GAME SCREEN

MOMENTUM METER

The bar around your Superstar represents their built up Momentum. The bar starts out light green and turns white with a yellow "S" at the signature stage progressing to a flashing blue bar with a red "F" for the finisher stage. Once a Superstar's Momentum meter has reached white with a yellow "S", they can start pulling off signature moves. After successfully pulling off a signature move, a Superstar may then perform a finishing move. Alternatively, a Superstar may use a finisher move if their Momentum is maxed out. To build Momentum, perform successful attacks or taunts against an opponent. Beware of repeating the same action, as this will reduce a Superstar's Momentum.

NEW KICK-OUT METER

An all-new kick-out meter now appears during pins. You can kick out of pin attempts one of two ways. Rapidly pressing , , , or  will cause the gauge to fill. Once the gauge has reached the designated target zone the Superstar will kick out of the pin. The other method involves holding , , , or  to fill the gauge and reach the target zone. Release the button once the target zone has been reached to kick out of the pin.

NOTE: Last year's kick-out meter can be used instead by selecting it in the Match Rules option menu.

SUPERSTAR ABILITIES

DIRTY PIN

Pin an opponent near the ropes to automatically trigger a Dirty Pin. The Superstar winds their legs through the ropes, adding leverage to their pin.

EVASIVE DODGE

Press **R2** and move the left analog stick to perform an evasive roll out of harm's way.

LOCK PICK

Press **△** when caught in a struggle submission to instantly escape the hold. Using this ability consumes some of your Momentum. If you do not have the necessary amount of Momentum, you will be unable to trigger the ability.

REFEREE SHIELD

Approach the referee and hold **X** to use him as a human shield. While hiding, the left analog stick can be used to walk and/or aim the referee. Releasing **X** will cause the Superstar to shove the referee forward.

MOVE THIEF

Hold **R1** and press **△** to steal your opponent's signature or finishing move. Your Momentum must be in a signature or finishing move state and you must be in your opponent's correct signature/finishing move situation in order to give your opponent a taste of their own medicine.

TAUNT THIEF

With a full Momentum meter, hold **R1** and press any direction on the directional buttons to steal your opponent's taunt. If the taunt is performed without interruption, the move will suck up your opponent's confidence. The opponent becomes temporarily lethargic and will not be able to gain any Momentum until the effect wears off.

NOTE: To use Taunt Thief during a Royal Rumble, make sure you have at least one finisher stored before attempting to steal a taunt.

HAMMER THROW

Press and hold **○** to perform a more powerful variation of the Irish Whip.

OBJECT SPECIALIST

While holding a foreign object, move the right analog stick to perform an object based grapple attack. Below are a few more painful things that can be performed using this ability:

- While holding a chair, approach the upper body of a face-up opponent and press **X** to place the chair around the defender's neck. Next, press **□** to stomp on the chair.
- While holding a chair, approach the upper body of a face-down opponent and press **X** to place the chair underneath the opponent's face. Next, pick up another chair, approach the opponent's upper body and press **□** to perform a powerful "Con-Chair-To" attack.
- While holding a chair, approach the lower body of a face-up opponent and press **X** to affix the chair around the defender's ankle. Next, press **□** to stomp on the chair.
- While holding a ladder, press **R3** to prop the ladder on your shoulders. Rotate the right analog stick to perform a ring clearing helicopter attack.

RESILIENCY

Superstars with this ability are very difficult to pin and submit. The ability kicks in automatically when a pin or struggle submission is attempted.

DURABILITY

When prompted, press and hold **△** to regenerate your damaged limb or limbs' health.

HARDCORE RESURRECTION

While holding a chair, press **△** to bash the metal object into your Superstar's skull to earn them a full Momentum meter in addition to regenerating a moderate amount of health. This ability can only be used once per match.

KIP-UP

When prompted, press **△** when your Superstar is grounded to perform a Kip-Up. The Superstar/Diva will quickly stand up and be rewarded with a full Momentum meter. This ability can only be used once per match and it does not become available for use until the Superstar has sustained critical limb damage.

FAN FAVORITE

When the Momentum meter is in a non-finisher state, hold **R1** and press any direction on the directional buttons to perform a special taunt to get the crowd pumped up and on your side. The Superstar is then rewarded with a full Momentum meter. This ability can only be used once per match.

