WARNING: READ BEFORE USING YOUR PLAYSTATION®2 COMPUTER ENTERTAINMENT SYSTEM.

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation 2 console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game — dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions — **IMMEDIATELY** discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PlayStation 2 console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

USE OF UNAUTHORIZED PRODUCT:

The use of software or peripherals not authorized by Sony Computer Entertainment America may damage your console and/or invalidate your warranty. Only official or licensed peripherals should be used in the controller ports or memory card slots.

HANDLING YOUR PLAYSTATION 2 FORMAT DISC:

- This disc is intended for use only with PlayStation 2 consoles with the NTSC U/C designation.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

Prologue

Knowing that Odin would catch up to her sooner rather than later, Silmeria began speaking to Alicia while the princess was still a child. But to those around the young girl, it seemed that the conversations she held with the valkyrie within her were the signs of madness.

King Barbarossa of Dipan, the girl's father, sent his daughter to an ancient, secluded castle far from his lands, where the princess was forced to live in exile.

Eventually, the inevitable happens. Odin discovers that Silmeria has awakened. His minions begin to close in on the pair.

Two souls, bound together by capricious fortune, now face the retribution of the gods.

One human. One god. The wheel of their ill-starred fate inexorably begins to turn.

Getting Started

Set up your PlayStation®2 computer entertainment system according to the instructions in its Instruction Manual. Make sure the MAIN POWER switch (located on the back of the console) is turned ON. Press the RESET button. When the power indicator lights up, press the OPEN button and the disc tray will open. Place the **VALKYRIE PROFILE® 2: Silmeria** disc on the disc tray with the label side facing up. Press the OPEN button again and the disc tray will close. Attach game controllers to the controller ports. Follow on-screen instructions and refer to this manual for information on using the software.

STARTING THE GAME

When you start the game, the opening movie will play, and you will be taken to the Title Screen. You can press the **X** button or the START button to skip the movie and go straight to the Title Screen.

When you first load the game, you will be asked to set the screen aspect ratio of your television. Press the **△** button for a normal 4:3 ratio, or the **⊞** button for a 16:9 widescreen ratio. If you select the widescreen option, you will need to set your television to full-screen mode. Please consult your television's user manual for details.

NEW GAME

Start a game from the very beginning.

LOAD GAME

Continue a game already in progress. Select a memory card (8MB)(for PlayStation®2) from a MEMORY CARD slot, and then choose the file that you would like to load.

SETTINGS

Enter the Game, Environment, or Controls sub-menu, and select the Change option to adjust settings. You can select Undo to cancel any changes, or Default to restore the initial settings.

GAME

Change various game settings.

Targeting	Choose whether to have the target selected automatically (Semi-auto) or manually (Manual) during battle.
Horizontal Battle Cam Controls	Select the control direction for moving the battle camera left and right.
Vertical Battle Cam Controls	Select the control direction for moving the battle camera up and down.
Camera Angle	In a battle, select the camera position after an attack is made.
Skip Special Attack Sequences	Enable or disable the option that allows you to skip special attack animations by pressing the X button (see P. 33).
Preserve Battle Groups	Select whether to maintain groups (see P. 29) used in battle. If you enable this option, the settings will be used in subsequent battles.

Basic Controls

DUALSHOCK®2 ANALOG CONTROLLER CONFIGURATIONS

The basic game controls using your DUALSHOCK®2 analog controller. You can change your controller settings in the Settings Menu (see P. 4).

- When playing a single-player game, insert a DUALSHOCK®2 analog controller in controller port 1.
- This game is designed for use with a DUALSHOCK®2 analog controller. Other controller types are not supported.
- Keep the ANALOG mode switched on (with the mode indicator shining red) to use the analog mode. You can switch the vibration on or off in the Settings Menu (see P. 4).
- During a battle, the ○, ×, △, and □ buttons are each assigned to a party member. Press a button to have the corresponding character attack.

Press the \odot button to play sample sounds. You can use the L1 and R1 buttons to change the position of the sound source.

DOLBY PRO LOGIC II

You can enjoy the game in surround sound by connecting a PlayStation^{®2} DIGITAL OUT (OPTICAL) or AV MULTI OUT connector to a compatible sound system (AV amplifier, etc). Systems with a Pro Logic II decoder can play five-channel audio, while Pro Logic systems can play four-channel audio. You can also hear the game in traditional two-channel stereo.

* For additional details, please consult your amplifier/sound system's user manual.

Dolby, Pro Logic, and the double-D symbol are trademarks of Dolby Laboratories.

CONTROLS

Change the button assignments on your controller. Use the directional buttons or left analog stick to select the item you want to change, and press the button to which you want to reassign the function. Press the START button when you are finished making changes.

**SAVING YOUR GAME**

You can save your game by opening the menu on the World Map, selecting Data (see P. 26) and then Save, or by using one of the save points (see P. 11). You will need to insert a memory card (8MB)(for PlayStation^{®2}) with at least 67 KB of free space into MEMORY CARD slot 1 or MEMORY CARD slot 2.

PROGRESSIVE SCAN TELEVISIONS

Valkyrie Profile^{®2}: Silmeria is compatible with progressive scan televisions. Press and hold the \triangle and \otimes buttons simultaneously while switching on your PlayStation^{®2} console to bring up the progressive scan selection screen.

* To play in progressive scan mode, you will need a PlayStation^{®2} component AV cable and a progressive scan-compatible television.

Story

Our story begins hundreds of years before the legendary adventures of Lenneth, the Battle Maiden.

Silmeria Valkyrie is charged by Odin, Lord of the Gods, to gather the souls of the fallen. Silmeria serves her master faithfully until a certain incident causes her to doubt, and ultimately rebel against, the law of Odin.

