ABOUT PROGRESSIVE OUTPUT

Higher video quality can be enjoyed if a component AV cable for PlayStation®2 (SCPH-10100U) and a progressive scan (525p) television set with component video input are used. For instructions on how to use the component AV cable to connect the PlayStation®2 to a television set, please consult the instruction manual for the PlayStation®2 or the diagrams included with the component AV cable. Furthermore, please set the Component Video Out settings on the PlayStation®2 to Y Cb/Pb Cr/Pr under System Configuration. Some television sets with component video inputs may not be progressive scan (525p) enabled. Please consult the television set's instruction manual or contact the manufacturer to confirm.

GAME RULES

This section covers the conditions for victory and the basic rules shared by all the game modes.

HOW TO WIN

Attain any one of the following conditions to win a single round.

Winning a match requires winning a varying number of rounds. Adjust the number of rounds required to win a match in the Options Menu.

KNOCK OUT

Opponent's health is reduced to zero.

RING OUT

Opponent is knocked out of the ring.

TIME UP

The character with more health when time runs out, wins.

DRAW & SUDDEN DEATH

When a double knock out (both characters reach zero health simultaneously) or a double ring out (both characters knocked out of the ring simultaneously) occurs, a draw results.

Both sides receive a point for the round at this time. If both characters have won the same number of rounds, and both sides reach the required number of rounds won to win the match at the time of the draw, the match goes into sudden death.

GAME OVER

Game Over occurs when a match is lost. In modes where there are rankings, such as Survival and Time Attack, qualifying players are able to enter their names into the rankings.

In Arcade Mode, when Game Over is reached, a Continue Screen appears. Press the START button before the countdown reaches zero to continue playing.

WEAPON MASTER MODE

This section covers the general flow of Weapon Master Mode.

1. CHAPTER SCREEN

Weapon Master Mode is divided into several chapters. The player proceeds to new adventures by clearing each of these chapters.

2. WORLD MAP

In the World Map, the player can move between chapters. Selecting a chapter opens the Chapter Map.

3. CHAPTER MAP

In order to clear the missions in each chapter, certain conditions must be met. Dungeons are also accessible through Chapter Maps.

4. BATTLE

Each stage, mission, and battle can include a variety of conditions, including those that may change a character's status.

5. MISSION CLEAR

When the conditions for clearing a given mission are met, the Mission Results Screen appears. If any items were obtained, they will also be indicated on this screen. By fulfilling the chapter clearing conditions, new chapters become available for the player to explore.

ABOUT GOLD

The currency in the world of Weapon Master is called Gold. The player receives a certain amount of Gold for each battle, regardless of whether the player wins or loses. The player can use Gold to buy various items, such as weapons. Purchase weapons at the shops found within the Command Menu. To open the Command Menu, press the START button at the World Map/Chapter Map Screen.

ESCAPING A THROW

In order to escape an opponent's throw, press A against an A+G throw, or B against a B+G throw just as the opponent starts the move.

BASIC TECHNIQUES

ATTACK ATTRIBUTES AND GUARD

HIGH-LEVEL ATTACK (UPPER-BODY ATTACK)

Useful against standing opponents or opponents jumping towards the player. Use a Standing Guard to defend or Crouch to evade.

MID-LEVEL ATTACK (MID-BODY ATTACK)

Useful against both standing and crouching opponents. Use a Standing Guard to defend, but not a Crouching Guard.

LOW-LEVEL ATTACK (LOWER-BODY ATTACK)

Useful against both standing and crouching opponents. Use a Crouching Guard to defend or Jump to evade.

SPECIAL MID-LEVEL ATTACK (SPECIAL MID-BODY ATTACK)

Useful against both standing and crouching opponents. Use a Standing or Crouching Guard to defend.

NEUTRAL GUARD

Set the Neutral Guard option to ON in the Options Menu so that even if no buttons are pressed and no command is entered, the character automatically guards against attacks. However, this feature does not guard against low attacks (lower-body attacks) and for combo attacks, only the first hit is blocked.