OUTSIDE DIVES

When the opponent is standing outside of the ring, approach the ropes and move the left analog stick toward the opponent, then press **□** to perform an aerial dive outside of the ring. Dives to the outside can also be performed from a run. While inside the ring, run toward the opponent that is outside the ring and press **□** when you near the ropes.

SPRINGBOARD DIVES

While inside the ring, move the left analog stick toward the ropes and press **□** to perform a Springboard Dive. Springboard Dives can also be performed from a run. Run the Superstar/Diva into the ropes and as their back makes contact move the left analog stick toward the ropes and press **□**.

Springboard Dives can even be performed from the turnbuckle. Run toward the corner and press **□** before touching the turnbuckle to perform the attack. Springboard Dives can also be performed while standing on the outside apron by moving the left analog stick toward the opponent and pressing **□**.

POSSUM PIN

Successfully reverse your opponent's pin attempt to ensnare them in a Possum Pin.

FIRED UP

Fired Up allows a Superstar to perform their finishing move up to three times! When the Superstar's Momentum is full, hold **R1** and press **△**. This ability can only be used once per match.

NOTE: *Fired Up works differently in a Royal Rumble. To activate, hold **R1** and press **△** when the Superstar does not already have a stored finisher.*

RING ESCAPE

When a Superstar is grounded near the ropes, Ring Escape allows them to quickly exit the ring and avoid further attacks. Hold **L1** and move the left analog stick to quickly roll out of the ring. Using Ring Escape costs the Superstar Momentum, so use it sparingly. If the Superstar does not have the required amount of Momentum they will not be able to use the ability.

EXPLODER TURNBUCKLE ATTACK

Run toward an opponent that is perched on the turnbuckle and move the right analog stick when near them.

PULL-BACK ATTACKS

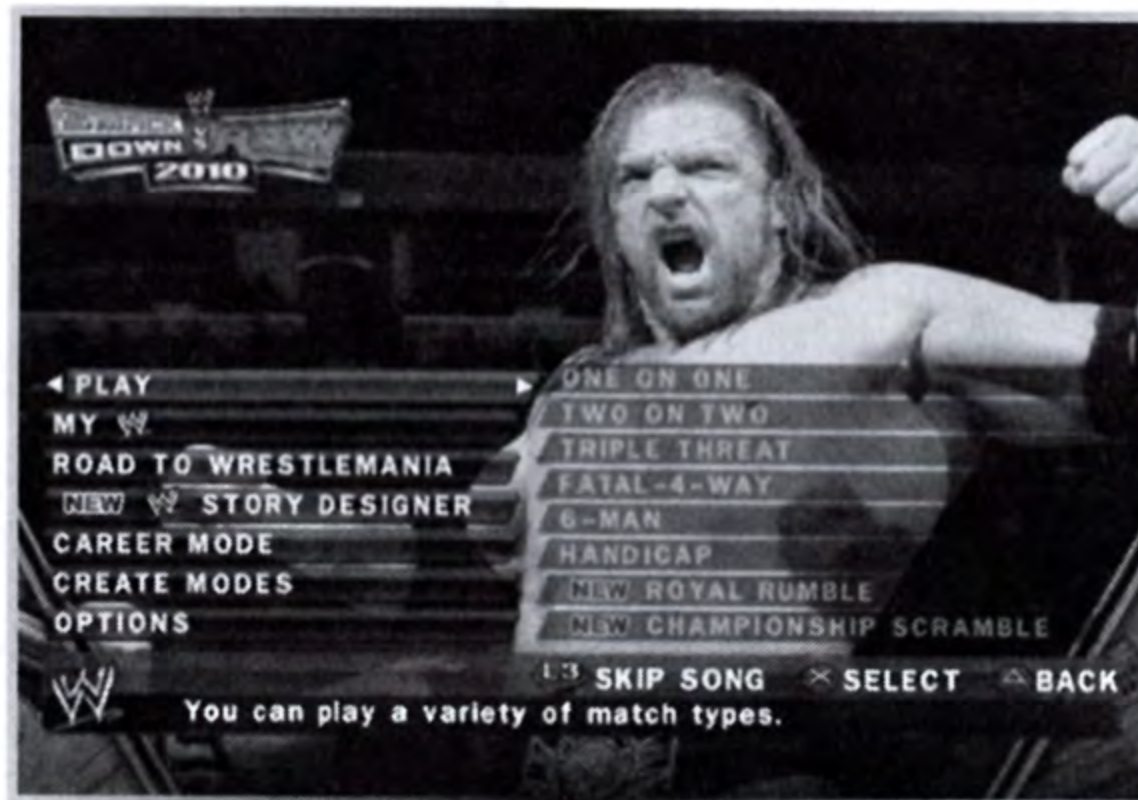

Before releasing the opponent during an Irish Whip, press , or move the right analog stick, to pull them back in for a strike or grapple attack.

