

WINTER SPORTS

THE ULTIMATE CHALLENGE 2008

⚠ WARNING: PHOTSENSITIVITY/EPILEPSY/SEIZURES

READ BEFORE USING YOUR PLAYSTATION®2 COMPUTER ENTERTAINMENT SYSTEM.

A very small percentage of individuals may experience epileptic seizures or blackouts when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or when playing video games may trigger epileptic seizures or blackouts in these individuals. These conditions may trigger previously undetected epileptic symptoms or seizures in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition or has had seizures of any kind, consult your physician before playing. IMMEDIATELY DISCONTINUE use and consult your physician before resuming gameplay if you or your child experience any of the following health problems or symptoms:

- dizziness
- altered vision
- eye or muscle twitches
- loss of awareness
- disorientation
- seizures
- any involuntary movement or convulsion

RESUME GAMEPLAY ONLY ON APPROVAL OF YOUR PHYSICIAN.

Use and handling of video games to reduce the likelihood of a seizure

- Use in a well-lit area and keep as far away as possible from the television screen.
 - Avoid large screen televisions. Use the smallest television screen available.
 - Avoid prolonged use of the PlayStation 2 system.
Take a 15-minute break during each hour of play.
 - Avoid playing when you are tired or need sleep.
-

Stop using the system immediately if you experience any of the following symptoms: lightheadedness, nausea, or a sensation similar to motion sickness; discomfort or pain in the eyes, ears, hands, arms, or any other part of the body. If the condition persists, consult a doctor.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PlayStation 2 system to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

HANDLING YOUR PLAYSTATION 2 FORMAT DISC:

- This disc is intended for use only with PlayStation 2 consoles with the NTSC U/C designation.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

GETTING STARTED

Set up your PlayStation®2 computer entertainment system according to the instructions supplied with your system. Check that the system is turned on (the on/standby indicator is green). Insert the Winter Sports 2008 disc in the system with the label side facing up. Attach game controllers and other peripherals as appropriate. Follow the on-screen instructions and refer to this manual for information on using the software.

Memory Card (8MB)(for PlayStation®2)

To save game settings and progress, insert a memory card (8MB)(for PlayStation®2) into MEMORY CARD slot 1 of your PlayStation®2 system. You can load saved game data from the same memory card or any memory card (8MB)(for PlayStation®2) containing previously saved games.

STARTING UP

DUALSHOCK®2 ANALOG CONTROLLER CONFIGURATIONS

PREFACE

Welcome to the world of winter sports! Winter Sports 2008 invites you to go for records in nine main disciplines: Alpine Skiing, Ski Jumping, Speed Skating, Cross-Country-Skiing, Bobsleigh, Luge, Skeleton, Figure Skating and Curling. Compete with your friends by playing one after the other or by using a Split-Screen to face each other directly. Or challenge the computer and attain the highest position on the victory rostrum!

INTRODUCTION

Set up your PlayStation®2 console as described in the instructions manual. Connect the analog controller (DUALSHOCK®2) and any other attachment BEFORE you switch on the console.

Switch ON the console by pressing the MAIN POWER switch.

Press the  /RESET button. If the  indicator is green, press the  button to open the disc tray.

Insert the RTL Winter Sports 2008 disc with the label side facing up into the disc tray. Press the  button to close the disc tray.

Follow the on-screen instructions and read the instruction manual

Before starting the game please make sure you have enough free space on the MEMORY CARD (8MB) (for PlayStation®2). Also make sure that the MEMORY CARD (8MB) (for PlayStation®2) is in MEMORY CARD slot 1 so that it can save your game scores.

This title does not support the digital controller.

MAIN MENU

COMPETITIONS

In the Main Menu, select the ice cube to see the competitions. The different competitions you can choose from will appear on the next screen. These are the Competition 15, Competition 7, Virtual Competition, and Classic Competition. If you choose Competition 15, Competition 7, or Classic Competition, you get to the next screen which displays three ice cubes. You can start the competition with the left ice cube, select the degree of difficulty with the ice cube in the middle, and select the number of player settings with the right ice cube. For creating your own Competition, please refer to chapter “Virtual Competition”.