Odin immediately recognizes the danger. He transmigrates Silmeria's soul and summons the next Battle Maiden in her place. But the Sovereign's Rite, the divine spell used to transfer Silmeria's soul, is not completed.

Silmeria awakens within the body of a young princess of Dipan. The princess's name is Alicia.

Normally, valkyrie souls do not awaken when trapped within the body of a mortal. Lord Odin will not suffer one who defies his will to remain alive and conscious.

One day, Odin will discover that the traitorous valkyrie lives. One day, he will bring divine retribution down upon her.

Characters

SILMERIA

One of the three valkyrie Battle Maidens who rule over fate. After opposing Odin, Lord of the Gods, her soul was forcibly transferred into a human body. She resides within Alicia, Princess of Dipan, their souls existing side-by-side. Silmeria has spoken to Alicia since the princess was a young girl, trying to prepare her for their inevitable fate.

TWO SOULS. A LIFE SHARED.

ALICIA

A young girl, born as the first princess of the Kingdom of Dipan. Silmeria has been speaking to her since before she can remember. It was those conversations that led her father, the king, to banish her to a distant castle, where she has lived ever since. Scarred by this paternal rejection, the sensitive girl has grown up timid and meek.

RUFUS THE ARCHER OF FATE

The archer Alicia meets in the harbor of Solde who becomes her first ally. Rufus is sometimes offbeat, sometimes bashful, but always the wiseguy. Though he himself is loath to speak of it, he is burdened with a cruel fate—a fate that may be deeply entwined with that of our characters.

Characters

DYLAN

THE LOYAL HEAVY WARRIOR

An einherjar materialized by Silmeria. He lived 150 years ago as a heavy warrior who swore loyalty to the Kingdom of Dipan.

Knowing that Dipan is in danger, he steps forward to protect and assist Alicia. His taciturn gruffness belies a deep sense of honor and the kindness in his heart.

LEZARD

THE YOUNG MASTER OF MAGIC

An extravagantly courtly sorcerer who has acquired knowledge and magic skills far beyond his years. Though initially engaged in research in Dipan's capital, he joins the adventurers' quest when he rescues Alicia and her party from a dangerous predicament.

LEONE

THE BEAUTIFUL WARRIOR WITH A SECRET

A treasure hunter who Alicia and her party encounter on their journey. Curious about the adventurers she has run into, she volunteers to accompany the party. She is a beautiful, good-natured woman, but a shadow seems to lurk behind the friendly mask.

ARNGRIM

THE IMPULSIVE, STRAIGHT-TALKING MERCENARY

A mercenary in the employ of Leone. It is under her command that he only half-willingly joins with Alicia and her party. A straight-talking fighter with a fiery temper, he despises both politicking and lies.

Shops and Inns

In the towns and villages you visit on your journey, you will find armories and inns. You can spend money (OTH) to rest at inns or buy items at shops.

INNS

Staying at an inn will completely restore your party's HP (see P. 26) and cure all status ailments (see P. 36).

ARMORIES

Here you can buy and sell items. Push left or right on the directional buttons or left analog stick to change the item category. From the subsequent list, you can choose the item and the quantity to buy or sell. When viewing the list, press the  button to sort the list, and the L2 and R2 buttons to switch between characters.

* The purchase screen is pictured here. The screen will be different when selling items.

The screenshot shows the purchase interface for the character Alicia. At the top, it displays 'Crell Monferaigne' and 'Alicia' with their respective levels (L 2 and R 2). Below this, a list of items is shown with their costs and quantities. The 'Sinclair Saber' is highlighted. At the bottom, the 'Available' OTH is 84180 and the 'Subtotal' is 0 OTH.

Shops and Inns

GET YOUR HANDS ON THOSE VALUED CUSTOMER ITEMS!

In armories, you may see mysterious items with question marks displayed instead of a name. These are Valued Customer Items. Many of these are rare goods or limited items that can only be purchased at that particular shop, so you definitely want to try to acquire as many as you can. Here's how to do it:

1. BECOME A VALUED CUSTOMER

To become a valued customer, you must shop at the store frequently. The more you buy, the more items will be revealed.

2. COLLECT MATERIALS

To have a shop make you a Valued Customer Item, you will have to supply them with the right materials. You can acquire many kinds of materials by breaking off certain monster parts in battle (see P. 34). To find out what monster parts will provide what kind of materials, read the shopkeeper's notes that you can find in armories.

3. SELL MATERIALS

When you have collected the materials, sell enough of them to the shop so that they can make the item. The materials they need to make an item are displayed in yellow.

4. HAVE THE ITEM MADE FOR YOU

Once you have sold the materials to the shop, you will be able to buy as many Valued Customer Items as could be made from the materials you collected and sold.

* You cannot have a Valued Customer Item made for you if you do not know its name, even if you sell the required materials to the shop.

Required Materials

Shows the kind and quantity of materials required to make the item. The number in parentheses indicates how much of the material you currently possess.

Field Screen

You will navigate through dungeons and towns on the side-scrolling Field Screen. Move carefully and keep an eye out for monsters.

ONSCREEN INFORMATION

You control Alicia, who appears in the middle of the screen. In the dungeons, a minimap and enemies are displayed.

Minimap

The minimap can be toggled on and off with the R1 button. It shows the location of monsters and other important information.

Navigation Display

When this icon appears, you can use the directional buttons or left analog stick to move further inwards or outwards.

Enemy

Initiate battle with enemies (see P. 27) by striking them with the \otimes button or simply coming into contact with them. After an enemy is defeated, its residual psychic energy remains to mark the site of the battle.

PAUSE SCREEN

Pressing the START button in the field will bring up the Pause Screen. Here you can check the name of your current location, the chapter number, and button assignments.

WORLD MAP

When you come out of a town or dungeon, you enter the World Map. Here you can move to different places by selecting a destination with the cursor. The \blacklozenge mark shows Alicia's current location. Press the \odot button to see the whole of Midgard. You can even travel to areas in other regions if you possess a map for that region.

