefield is far less costly than the decimation of your army.

- + Press the  button and select WITHDRAW from the Options Menu.

**ARCHERY**

- ✦ Keep two things in mind and you should live long enough to reap the benefits of experience. First, you must lead your targets in order to hit them. Second, listen carefully for enemy arrows — an accurate shot fired in your direction can be heard. As the target, you would do well to react appropriately.

**SIEGES**

- ✦ Aim for the tops of walls where they are weakest.
- ✦ If you notice castle walls protecting enemy soldiers during battle, you didn't destroy enough of the castle during the siege. You will have to tear those walls down by attacking them if you hope to defeat the army protected within.

**BATTLE**

- ✦ Make sure to experiment with different unit types and attacks. Each enemy lord is different, so try to discover their strengths and exploit their weaknesses!
- ✦ A well balanced army has a greater chance of success on the battlefield.
- ✦ Think before sending off your troops into battle. Haste can often result in costly mistakes.

**SPECIAL EVENTS**

- ✦ Keep your eyes and ears open at all times. Sometimes, nobles may step forward or other potential opportunities might arise for special favors in return for a reward or simply a noble cause. You would never leave a damsel in distress, would you?