MAIN MENU

When you determine the number of players, you can either choose the Single Player Mode or the Multi-player Mode, in which up to 4 players compete with each other. There is also a Split-Screen Mode, which allows two players to compete directly with each other, with one player using the upper half of the screen, the other one the lower

half. Your rival being displayed in your own half of the screen as a “Ghost”, you can see his position at any time in the competition. You can play the Split-Screen Mode in a competition as well as in a single discipline.

COMPETITION – 15 EVENTS

In this mode you compete in 15 events. Your rank and the presentation ceremony are displayed after each event. You get three points for a gold medal, two for silver, and one for bronze. The number of points you have gained in a competition determines the players’ place in the ranking.

COMPETITION – 7 EVENTS

In this mode you compete in a selection of 7 events. Your rank and the presentation ceremony are displayed after each event.

CUSTOMIZE COMPETITION

In this mode you can create your own competition, choosing from the single events available. Your competition can comprise a maximum of 16 disciplines. You can also choose one event several times.

VIRTUAL COMPETITION

In this mode you can create your own competition, choosing from the single events available. Your competition can comprise a maximum of 18 disciplines. You can also choose one event several times. For each line, choose the discipline of your choice, then confirm when you have finished.

C A M P A I G N

In Campaign Mode you can prove your skills. Show us what you are capable of! The different challenges are arranged as combs. When a comb is selected, the description of the challenge and the current record is displayed. The player starts in the centre. The six adjacent combs are unlocked from the beginning. With every challenge you master the adjacent challenges are unlocked. In the six Boss-Challenges, the player competes against the records of a Boss-Opponent. These Challenges are unlocked, if the challenges on all six sides of the comb are finished. Mastering the Boss-Challenges will unlock the extreme level of difficulty. Finishing a Boss-Challenge unlocks one of six “Super-Challenges” (located on the outside of the comb). Mastering all “Super-Challenges” will unlock the classic competition in the competitions menu. Every challenge can be replayed unlimited times. High scores are not taken into the records table.

C A R E E R

You can choose an athlete and a nationality to proceed through the career mode. There are 3 leagues you have to win until you reach league 1 which means a total of 4 leagues can be played. Each league consists of 2 competitions. The first one is competition 7, the second one is competition 15. You get to a higher league by winning competition 15. If you don't win competition 15 you will have to play the whole league again which gives you the chance to gather more experience points.

MAIN MENU

Depending on your rank, you will be awarded experience points. You can distribute your experience points to every one of the playable disciplines. Experience points improve your athlete in different ways depending on the discipline. High scores are not entered into the records table.

To save your progress in the game, quit your Career, go to the Options Menu and select 'Save Game'. In order to continue your Career where you left it, load the saved game under 'Load Game'.

SINGLE EVENTS

If you have opted for Single Disciplines in the Main Menu, you will first see the list of the sports at your disposal. After selecting one sport, you can choose the discipline. Then you get to the next screen. Before starting the event with the left ice cube, you can select the degree of difficulty with the second ice cube and set the player settings with the right ice cube. First set the number of players, then enter a name for the players and choose their nationality. With the third ice cube, you can set the venue. However, this option is only possible after you have unlocked the Classic Competition.

Note: You can change the camera perspective in every discipline by pressing the $\triangle$ button. You can also pause the game at any time by pressing the START button to go to the Menu and look at the instructions.

ALPINE SKIING

There are four different alpine events in Winter Sports 2008: Downhill, Super-G, Giant Slalom, and Slalom. Each discipline has its own feeling of control. In Downhill and Super-G, speed is most important whereas in Slalom the right rhythm makes all the difference. Slalom and Giant Slalom are the technical disciplines.

Controls

Start: At the start, the player has to push himself off with as much power as possible by pressing the $\times$ button at the right time, when the ball is shown in the lower centre of the start display. Good timing can be worth some tenths of a second.

Race: Press the $\times$ button to crouch in order to gain speed. Use the left analog stick to steer left or right. Press the $\bigcirc$ button to carve.

Note: The number of permitted gate faults depends on the respective degree of difficulty (easy = 5 faults; Medium = 3 faults; hard = 0 faults). If you commit more faults than are permitted you are disqualified!