Actions in the Field

You can carry out a range of actions while on the field. You need to choose the right action for each situation if you want to progress.

Movement

directional buttons or left analog stick

In general, you can only move to the left or right. At certain points in the game, a navigation icon such as the one shown in the screenshot will appear, and you will be able to move further inwards or outwards.

Crouch

Down directional button or left analog stick down

Press down on the directional buttons or the left analog stick to crouch.

Talk / Check

⊗ button

You can talk to people in the game. Press the ⊗ button to greet them. Use the same button to investigate items of interest.

Opening bags and treasure chests

You can open bags and treasure chests and acquire their contents by standing close to them and pressing the ⊗ button. But be careful—sometimes they are booby-trapped. If you do trigger a trap, try to get out of the way as quickly as possible.

Actions in the Field

Jump

○ button

Jump to reach higher areas and get past obstacles.

Swing sword

⊗ button

Swing your sword to break certain objects as well as crystals generated by photons. In addition, if you strike an enemy to initiate a battle (see P. 28), your party will begin with maximum AP levels (see P. 28).

Push

left/right directional buttons or left analog stick

In dungeons, you will encounter objects that can be moved if you push them. Sometimes, if you place them in the right location, they may activate devices or open doors. It is often worth your while to experiment.

Projecting Photons

⊙ button

You can fire photons at enemies, their residual psychic energy, and certain other objects. Doing so will seal the target inside a crystal. Push up on the directional buttons or left analog stick to aim upwards at a 45° angle, or push down on the directional buttons or left analog stick to aim downwards at 45°. Photons rebound off walls and floors.

Crystals

You can use crystals as platforms and stepping-stones. Contact with a crystallized enemy will not initiate battle. But be careful—the crystals weaken and eventually disintegrate after a short period of time.

Teleporting

After creating a crystal with photons, fire photons once more to exchange places with the crystal. You can use this power to reach higher ground or otherwise inaccessible places. If you hold down the ○ button while teleporting, you will be able to jump in midair. Use this technique to reach high ledges.

Hit the crystal with a photon and...

you change places!

You can even jump in midair!

MATERIALIZING EINHERJAR

Throughout the dungeons that you explore, you will find relics that once belonged to the einherjar now sleeping within Alicia. By investigating these relics and performing materialization, the einherjar will emerge to fight alongside Alicia. The more of these relics you discover, the more allies you will gain.

Actions in the Field

SEALSTONES

Scattered throughout dungeons you will find powerful stones known as sealstones. You must use them wisely to progress safely through the dungeons.

ABOUT SEALSTONES

Sealstones can be found throughout dungeons. They have various special effects on the bearer and nearby enemies (sometimes, enemies will be carrying sealstones, too). You can pick up and move sealstones from place to place, but once you leave the dungeon, all sealstones will return to their former locations. However, sealstones that have been restored (see P. 17) may be used in other dungeons.

Range of Effects

A sealstone's effect range depends on where the sealstone is placed.

Sealstone Effect Range

Alicia carries the sealstone	Affects entire party
Enemy carries the sealstone	Affects entire enemy group
Placed on a dais	Affects enemies in the area (area effect)
Placed in a shell	Effect is neutralized

When you are within the area of a sealstone effect, you will see a display like the one shown below. You can always press the button to check what sealstone effects are active.

Party Effect

A sealstone that is carried will affect the entire party.

Area Effect (see P. 17)

A sealstone placed in a dais will affect all enemies in the area.

Enemy Effect

When an enemy carries a sealstone, it will affect that enemy's own group.

SEALSTONE EFFECT ICONS

- Positive effect for bearer
- Negative effect for bearer
- Player-only effect
- Special effect
- Neutral effect (not inherently positive or negative)

Actions in the Field

SEALSTONE PLACEMENT

There are three kinds of places that can hold sealstones. Approach and investigate them to bring up the Sealstone Placement Menu. You can place sealstones on dais or in shells, or expend magic crystals (see P. 33) to restore a sealstone to a dais or spring.

DAIS

A dais holds sealstones. A sealstone placed on a dais will affect enemies in the area. Because earth veins connect dais to dungeons throughout the world, you can also use them to restore sealstones.

SHELL

You can place sealstones on shells, but because they are not connected to earth veins, area effects will not be activated.

SPRING

Springs cannot hold sealstones, but they may be used to restore them to the earth veins. Sealstones that have been restored may be accessed via springs in other dungeons. If you use the springs wisely, you can make your journey through even distant dungeons less dangerous.

SEALSTONE PLACEMENT MENU

From the Sealstone Placement Menu, you can pick up sealstones, restore sealstones, and view area affects on the map. You can also select a sealstone and press the  button to read the details for that sealstone.

The screenshot shows the Sealstone Placement Menu with the following components:

- Sealstone explanation:** A box pointing to the top of the menu.
- Sealstones in place:** A box pointing to the 'Fire Blessing' sealstone currently placed in the location, showing its name and cost (600).
- Sealstones held:** A box pointing to the 'Sealstones held' section, showing the name of the sealstone currently held (Fire Blessing) and its cost (600).
- Withdrawals left:** A box pointing to the 'Withdrawals left' section, showing the number of sealstones in the dungeon that can still be drawn from the springs (2).
- Current magic crystals:** A box pointing to the 'Magic crystals' section, showing the current amount (1100).

The menu also displays the following information:

- Sealstones in place:** Fire Blessing (COST 600) with effects: Fire Attack 150% and Ice Attack 1/2.
- Sealstones held:** Fire Blessing (COST 600).
- Dais:** Cotton Dust Wrath (COST 200).
- Current status:** Magic crystals: 1100, Withdrawals left: 2.