CONTROLS WHILE ON THE GROUND

Get up in place:

Press G.

Rolling forwards or backwards to get up:

Press **▶** (forward) or **◀** (backward) while on the ground.

Rolling sideways to get up:

Press **▲** (towards the back) or **▼** (towards the front) while on the ground.

Attacking while getting up:

Press an attack button (A, B, K) while on the ground.

STAGGER RECOVERY

Certain attacks can stun characters, causing them to lose their balance and temporarily be unable to move. In this situation, pressing the directional buttons, the left analog stick, or any of the A, B, K, G repeatedly speeds up recovery.

BASIC TECHNIQUES

QUICK ROLL

Certain powerful attacks can throw a character up into the air. Press G while airborne to quickly recover and return to a ready position.

QUICK ROLL AGAINST WALLS

Certain stages include walls that can also be used as part of attacks. When a character is slammed against a wall, do either of the following in order to perform an ukemi and recover quickly.

Ukemi off a wall by Rolling Sideways:

Enter  or  to roll towards the back or the front.

Ukemi off a wall by Rolling Forward:

Enter  to roll towards the opponent.

AIR CONTROL

Use the directional buttons or the left analog stick to control the landing point during a juggle attack.

GUARD IMPACT

Use one of the following commands at the right moment to repel or parry an opponent's attack. This is called Guard Impact. When successful, both parties are momentarily stunned. The player who successfully Guard Impacts is able to move first, and will therefore have an advantage in the fight. Guard Impact is effective against almost every technique, but there are a few exceptions.

Repel high-level (upper-body) or mid-level (mid-body) attack. Press +G in time with the opponent's attack.

Parry mid-level (mid-body) or low-level (lower-body) attack. Press +G in time with the opponent's attack.

REVERSE GUARD IMPACT

When an attack is repelled or parried by a Guard Impact, the player is in the disadvantageous position of being unable to attack or guard. However, if attacked while still immobile, the player can use Guard Impact against the opponent.

BASIC TECHNIQUES

SOUL CHARGE

A character can focus energy, or "spirit," into their weapon to temporarily raise its attack power. This is called a Soul Charge. Unleash a Soul Charge by pressing A+B+K simultaneously. Depending on which buttons are pressed for how long, one of the following 3 stages of transformation occur:

SOUL CHARGE LV1

Press G immediately after the Soul Charge is initiated and the player's weapon glows lime green. Focusing energy can be quick, but the charge does not last long.

SOUL CHARGE LV2

If an attack is launched after initiating a Soul Charge, or if G is pressed soon afterward, the weapon will glow green. Some attacks are as powerful as Counter Hits and the charge lasts a little longer.

SOUL CHARGE LV3

Fully focusing energy results in the weapon glowing blue. Not only will attacks be much more powerful, but some attacks are unblockable or guard-break moves. The charge also lasts for a long time.

- A guard-break move is one that breaks through an opponent's guard and creates a disadvantageous situation for the opponent, where neither attacking nor guarding is possible.

THE RELATIONSHIP BETWEEN VERTICAL STRIKES, HORIZONTAL STRIKES, AND 8 WAY RUN

In addition to the various attacks, defensive techniques, and special moves in **SOULCALIBUR®II**, there is the tripartite relationship between the basic attacks (vertical strike, horizontal strike) and 8 Way Run.

VERTICAL STRIKE

Vertical strikes have the ability to crush horizontal strikes. Match an opponent's horizontal strike with a strong vertical strike to gain the upper hand.

8 WAY RUN

Use the 8 Way Run to dodge vertical strikes. Run behind opponents and follow up with a powerful attack.

HORIZONTAL STRIKE

Stop an opponent's 8 Way Run with a horizontal strike. Since the opponent is running, the likelihood of a Run Counter is high.