STRONG STRIKE

Press and hold  while moving the left analog stick to perform a powerful strike attack. Strong strikes can only be used against a standing opponent.

ENTERING THE RING

Press  at the Title Screen to be taken to the Main Menu. From the Main Menu you may access **PLAY**, **MY **, **ROAD TO WRESTLEMANIA**,  **STORY DESIGNER**, **CAREER MODE**, **CREATE MODES**, and **OPTIONS**.

GAME MODES

Enter PLAY mode to jump straight into some of the WWE's most electrifying events. Enter the Steel Cage, face the Inferno, or enter your Superstar in over 70 other different match types. To enter a match, first pick the game mode you would like to compete in: One on One, Two on Two, Triple Threat, Fatal-4-Way, 6-Man, Handicap, *Royal Rumble*, or Championship Scramble. Next, select from one of the sub-categories that include Ladder, Iron Man, Table, Hell in a Cell, and many more.

ROAD TO WRESTLEMANIA

Are you ready for the main event? Experience the highlight of the WWE season in *Road to WrestleMania*. Select a Superstar or create your own and pin your way to glory. Choose to follow the gripping storylines of your created Superstar, Edge, Shawn Michaels, Randy Orton, Triple H, John Cena, or Mickie James in single player mode or step into the role of Brand Warfare in co-op mode. Follow the Superstar's career through the long and winding *Road to WrestleMania* and take part in all the drama, action, and surprises that WWE has to offer.

CAREER MODE

Enter the role of a Superstar and step into the WWE spotlight. Career Mode lets you manage and play every aspect of a Superstar's career from start to finish. Create matches, chase titles, form rivalries, and experience much more as you rise toward stardom.

All facets of a WWE Superstar's career are here for you to experience. You'll compete in matches to take down other Superstars and increase your own Superstar's notoriety. As you progress, your Superstar's attributes level up and your stats in the ring are tracked throughout all of your matches. Continuing through the career, new matches are unlocked and new opponents enter the ring. Once you are the No.1 Contender, you can challenge the champ for the title. Just remember, every other Superstar is just as hungry for that championship and some will stop at nothing to get the ultimate prize.

NOTE: *If you have created a custom Superstar, use Career Mode to boost their overall ratings.*

ROYAL RUMBLE

Royal Rumble has been revamped for **WWE SmackDown vs. Raw 2010** to provide more of the in-depth, frenetic action that you crave. There are two new points of elimination to use on your opponents. You can now toss opponents over the apron, out and over the corner, or dump them beneath the ropes. To eject an opponent, grapple them near the ropes to enter an all-new mini-game, exclusive to *Royal Rumble*. Once the mini-game starts, follow the on screen instructions to toss out the opponent, just make sure that you don't end up on the wrong side of the ropes. *Royal Rumble* can be played in three different modes: 10-man, 20-man, and 30-man.

NOTE: Contrary to other match types, the ringed meter underneath the Superstar's feet during the *Royal Rumble* is the Superstar's health, not their Momentum. As the Superstar takes damage, their meter will begin to shrink. Superstars are able to regain a small amount of health by eliminating other Superstars.

ROYAL RUMBLE CONTROLS

CHAMPIONSHIP SCRAMBLE

This mode of gameplay presents an excellent complement to *Royal Rumble*. The matches are timed at a moderate 5 minutes, extreme 10 minutes or a brutal 20 minutes. Opponents are chosen from the pool of Superstars, or from your own custom characters. Once selected, two opponents will begin the match, followed by the rest of the combatants at timed-intervals. There is no set elimination for this mode of gameplay. The match continues until time expires. Use all of your brute force, grab objects from beneath the ring and unleash signature moves to subdue your opponents.

Play for a number of different titles, including the World Heavyweight Championship, ECW Championship, Divas Championship and the WWE Championship. Do you have what it takes to be a champion?

CHEAT CODES

Enter your cheat codes here to unlock content or access hidden items.

Access My  to enter Superstar Management, Team Management or Rivals.