Actions in the Field

EXCHANGING SEALSTONES

You can exchange a sealstone in the hand with one placed on a dais or shell. Move the cursor to the sealstones held column and press the \otimes button to switch the sealstones. At springs, you can withdraw sealstones that have been restored.

RESTORING SEALSTONES

You can restore sealstones to the earth veins at daises and springs. Sealstones that have been restored can be withdrawn and used in other dungeons. Restoring a sealstone consumes a certain number of magic crystals.

- * Once a sealstone has been restored, you can remove and replace it as often as you like without spending any more magic crystals.

FULL MAP

You can open the full map (see P. 14) and check the range of sealstone area effects.

AREA EFFECTS

When a sealstone is placed on a dais, its effects are applied throughout the whole dungeon. If sealstones are placed on two daises, then both of their area effects are active. The range of area effects is limited, however, by divinity voids and empty daises. Use the map to check for differently colored zones, which indicate the range of area effects and the location of divinity voids.

DIVINITY VOIDS

In the dungeons, you will encounter special areas known as divinity voids. Be careful in these places—not only do they nullify area effects, but they also prevent Alicia from firing photons.

MENU EXPLANATION/ITEMS

Pressing the SELECT button in the field or on the World Map will open the Menu Screen. Various menus provide access to game functions.

MENU EXPLANATION

Use the directional buttons or left analog stick to select a menu to open.

SOME EXAMPLE ITEMS

Here is a short list of some of the more useful items and equipment you might come across in your adventures.

CONSUMABLE ITEMS

Warrior's Arcanum	Restores 300 HP to one character.
Dwarf Tincture	Restores 300 HP to the entire party.
Union Plume	Cures one character of Unconsciousness (see P. 36).
Elixir	Cures one character of almost all status ailments (see P. 36).

EQUIPMENT

Long Sword	A standard sword forged from iron. Increases ATK (physical attack power) by 6 points.
Short Bow	A standard, compact-size bow. Increases ATK by 6 and HIT (accuracy) by 2.
Leather Mail	Armor made from tanned leather. Affords good protection against lightning attacks. Increases RDM (reduction of physical damage) by 4 points.
Sallet	Open face helm which leaves the nose and chin uncovered. Increases RDM by 1 point.
Work Boots	Preferred boots of laborers. Increase RDM by 8 and RST (magic resistance) by 2.

ACCESSORIES

Beast's Fang	The razor fang of a carnivore. Increases HIT by 15%.
Great Eagle Heart	A crystal holding the intense lifeforce of a bird of prey. Increases ATK by 15%.
Black Crystal	A transient life, released from its corporal prison. Status levels go up when suffering from status afflictions.

OTHER

Flare Gem	A gem that releases a fire attack against one enemy.
Ice Gem	A gem that releases an ice attack against one enemy. May inflict Freeze (see P. 36) on the enemy.
Fireproof Trinket	Temporarily increases resistance to fire element magic.

EQUIP

Characters can equip up to nine different armaments and items—in their hand (weapon slot), on their head, body, arms, and legs, and in four accessory slots.

EQUIP

Select the character whose equipment is to be changed, and you will be taken to the Equipment Change Screen. First, select the equipment slot you want to change, and then select the item to equip from the list. While on this screen, you can press the L2 or R2 buttons to page through the different characters. You can also press the  button to view the link combinations you need to acquire skills, and to check how close you are to acquiring the skill (see P. 21 for more information on skills).

Abilities

Shows current ability values (see P. 26) for the selected character. When an item is selected, abilities that will increase are displayed in green, while abilities that will decrease are displayed in red.

Equipment grid

Displays the equipped items' color type and rune. Each grid has nine equipment slots.

Equipment

Lists the equipped items. The icons show where the item is equipped and its color type.

When selecting an item

Equipped items are displayed in yellow.

Skill information

Shows the effect of skills. Equipped rune combinations are also displayed.

COLOR TYPES

Swords, bows, and the like make up the different categories of equipment, but equipment can also be classified according to color type—red, green, blue, or colorless.

LINKS

When equipment of the same color type is placed in adjacent slots in the equipment grid, that part of the grid lights up. This is called a “link,” and it will boost the effectiveness of the equipment. In addition, certain combinations of runes for linked items will allow you to use skills (see P. 21).

Make all your equipment the same color, and you will be rewarded with a huge boost in effectiveness.

Menu

RUNES

Equippable items with **red**, **blue**, or **green** color types also have rune attributes attached to them. Runes are connected to skill acquisition. The icon indicates the type of rune.

Rune Types

 Slashing	 Bludgeon	 Piercing	 Head	 Arm
 Leg	 Body	 Fire	 Ice	 Lightning
 Earth	 Holy	 Darkness	 Creation	 Activation
 Training	 Healing	 Resistance	 Strengthening	 Weakness

CLASSES

Characters belong to certain classes, and this determines how they attack in battle and what kind of equipment they can use. Class also determines a character's attack range (see P. 30).

A character's class is indicated by the icon shown to the left of the character's level, or you can check the Profile option on the Status Screen menu (see P. 25).

Class

SKILLS

Skills are special abilities that will help you win battles. Skills must be set before they can be used. You can increase your skills by combining equipped item runes and fighting in battles.

SETTING SKILLS

Set the skills that you have acquired. You can set skills up to the character's maximum CP. When selecting skills, you have to consider both the character's CP and the CP cost of the skill. Maximum CP increases as the character levels up.

Set skills

Up to six skills can be set.

CP (Capacity Points)

Shows the character's maximum CP and the combined CP of presently set skills.

Skill list

Shows the name of the skill and the CP cost. Skills that are presently set are displayed in yellow, and newly acquired skills are displayed in green.

Skill information

Shows the effect of the skill and the rune combination needed to acquire it.

SKILL TYPES

Skills are broadly divided into the following five categories.