SKI JUMPING

In Ski Jumping you can choose between Normal Hill and Large Hill. The Large Hill has a longer inrun so that you can achieve longer distances than on the Normal Hill.

Controls

Start/Inrun: The windsock indicates wind direction and wind speed. Start the event by pressing the $\times$ button. Push off from the starting bar by pressing the $\times$ button to start the approach-run. There is an arched bar with a ball in its middle at the bottom of the screen. Keep your skier's balance by keeping the ball on the apex of the arch using the left analog stick.

Take Off: At the end of the ski jump the arched bar fills up from both sides. You can take off by pressing the $\times$ button. For long distances you have to take off as late as possible – but make sure not to miss the end of the jump table! The opening and closing of the skis is done automatically in the easy level of difficulty. In levels "Medium", "Hard" and "Extreme" you need to go into the V position by moving the left analog stick backwards.

Flight/Landing: Keep your skier's balance like you did on the inrun by keeping the ball in the middle of the bar by using the left analog stick. The lower the skier gets, the more the display fills up with a vivid white bar.

MAIN MENU

In levels “Medium”, “Hard” and “Extreme” you have to close the V position shortly before landing by moving the left analog stick upwards. To protect your jumper from crashing down you need to press the $\times$ button. The right moment is indicated by the size of the yellow bars.

Tip: Have a look at your jumper's shadow while landing. It is a good indicator for the right point of landing.

Score: After landing you will see your distance as well as the style scores of the five judges. The total score is the sum of the score for distance and the style score. The score for distance results from the distance itself and an individual factor, which depends on the K point of the ski jump. The style score is the sum of the three scores of the judges that are taken into account (the highest and lowest scores are ignored). There are always two jumps which both count for the final score.

SPEED SKATING

In Speed Skating you can race over the ice at speeds of over 50 kilometres per hour, over distances of 500 or 1,500 metres – a challenge that demands great technical skill and athletic prowess.

Controls

Start: Start the race by pressing the

$\times$ button and initiate the ‘Ready-Steady-Go’ countdown.

Run-Up: After the starting signal press the $\times$ and the $\bigcirc$ button alternately as fast as possible to charge your start speed. You are allowed one false start. After the second false start you are disqualified.

Race: After the starting phase you will need to find the right rhythm. Pressing the $\times$ and the $\bigcirc$ button in the right rhythm determines the pace. On the straights the rhythm is slower than in the curves where you need to take faster and smaller steps.

Curves: In levels “Medium”, “Hard” and “Extreme” you need to use the left analog stick to steer the skater while moving to avoid drifting too far out of the curve.

CROSS-COUNTRY SKIING

Cross-Country Skiing is the classic endurance discipline.

Controls

Start: Start the race with the  button. After countdown from 3 to 1 and the starting signal press the  button to start as fast as possible. The closer you are to the right starting point the more powerful your start will be. This will be indicated by the display “Great” / “Perfect”.

Race: Increase your speed by pressing the  button. Use the left analog stick to move to the right or to the left. The left bar indicates the Power you are using. As long as it is white you will race using a normal amount of effort. If it becomes red you are reaching your Power limit and will start using up your Stamina. If a green point appears above the bar you can sprint. To do this, keep pressed the  button. The more Power you use the faster you can race, but the faster your Stamina is used up too. If you are going downhill you can crouch by pressing the  button to save power.

BOBSLEIGH

Four Men, Two Women

In this winter sport discipline a fast start is crucial. After the start you have to steer the bob through the bends, keeping as close to the ideal line as possible and have to avoid touching the boards at a speed of more than 100 kilometres per hour. You can choose if you wish to start in a four-seater or a two-seater bob.

MAIN MENU

Controls

Start: Start the race with the $\times$ button.
Pushing: Press the $\times$ button every time the gleaming dot is at the top and at the bottom of the display.
Steering: Steer your bob down the run with the left analog stick and try to avoid touching the boards. You will lose valuable seconds every time your bob touches the

boards. The blue dashed line indicates the ideal line. Go into the bends pressing the $\square$ button or the $\bigcirc$ button to increase the steering effect. During the race, a display indicates your performance on the bends as compared to the ideal line.

