IN-GAME MENU

Character Icons—Character portraits are at the bottom of the screen. Below the portraits is the Slam Meter, which measures how much Slamergy you've collected during a round.

Leader Icon — Indicates the slam leader's position.

Slam Prompt — This appears above your head when your Slam Meter is full. Use this button to execute your Slam Attack.

Wiggle Icon — Whenever you've been knocked down or grabbed, this icon appears above your character. Wiggle the left analog stick rapidly to speed up your recovery.

Time Remaining — The timer indicates how much time is left in a round and defaults to two minutes.

The Slam Meter

At the heart of *Shrek® SuperSlam* is...you guessed it, the Slam! The Slam Meter is under the character portraits. Fill up the meter with Slamergy, then Slam your opponents. Your characters will have a glowing aura around them when they're Slam-ready. You get multiple attempts to Slam someone, so be careful! Once you use up the Slam, you have to collect more Slamergy to fill up your meter again. How do you get Slamergy? Battle with your friends! The more advanced combos you make, the faster you fill the Slam Meter.

Beat your opponents by getting the most Slams in the round. Try to Slam as many of your opponents at one time as you can to maximize your score.

Remember to watch out for your opponents! When you are hit by one of their Slams, you'll lose a Slam point. But this can work in your favor, because each time you Slam your opponent, not only will you get a Slam, but they lose one as well. This is important to remember when you're losing.

Advanced Moves – All Characters

Evade Dash – Right analog stick or move while blocking (left analog stick + the **R1** button).

- Your **evade dash** can both get you out of trouble and sneak you into the middle of it. Tap your right analog stick in the direction you want to go.

***Hint:** Try using a fast attack (the  button) or a **strong attack** (the  button) while performing an **evade dash**. You'll end your **evade dash** with a surprise attack.*

Air Attack – Fast or strong attack while in mid-air (the  or  button in air).

Up Attack – Simultaneously press jump and fast attack (the  +  buttons).

- It's raining cats and ogres! Press jump and fast attack together to counterattack your opponent's air attacks with an **up attack** (the  +  buttons).

Charge Attack – Hold your **strong attack** (hold the  button).

- Try using your **charge attack** just as your opponent is recovering from a missed attack.

Deflect – If you time your **block** to the very last moment, you can deflect thrown objects back at the thrower! Just be careful they don't do the same right back at you.

Block Cancel – Use your block to cancel your charge attack (the **R1** button).

- Fake-out your opponents. Cancel your **charge attack** by pressing the **block** button before your **charge attack** is unleashed.

Fast Drop – Use your **block** in mid-air to drop faster.

***Hint:** Each character has a **block breaker**. Find and use them to take down those block-happy opponents.*

Advanced Moves – Character Specific

Don't be a one-trick Donkey! Different combos have different effects. Explore your **combo tree** to discover all your moves. The more **combos** you learn, the more tactics you'll have to use against your opponent. Find all your favorite character's **strengths** and **weaknesses**.

Dash Attack – Tap a direction with **fast attack** (tap left analog stick + the  button).

Air Dash – Some characters can do a dash attack while you're in mid-air.

- Time your **air dash** correctly and you can strike opponents who are on the ground.
- Whether you're chasing down your opponents or running away, try to combo an **air dash** into an **evade dash** to cover more ground.

Wall Attack – **Fast attack** while pressing up against walls (left analog stick + the  button).

- Surprise your opponents with a sudden change in direction. When you're chased into a wall, use a **wall attack**.

Air Wall Attack – Do a wall attack while you're in mid-air.

- Try using an **air dash** to **wall air attack** combo.

Note: Not all characters have an air dash.

Charge Throw – Hold your throw to increase your throw distance (hold the  button).

- Some characters have a **charge throw** attack. Use it to get more Slamergy.

Hint: When exploring your combo tree, remember which attacks knock down your opponents so you can use knockdown attacks to set up air attacks and slams.