Status Skill	Affects a character's abilities (see P. 26).
Attack Skill	Activates when the character attacks an enemy.
Defense Skill	Activates when the character suffers an attack from an enemy in battle.
Critical Skill	Dramatically increases damage against certain enemies, and increases the chances of scoring a critical hit.
Reaction Skill	Activates according to how the character acts.

LEARNING SKILLS

To learn skills, you must equip certain combinations of item runes and win battles. Here's how you do it:

1. Activation

When you are equipping items, if you link runes in certain combinations (see P. 20), the rune icons will light up. When these runes are lit, the skill is activated. You can check your equipped rune combinations by pressing the  button on the Equipment Change screen (see P. 20).

* Simply activating a skill does not mean you can use it right away. You must first learn the skill.

2. Learning a Skill

Every time you win a battle while a skill is activated, the acquisition percentage will increase. You can view this percentage on the Equipment Change screen in the Skill Information window. When this number reaches 100%, you have learned the skill.

* The learned percentage only goes up while the skill is active. If you break the rune link by changing equipment before the skill is acquired, the skill will be deactivated and the learned percentage will not change until you reactivate the skill.

Currently active skills are displayed in yellow.

Keep winning battles to learn the skill.

3. Set

Once a skill has been learned, use the Set option to use it.

* You can only set learned skills. Activated skills cannot be set.

ATTACKS AND SEALSTONES

Select the normal attacks you want to use in battle, view sealstone data, and change the people in your party and the party formation.

ATTACKS

Change the attacking techniques (magic) that the character uses in battle (see P. 31). Place your selected techniques in the order that you prefer. You can change the order of the techniques later by pressing the **△** button.

Set Techniques (Magic)
You can set up to three techniques or one magic spell.

Technique (Magic) Data
Provides a description of the technique or magic, and shows the increase to the special attack gauge (see P. 33) when the character scores a hit.

Weapon Data
Shows the character's equipped weapon, special attack, or great magic (see P. 33), and the number of attacks (see P. 32).

Attack Technique (Magic) List
Lists the available attacks and the amount of AP (see P. 27) they consume. Techniques that are already assigned are displayed in yellow. Newly acquired techniques are displayed in green.

SEALSTONES

See which sealstones you are currently holding (see P. 15), and view details about the sealstones that you have carried previously.

* The Sealstone option will only appear in the menu once you've encountered sealstones.

SEALSTONE MENU

Holding	Shows the sealstones in your possession, their effects, and the number of magic crystals required to restore them. Press the ⊗ or △ button to view more detailed information.
List	View a list of all the sealstones you have held or restored. Press the ⊗ or △ button for more details. The ⊙ icon shows which stones have been restored.
Guide	Provides important information on the use of sealstones.

PARTY

Select party members and free the souls of einherjar who have reached the required level.

CONFIGURE

Change your battle party members and formation. First select the character in your battle party that you wish to move, and then select another character to switch positions. If you place the cursor over a party member and press the Δ button, the 2P icon will be displayed. This will enable two players to cooperate in battles (see P. 32).

* The party's leader (assigned to the \square button) cannot be removed or assigned to player two.

Battle Party

The characters that will participate in battles. Each character is assigned to a controller button.

2P Icon

Indicates the characters to be controlled by player two in a battle.

Alternate Characters

Lists the characters that will not participate in battle.

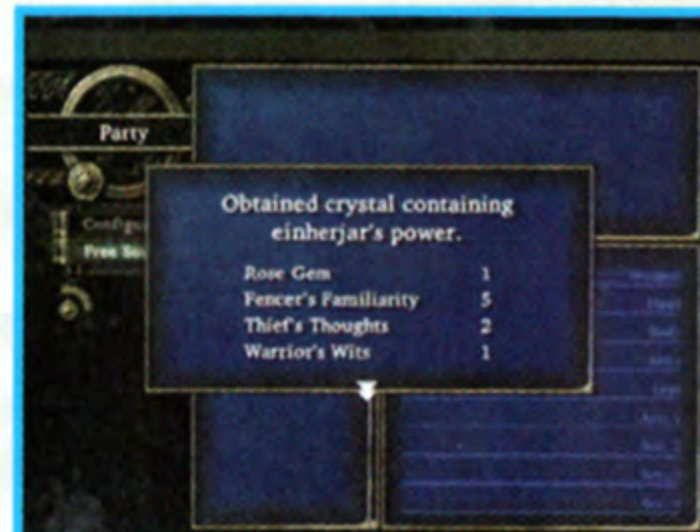

FREE SOUL

This option allows you to free the souls of your allied einherjar. Einherjar that have been freed go on to begin new lives as humans, but leave behind crystals with the power to increase status abilities. Note that when you free an einherjar, you will lose all the items that he or she has equipped (excluding accessories). However, if you release einherjar equipped with particularly powerful items, they may leave behind special items in addition to the crystals.

* You cannot free einherjar who are currently in your party or afflicted with a status ailment.

Only einherjar who have reached a certain level may be freed.

Einherjar are freed from your party, but leave behind crystals of power.

ABILITIES

A character's abilities indicate how powerful that character is in battle. You can improve a character's abilities by acquiring experience points in battle and leveling up, or equipping items that give you an ability boost.