SUPERSTAR MANAGEMENT

Use Superstar Management to manage your Superstars by changing their settings, manipulating their fan reaction and switching up their brand. You can also manage the settings of your custom-designed players.

TEAM MANAGEMENT

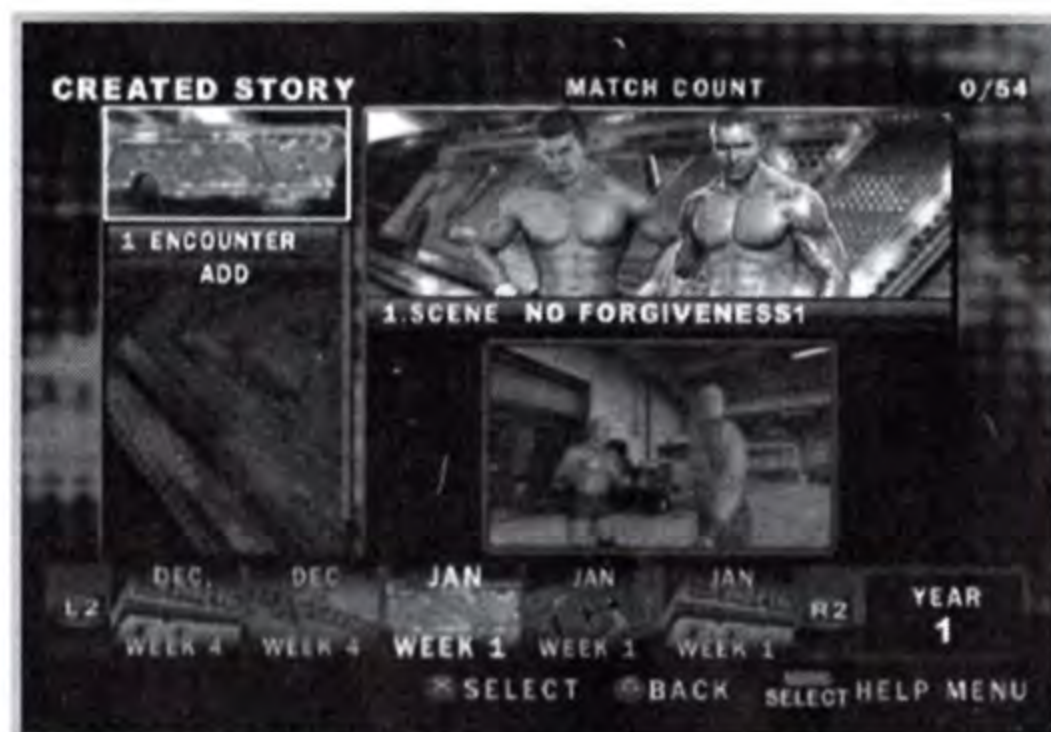

Edit the individual tag teams. Merge similar players with identical abilities to create powerful allies, or switch teams up for players who complement each other. You have to decide whether power or balance works the best (however, players have a counter to their ability). Your Superstar is only as good as the buddy who tags him in.

RIVALS

Rivals is a new mode that allows you to edit how certain Superstars react to one another. Create alliances between weaker Superstars, or a confederation of all-powerful behemoths. Change their brands to reflect their loyalties (however, don't confuse alliances with loyalty). All Superstars will still attack one another. There can only be one champion.

NEW **STORY DESIGNER**

Use the all-new story designer to inject your own brand of WWE entertainment into the main event. Plan and create all-new original stories by choosing to add story events between matches or even during matches. Pick your Superstars, and then customize the story event anyway you like it.

CREATING A STORY

Selecting an Event

To start creating a story, pick the event/date when you would like your story to take place then select EDIT to start customizing. Alternatively, if you have already created a story, you may copy it to another date using the COPY / PASTE feature. After selecting a date, choose to add either a Scene Creation or a Match Creation. Scene Creations take place outside of the ring while Match Creations take place in the ring, during the main event.

Scene Creation

In Scene Creation, you can create the off-site drama that fuels the chaos taking place inside the ring. Edit the Superstar animations, locations, and cast to start a basic story. After setting up the scene, enter the ADVANCED EDITOR to adjust the scenes length, text, emotions, TitanTron, music, camera angle, and the end of the show logo. After all your edits are complete, select ACCEPT to save the changes and apply the Scene Creation to the corresponding date.