Hint: Know thy opponent. If you're taking damage from an **enemy combo**, right before the end of your enemy's combo, there is a **block window** of opportunity. Time your **block** right and you'll interrupt an enemy's attack before it's finished, leaving them vulnerable.

Hint: Fiona and Prince Charming can do an **air evade**. While in the air, press in the direction you want to evade and **block** at the same time.

SINGLE PLAYER

Story

Donkey has invited his friends over to watch some TV. Unfortunately, Donkey and Dragon's little Dronkeys are running amok, as children tend to do, and won't settle down for their bedtime. Shrek suggests reading a bedtime story to the kids, but just as Donkey gets started, one of the Dronkeys lets out an excited belch of fire and

sets the storybook ablaze. With no other way to get the Dronkeys to sleep, Shrek and his friends start to make up their own magical stories. Starting at Chapter 1, play through each increasingly fantastical tale as one of the classic or brand new characters in the land of Far Far Away. Let's hope tales of valor, lost-honor and late-night drive-thru windows will be enough to lull the little Dronkeys to sleep.

Mega Challenges

Mega Challenges are single-player mini-games. Not for the weak of heart or spirit, there are 45 Mega Challenges and seven bonus challenges in all, which will unlock untold rewards along the way. **Play this mode to unlock additional characters and arenas.**

Melee

Face off against one, two or three computer opponents in a two-minute timed battle. Whoever has the most Slams at the end of the round wins. You'll have access to any character or arena you've already unlocked and saved to your memory card (8MB)(for PlayStation®2).

Melee Options

Enter the Melee Options by pressing the  button on the Level Select screen.

You can adjust the settings for Slam Limits, game speed and more before you go into battle.

Options consist of:

Mode – Normal, Last Player Standing and First to Slam.

Game Speed – Move character faster.

Time Limit – 30 second intervals all the way up to 10 minutes (No Slam Limit in Place).

Slam Meter – Slow Gain, Medium Gain, Fast Gain (how fast the meter increases); Slow Drain, Medium Drain, Fast Drain (how fast the meter is depleted), OFF.

Sudden Death Slam Meter – Slow Gain, Medium Gain, Fast Gain (how fast the meter increases); Slow Drain, Medium Drain, Fast Drain (how fast the meter is depleted); OFF.

Full Slam Meter – Use Slam Attack, any hit Slams.

Slammed Penalty – Does not give negative Slam points for being slammed.

Skill Level

You can change all characters' difficulty settings, which range from 1 (Idle) to 10 (Rage of Ogres). These affect how smart the computer-controlled characters are.

Training

Learn the basic moves for your characters. Attacks, combos and the like are all covered here. Some of the more advanced techniques are also covered in Mega Challenges mode, so make sure to check there as well.

Trophy Room

Check out all the trophies you've collected.

MULTIPLAYER

Melee – Melee lets you play with up to three friends (with the use of a Multi-Tap).

King of the Hill – In this mode, you gain points by being on top of the hill and defending it from all comers. Whoever has amassed the most points at the end of the round wins.

PLAYING THE GAME

Character Selection Screen – This is where you can choose any of the ten default *Shrek*[®] characters, or any of the ten additional characters you have unlocked during the course of gameplay. To select a character, move the Character Select indicator over the portrait of your chosen character using either the directional pad or the left analog stick. Confirm your selection by pressing the  button. Can't decide which character you want to play or just want to be surprised? Select  and you will be assigned a character at random. You can change costumes by selecting a character and pressing the  button.

Choosing a Team: Assigning teams allows you and your partner(s) to pool your Slam points. The team with the highest Slam point total wins. Choose teams using the directional pad. Confirm by pressing the  button.

Now that you've set up your character, it's time to pick out which level you want to battle in. Press the **START** button to proceed to the Level Select screen.

Level Select Screen – Choose which level or location in the *Shrek*[®] universe you intend to pound your opponent(s) silly in. Use the directional pad or left analog stick to move around the map of Far Far Away. Select a location by pressing the  button. Enter the melee option from the Level Select Screen by pressing the  button.