Abilities

LV	Shows the character level. Levels increase as the character gains experience points in battle.
HP	Shows the character's life force. This number is reduced every time the character is hit with an attack in battle. When it reaches 0, the character falls Unconscious (see P. 36).
Exp.	Shows the character's accumulated experience points. Experience points are gained with victories in battle. After accumulating a certain number of experience points, the character's level will increase.
Next	Number of experience points needed to reach the next level.
STR	Character strength. Affects attack power.
INT	Character intelligence. Affects spellcasting power.
DEX	Character dexterity. Affects accuracy when attacking.
AGL	Character agility. Affects ability to evade enemy attacks.
CON	Character constitution. Affects ability to withstand attacks.
ATK	Physical attack power. The higher the number, the more damage is inflicted on the target.
MAG	Magic power. The higher the number, the more powerful spells become.
HIT	Attack accuracy. The higher the number, the more likely the character is to hit the target, and the greater the chance of inflicting a critical hit.
AVD	Ability to avoid enemy strikes. The higher the number, the better the character is at dodging attacks and escaping critical hits.
RDM	Ability to defend against physical attacks. The higher the number, the less damage is inflicted on the character when struck by a physical attack.
RST	Ability to defend against magic attacks. The higher the number, the less damage is inflicted on the character when struck by a magic attack.
Tolerance	Ability of the character to resist element attacks (see P. 35). The higher the number, the less damage the character will take from an attack of that element type.
Resistance	Ability of the character to resist status ailments (see P. 36). The higher the number, the less likely it is that the character will be afflicted with that status ailment.

Load

Select a file slot and load a saved game.

Battle

MOVEMENT

You will enter a battle when you touch or strike an enemy in the field.

Moving in Battle

Battle takes place on the battlefield. You can move your party leader anywhere within this area. On the battlefield, time passes with each action that your party members carry out. If you do nothing, time is frozen and the enemies will not act. You can use the right analog stick to control the camera and position it where you like. Press the L1 button to shift the camera to the same angle of view as the party leader. Hold down the button, and the leader and camera will turn to face the target.

Target Information

Target name and HP gauge. The  icon indicates the enemy leader.

Party Data
Shows party HP levels and attack buttons. The character with the white background highlight is the leader. When you split the group (see P. 29), the name plate colors will change. A status ailment icon is shown next to a character that is afflicted with Poison, Silence, Curse, Confusion, or Frailty (see P. 36).

AP (ACTION POINTS)

The AP gauge represents the party's ability to take action. The actions below all consume AP. You have a maximum of 100 AP. Attacks and spells cost AP according to the technique used, while using items and dashing consumes a set amount of AP.

RECOVERING AP

You can regain AP by walking around, being hit by enemies, or defeating enemies. You can also restore AP by pressing and holding the L3 button, but you cannot move or act during this time, so watch out for enemy attacks!

AP at the start of a battle

Initial AP levels will differ depending on how a battle begins.

Slashing at an enemy

Begin battle with 100 AP.

Touching an enemy

Initial AP may be 0 AP or 100 AP (varies randomly).

Touched from behind

Begin battle with 0 AP.

MOVEMENT

Use the left analog stick to control the movements of the party leader. The other members of the group will follow automatically.

DASHING

You can dash by pressing the R1 button. You may cancel a dash by attacking (see P. 30) immediately after a dash. This will allow you to avoid temporary vulnerability when you land. You can control the distance of the dash by how long you press the R1 button.

**Dash Distance**

Short	Tap the R1 button quickly.
Medium	Tap the R1 button twice quickly.
Long	Press and hold the R1 button.

Battle

CHANGING THE LEADER

Press the left or right directional buttons to change the leader.

Leader Highlight

The leader is indicated by a white background.

GO AFTER THE ENEMY LEADER!

Every enemy party has a leader—defeat it, and you will win the battle. The leader is stronger than the rest of the enemies, but focusing your attacks on it is the quickest road to victory. The red arrow points the way to the enemy leader. You can also identify it by its yellow HP gauge.

GROUP MOVEMENT

You can split your party into red and blue groups by pushing up or down on the directional buttons. Press left or right on the directional buttons to control a different group. Characters in different groups can act independently—splitting up your party is a great way to circle around enemies for a quick victory.

The white background highlight shows the group you are controlling.

By controlling groups separately, you can take down enemies faster.

EXTENSION GAUGE

As time spent on actions passes during battle, the extension gauge on the right-hand side of the screen gradually decreases. When you win a battle, you receive a number of magic crystals (see P. 33) proportional to the extension gauge.

RETREAT

The yellow belts shown on the battle map indicate Escape Points. These allow your characters to flee a battle. However, sometimes an attempt to flee fails. In this case, your AP gauge will fall to zero and you will be temporarily unable to move.

Escape Point

ATTACK RANGE

The ring that circles the characters shows their attack range. When an enemy comes within this area, the Target icon appears over its head and you may launch attacks against it.

ATTACKING

When an enemy target is within your attack range and you press the \odot , \triangle , \otimes , or \square button, the view changes to the Attack view (see P. 31). As well as normal attacks, you can also bring up the Battle Menu and use the spells or items listed there (see P. 34).

* Even if an enemy is within your attack range, the lay of the land may prevent you from hitting your target. Only characters whose buttons are flashing at the bottom of the battle screen are able to strike the target.

When the enemy enters the attack range, the attack buttons begin to flash.

Press the attack buttons to unleash attacks! The view shifts to the attack view.

SELECTING A TARGET

On the battle screen, press the L2 button to enter target mode, use the directional buttons to select a target, and then press the \otimes button to confirm the new target. (Depending on the battle, you may also be able to target objects and obstacles.)

* You cannot target off-camera enemies.

ENEMY ATTACK RANGE

The red area shows the enemy attack range. When the enemy is ready to strike, the color deepens and starts to flash. But if the enemy does not see the party, the attack range will not flash.

WHEN THE ENEMY ATTACKS

If one of your characters enters the enemy's flashing attack range, that character will be attacked. However, you can use dash to leap through the area and avoid attack.

If a character stands in the enemy's flashing attack range...

...the enemy will attack, and its strikes will inflict damage on the character.

ABOUT THE BATTLEFIELD

Depending on the dungeon, the geography of the battlefield may vary. Some battlefields are spread over different levels, or are obstructed by objects and corridors. Before diving into battle, make sure you know where all the enemies are, and plan your route with care.