When you first access the Scene Editor, a default scene is already loaded and ready to be customized. To make the scene your own, you will want to spend time going through every toolset to make the scene match your directorial vision. Below is a list of all the toolsets at your disposal:

ANIMATION

The Animation menu holds a library of animations to be used for your Scene Creation. Animations are sorted first by situations and then by specific actions. After selecting a situation and an action, you can instantly see your scene play out in the scene viewer to make sure that it is the animation that you are looking for.

LOCATION

There are over 20 locations to choose from in *WWE SmackDown vs. Raw 2010*. You may select to either hold your Scene Creation inside the arena or backstage. After choosing a general location, you may then select which arena to use or what part of the backstage area you would like to use.

CAST

The entire roster of *WWE SmackDown vs. Raw 2010* is ready to enter the ring in Scene Creation. Depending on the animation the cast may call for up to five Superstars at a time. To select which Superstars you want participating in your story, select each cast member and then choose the appropriate Superstar from the Character Select menu.

ADVANCED EDITOR

Advanced Editor is where you may tweak and refine settings that turn the average Scene Creation into a legendary one. Settings in Advanced Editor include Adjust Length, Text, Emotion, TitanTron, Music, Camera, and End of Show Logo.

Adjust Length: Set the chapter to begin playing the animation and the chapter to stop it.

Text: Add text by first selecting a Superstar to speak. After you have your Superstar selected, input the text and then add it to one of the six scenes in Scene Creation. Text can be added to multiple Superstars and scenes.

Emotion: Select the emotion for each of the Superstars involved in the current scene.

TitanTron: If your story is taking place in an arena, you may access the TitanTron menu and place a stock video onto the screen.

Music: Access the Music menu to select what song you would like to play while your scene takes place.

Camera: Inside the Camera menu, you may use the Free Camera option to set up a new camera angle or select Default to reset the camera angle.

End of Show Logo: Place a WWE End of Show Logo at the end of your scene with this tool.

After you are done directing your Scene Creation, use the ACCEPT option to save your story to the selected date/event.

MATCH CREATION

In a Match Creation, you set up the parameters that dictate the events within a certain match. You can select everything from the Superstars down to the match conditions to create the ultimate ring showdown. To customize a Match Creation, alter the options within Match Type, Superstars, Match Options, and Match Conditions.

MATCH TYPE

Select from one of the many match types to use in your Match Creation. Will your story be a bloody TLC Match or a legendary *Royal Rumble*?

SUPERSTARS

Select the Superstars and Managers (if applicable) to compete in your match. When selecting a Superstar, press  to adjust their starting health.

MATCH OPTIONS

Match Options offer a plethora of choices to customize your match. Turn K.O.s ON or OFF, decide whether or not to allow interference, and much more. Match Options allows you to make sure your match is like no other.

MATCH CONDITIONS

After selecting your Match Options, it's time to finalize the Match Creation by creating its conditions. Choose difficulty, arena, victory scene, and win conditions to outline the match's parameters and then lastly, select any Superstars if interference is planned.

CREATE MODES

Enter Create Modes to customize *WWE SmackDown vs. Raw 2010* to match your inner Superstar.

CREATE A SUPERSTAR

If you're finding that none of the standard WWE Superstars quite match your style, then enter CREATE A  SUPERSTAR mode to form a whole new Superstar. Customize body types, appearances, threads and more. Once your Superstar is ready, enter the ring and challenge the world.

Create a new Superstar or Diva from scratch, or used pre-made templates to save some time. After you've finalized your character's appearance, take it a step further with a player biography. You can also edit existing player profiles or copy your template to the memory card (8MB)(for PlayStation®2). Base a character on your own features and dominate the world of pro-wrestling.

CREATE A FINISHER

Create an all-new finisher in CREATE A FINISHER mode. You may either construct a front-grapple or diving attack and then take it to the ring to unleash hell on your opponent. Created Finishers may be applied through the CREATE A MOVE-SET option.

CREATE AN ENTRANCE

Enter CREATE AN ENTRANCE to bring match opening excitement to all-new heights. Choose Easy or Advanced creation to customize your options and then create everything from the motions down to the fireworks to make sure that your arrival is heard loud and clear. Entrances can be created for Superstars, Created Superstars, or Teams.

CREATE A MOVE-SET

Choose to CREATE A MOVE-SET for a Superstar or Created Superstar. From here, you may swap any Superstar's moves for another's and create a whole new arsenal of attacks to utilize.