POWER-UPS: WEAPONS, POTIONS & MAGICAL ITEMS

You'll find these sweet babies scattered around every level of *Shrek*[®] *SuperSlam*. Each power-up has a different effect, either on you or your opponents. Use them wisely and often, because they can often be the deciding factor in a close battle.

Weapons

These power-ups have the unique ability to be holstered, or stored for later use, once you've collected them. The catch is that you can only store one weapon at a time. Press the  button to holster/draw your weapon, and the  or  button to use it. A meter over your character's head indicates how many more uses you have for the weapon. Once the meter is empty, your character will automatically throw the weapon. Pick up something you don't want? Draw it and press the  button to drop it.

Giant Ham – Why? Because they're funny.

Fart Wand – Harness the power of Shrek! The Fart Wand grants whoever wields it three of Shrek's Green Storm attacks.

Floating Air Mines – A quiver-shaped backpack full of oversized, medieval rockets makes for a great anti-air attack weapon.

Hammer of Smiting – A giant silver hammer made for smiting your opponents!

Pot O' Gold Grenades – A fat little pot full of gold coins with a rainbow trail. When thrown, they explode in a shower of golden coins—deadly golden coins.

Fireball Wand – A magic wand with a red crystal on one end. The fireball explodes on impact.

Gravity Wand – Fling other characters into walls to increase your Slam Meter.

Ice Wand – A wand with a blue crystal on one end. Shoots an icy blue projectile that freezes the opponent in place.

***Note:** This is a time-based weapon and the player has it to use for only a few seconds.*

Beehive – A cartoon beehive with little buzzing bees swirling around it. The bees don't mind being picked up and thrown, but if the beehive hits a character, it sticks on his or her head, and the bees attack!

Magnet – No one escapes the Magnet Wand! Draw them in, then pummel them silly.

Pirate Cannon – What's worse than someone shooting cannonballs at you? Ricocheting cannonballs!

Fairy Bazooka – Not all fairies are nice...This weapon shoots heat-seeking fairies that chase you down and attack you!

***Hint:** If your opponent is in Slam mode, use the **fairy bazooka** to attack them from a distance. With each hit, you'll be able to reduce their Slam and increase yours!*

Note: Remember that you can equip and holster your weapons! Try setting up your opponents with weapons that paralyze them, then holster your weapon and attack.

Potions

You'll find vials filled with magical potions that temporarily enhance your character's abilities. Potions are automatically drunk when acquired.

Rocket Sauce – This powerful brew increases attack and movement speed.

Max Slam Juice – When drunk, this potion enables your slam attack.

Invisibility Potion – You disappear!

Invulnerability Potion – You cannot take damage.

Mystery Mix – This technicolor potion changes color constantly, and depending on what color it is when you grab it, you may get a good potion. Then again, maybe you won't.

Magical Items

Magical items appear throughout the levels. Just like potions, magical items are automatically triggered when grabbed and cannot be stored for later use. Keep a look out for them; you'll want to beat your opponents to these items. Grabbing the right magical item can easily mean the difference between winning and losing in *Shrek® SuperSlam*.

Viking Horned Helmet – A big, oversized Viking helmet with horns that turns every hit into a slam.

Hint: If you can manage to get a **fairy bazooka** AND a **viking horned helmet** at the same time, fire away! Each fairy will Slam your opponent.

Dragon Mask – The only thing worse than Shrek's breath is Dragon Fire. Slip on this dragon-shaped mask and make your presence known.

King's Crown – Trumpets will sound and the people will believe you are the King Returned! It's too bad all that cheering leaves people open to attack...

Magic Mirror Mask – A white mask that resembles the Magic Mirror. It reflects all missiles, but NOT melee weapons.

Pill Bug Ball – Transform into a ball and roll around hitting opponents with increased speed.

Dragon Sword – Harness the mighty power of the dragons with this gigantic fiery sword.

CHARACTERS

These are just some of the characters you'll find in *Shrek® SuperSlam*. As you advance through the game, you'll unlock more and more characters.