ATTACKS

When you deliver an attack, or are attacked by an enemy, the view will shift to the attack view. Press the appropriate button to have a character launch an attack.

ATTACK VIEW

When characters are performing attacks, the camera shifts to a side view of the action.

FIGHTING WITH TWO PLAYERS

You can set up characters to be controlled by a second player via the Party option (see P. 24) on the Menu Screen. The second player can control the attacks for those characters. (Player one continues to control the movement of characters.) To play with two players, you will need two DUALSHOCK®2 analog controllers, plugged into controller port 1 and controller port 2.

ATTACKING

The , , , and  buttons are each assigned to a character in your party. Press the appropriate button to have that character launch an attack against the enemy target. You can press the button again for repeated attacks, and have the other characters in the party launch attacks in combination.

NUMBER OF ATTACKS

Each weapon that a character equips has a certain number of attacks associated with it. For each attack, you can strike as many times as the number allows. Note that for sorcerer-class characters (see P. 21), the equipped weapon does not affect the number of strikes the character can deliver.

ATTACKING ENEMY PARTS

Attacking and breaking off certain parts of enemies affects things such as break mode (see P. 33) and the items you acquire. The part of the enemy you attack depends on the attack technique or spell type.

The part being struck lights up.

Timing your strikes well

The speed and power of the strikes delivered by your characters varies depending on their class and attack techniques (see P. 23). The more successive hits you deliver against the enemy, the more the special attack gauge will increase. Watch the action closely, and carefully choose the timing and order of attacks.

Light warriors can deliver successive rapid attacks.

The incantation of spells takes some time, but they can deliver a range of devastating effects.

Battle

SPECIAL ATTACKS AND GREAT MAGIC

Special attacks and great magic are extra-powerful strikes that are only available with certain weapons. The type of attack varies depending on the character. Successful consecutive hits cause the special attack gauge to increase. When it reaches 100, you will see the message “SOUL CRUSH” appear. To launch the strike, press a button assigned to a character that can use special attacks.

When the gauge hits 100, press the attack button within the time limit.

The special attack is launched! The special attack gauge begins to build up again.

Special Attack Gauge

The gauge increases with every continuous hit, and falls when your attack is interrupted.

MIDAIR COMBINATIONS AND MAGIC CRYSTALS

You can earn extra crystals by launching an enemy into the air with an attack, and then hitting him with more strikes in midair. Magic crystals are used for restoring sealstones (see P. 17). They also give you bonus experience points at the end of a fight.

BREAK MODE

If you focus your attacks on an enemy's body part and succeed in breaking it, you may enter break mode. This will allow you, for a short time, to continue attacking without consuming any AP.

Break Mode Gauge

You can keep attacking until the break mode gauge runs down.

Keep attacking the same body part until it breaks. You will enter break mode!

Forget about AP! Just keep attacking as fast as you can.

BREAKING AN ENEMY'S BODY PART

Many monsters have weapons and armor equipped to certain body parts. If you knock off those parts, the enemy will be less likely to put up an effective fight. Smashing body parts will also reward you with extra items.

Acquired item

PURPLE GEMS AND KICKING THEM WHEN THEY'RE DOWN

If you keep attacking a fallen enemy, you can acquire purple gems and boost your AP gauge.

BATTLE MENU, ELEMENTS

Access the Battle Menu to use items, cast spells, or change weapons. Knowing what role elements play will help you win the tough fights.

BATTLE MENU

Press the SELECT button to bring up the Battle Menu. Press left or right on the directional buttons or left analog stick to select a character, push up and down to choose a menu item, and press the X button to complete the selection. Note that when you use an item or spell, or change weapons, the MENU icon will appear and you will be unable to access the Battle Menu for a short while. After a certain amount of battle time has passed (time progresses when you move and fight), the menu will become available again.

Battle Menu

Menu options that cannot be used are displayed in red.

Sealstone Effects

Sealstone effects that influence the party and enemies. Press the A button to toggle the display.

ITEMS

Using items consumes 15 AP. Select an item from the list, and then move the target mark to the character that will receive the effect.

* You cannot choose characters that are out of range.

MAGIC

Select a spell from the list and move the target mark to the character who will receive the effect. AP consumption varies by spell.

* You cannot choose characters that are out of range.

REARM

Select a new weapon from the list.

Battle

ELEMENTS

Elements are additional effects that are associated with certain weapons and magic. There are four natural elements and two magic elements that stand above them. Opposing elements increase the damage inflicted by an attack. For example, ice element attacks do great damage to fire element targets, while fire element attacks are highly effective against ice element targets. Learn your enemy's element to use his weakness against him.

ABOUT MAGIC

Menu Spells

You can cast many spells with a normal attack, but others are only accessible via the Battle Menu. These “menu spells” have a greater range than normal attack spells, and can be used to heal allies or attack multiple enemies.

* When using menu spells to attack the enemy, the screen does not shift to the attack view.

Elements and Magic

Spells have distinct characteristics depending on their element.

Fire	Power depends on caster's MAG and target's RST.
Ice	Power depends on caster's level. Target's RST is a minor factor.
Earth	No particular strengths or weaknesses. Standard magic.
Lightning	Regular damage is low, but the chance of delivering a crushing critical hit is higher.
Light	Power depends on caster's MAG and target's RST.
Dark	Power depends on caster's level. Target's RST is a minor factor.

BATTLE: STATUS AILMENTS, BATTLE RESULTS

A look at the status ailments that enemy attacks may inflict on your party and the information provided at the end of a battle.

STATUS AILMENTS

There are two main types of status ailments.

Battle-only ailments

These ailments only affect characters during a battle. They can be cured by certain items, spells, or by the passage of time.

	Confusion	The victim is temporarily befuddled, and is unable to act.
	Paralysis	The victim is temporarily immobilized, and is unable to move.
	Stone	The victim is temporarily turned to stone, and is unable to move.
	Faint	The victim temporarily loses consciousness, and is unable to move.
	Freeze	The victim is temporarily frozen, and is unable to move.
	Transfer	The victim is transferred away from the battlefield, and is unable to participate in the fight.

Ailments that persist after battle

These ailments continue to affect characters after a battle. They can be cured by certain items or spells.

	Poison	The victim is infected by poison, and loses HP at a steady rate until cured.
	Silence	The victim is silenced, and unable to use any magic.
	Curse	The victim is cursed, and is unable to change any equipment.
	Frailty	The victim is rendered frail, and is unable to recover any HP.
	Unconscious	When HP falls to 0, the victim falls unconscious. Unconscious characters cannot fight battles.

BATTLE RESULTS

When the enemy leader is defeated, the battle is over and the results are shown onscreen. Here you can see how much experience and OTH (game currency) you earned from the battle. Also, you may receive bonus experience points according to the number of magic crystals you acquired. Furthermore, you will find out if any of your party members have leveled up or gained new techniques.

Game Over

When everyone in your party has been afflicted by Stone, Paralysis, Freeze, Transfer, or Unconsciousness, the game is over.

Game Glossary

VALKYRIES

The three goddesses of fate. Granted the power to gather the souls of the dead, they transfer these souls to Valhalla for the use of their master, Lord Odin. Valkyries are known to mortals by many names: Battle Maiden, Defender of the Fallen, and many more. Only a single valkyrie is meant to walk the world at any one time, but with the awakening of Silmeria, the old laws have been broken.

EINHERJAR

A human soul, bereft of its living body. Einherjar are mortals whose souls are gathered at death by the valkyries. There are many such souls sealed within Silmeria, and because she shares a body with Alicia, they are inside Alicia, too.

ASGARD

The world of the Aesir, ruled over by Odin, the lord of the heavens. The Aesir are in conflict with their fellow gods, the Vanir. The Aesir sometimes intervene in Midgard in order to preserve the order of the universe.

MIDGARD

The world where humans live. It is a place stricken by war, famine, and disease, where death's icy touch is never far away. Midgard is sometimes transformed by the interventions of the gods, but the Kingdom of Dipan is preparing to fight them in order to resist such interference.

ODIN

The highest of the gods, Odin rules from his throne in Valhalla. He has ordered the valkyries to collect the souls of warriors in preparation for Ragnarok, the great war at the end of time.

HRIST

The eldest of the three sisters of fate. Under the command of Odin, she is in pursuit of her traitorous sister, Silmeria. To restore Silmeria's spirit to its proper place, she aims to destroy Silmeria's host, Alicia.

LENNETH

The second oldest of the three sisters of fate. Like Silmeria, her spirit is kept sealed away somewhere in the world of men.

Limited Warranty

The following warranty and support information applies only to customers in the United States and Canada, and only to original consumer purchasers of products covered by this warranty.

LIMITED WARRANTY

Square Enix, Inc. (“SEI”) warrants to the original purchaser of the enclosed product (the “**Product**”) that the media containing the Product (which includes any replacement media provided under this warranty) will be free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase (the “**Warranty Period**”). SEI’s entire liability and your exclusive remedy under this limited warranty shall be, at SEI’s option, repair or replacement, without charge, of the whole or affected portion of any Product that proves to be defective in material or workmanship during the Warranty Period.

EXCLUSIONS FROM WARRANTY

This warranty applies only to defects in factory materials and factory workmanship. Any condition caused by abuse, unreasonable use, mistreatment, neglect, accident, improper operation, destruction or alteration, or repair or maintenance attempted by anyone other than SEI is not a defect covered by this warranty. Parts and materials subject to wear and tear in normal usage are not covered by this warranty.

IMPLIED WARRANTIES AND INCIDENTAL AND CONSEQUENTIAL DAMAGES

Under state or provincial law, you may be entitled to the benefit of certain implied warranties. ANY APPLICABLE IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WILL CONTINUE IN FORCE ONLY DURING THE WARRANTY PERIOD. Some states and provinces do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

NEITHER SEI NOR YOUR RETAIL DEALER HAS ANY RESPONSIBILITY FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES RELATING TO YOUR USE OF THE PRODUCT, INCLUDING, WITHOUT LIMITATION, ANY DAMAGES FOR LOSS OF DATA OR LOSS OF PROFIT, OR FOR ANY INCIDENTAL EXPENSES, LOSS OF TIME, OR INCONVENIENCE. As some states and provinces do not allow the exclusion or limitation of incidental or consequential damage, the foregoing limitation or exclusion may not apply to you.

HOW TO OBTAIN WARRANTY SERVICE

To obtain warranty service, please send the defective Product, together with a copy of your original sales receipt, your return address, name and telephone number, should contact be necessary, and a brief note describing the defect to SEI at the following address: Square Enix, Inc., Customer Warranty, 999 N. Sepulveda Blvd., 3rd Floor, El Segundo, CA 90245. THE DEFECTIVE PRODUCT MUST BE POSTMARKED WITHIN NINETY (90) DAYS FROM THE DATE OF PURCHASE. PROOF OF PURCHASE IN THE FORM OF A DATED RECEIPT MUST BE INCLUDED TO OBTAIN WARRANTY SERVICE. The shipping costs for sending the defective Product to SEI is a sole responsibility of the Customer. SEI will not be liable for any damage or loss that occurs during shipping. To minimize loss during shipping, you may opt to use a trackable shipping method.

If you have warranty questions, you can also contact our Customer Warranty department at (310) 846-0345 during the following hours of operation: Monday – Friday 9:00 am – 6:00 pm, Pacific Standard Time.

CUSTOMER SUPPORT