The diagram to the left of the screen displays your actual position on the track. The blue and red points indicate the intensity of your contact with the boards. A blue point means that you slightly touched the boards and slowed down a little. A red point indicates a serious collision with the boards and a significant reduction in speed.

LUGE

Just as in Bobsleigh, a powerful start is crucial in Luge. You steer the sled by shifting your weight and by using thigh pressure.

Controls

Start/Run-Up: For a powerful start, press the $\times$ button when the Energy Bar is at the top.

Steering: Steer your sled down the

run with the left analog stick. The ideal line is once again indicated by a blue dashed line. During the race, a display indicates your performance in the curves as compared to the ideal line.

The diagram to the left of the screen displays your actual position on the track. The blue and red points indicate the intensity of your contact with the boards.

A blue point means that you slightly touched the boards and slowed down a little. A red point indicates a serious collision with the boards and a significant reduction in speed.

SKELETON

Skeleton uses the same track as bobsleigh. The start is the same as in bobsleigh competitions. After the run-in of about 40 metres, the athlete takes his prone position on the sled, facing forward. Maximum speeds of 130kmh are reached. There are two runs, the times are added together to make a total time.

Controls

Start: Start the race with the $\times$ button.

Pushing: Press the $\times$ button every time the gleaming dot is at the top and at the bottom of the display.

Steering: Steer your skeleton down the run with the left analog stick and try to avoid touching the boards. You will lose valuable seconds every time your bob touches the boards. The blue dashed line indicates the ideal line. During the race, a display indicates your performance on the bends as compared to the ideal line.

The diagram to the left of the screen displays your actual position on the track. The blue and red points indicate the intensity of your contact with the boards. A blue point means that you slightly touched the boards and slowed down a little. A red point indicates a serious collision with the boards and a significant reduction in speed.

FIGURE SKATING

Figure skating is a sport in which the skaters perform elaborate spins, jumps and other moves. The Figure Skating event is held at night in the ice rink.

MAIN MENU

Controls

Start: Press the $\times$ button to start.
Free Skate: Symbols of Buttons appear to the beat of the music. Once a symbol is within the circle at the bottom, press the displayed Button quickly. Only accurate timing will lead to high scores. Inaccurate timing can lead to a fall.

CURLING

In Curling you can choose between three modes: Game, Tournament, and Simulation. The teams take it in turn to throw a stone. Try to place your stones as close to the middle as you can, try to remove your opponents' stones from the circles, and to protect your stones against theirs. In level "Easy" there are 4 throws per round, in levels "Medium" and "Hard" there are 8 throws.

Game

If you choose the "Game" Mode you play against a computer generated opponent. The closer you place your stone to the inner circle, the more points you will get. The team with the most stones close to the middle wins the game.

Tournament

In "Tournament" Mode you play directly against one or several of your friends instead of an AI opponent in "Game" Mode. You can take part in a "Tournament" with up to four players. They will all play against each other. There are two rounds in this mode.

Simulation

In "Simulation" Mode you take it in turn to throw a stone. A draw decides over the starting team. There are ten rounds in this mode. The number of stones that are closer to the middle than the closest stone of the opponents makes the number of points you win. The team that has won a round has to start the next one. The team with the most points after 10 rounds wins the game.

Controls

Aiming/Throwing: With the big marker arrow you can determine the direction in which you want to throw your stone using the left analog stick. To take a swing keep pressed the $\times$ button until the white Power Display in the arrow has reached a certain position. This position corresponds to the position marked on the playing surface. If you release the button the stone is thrown.

Curl: If you want to give the stone a spin move the left analog stick into the appropriate direction while gathering power. The longer you keep the stick in this direction the stronger the spin will be.

Sweeping: When the stone is on the track you can sweep the surface with the $\times$ button to increase its speed. Keep in mind that this influences the effect of the spin.

Fast Forward: Press the $\circ$ button or the up directional button after throwing the stone to fast-forward.

RECORDS

The Records Menu displays the records for each event and each competition.

OPTIONS

LOAD GAME

In this menu item you can load a saved score at any time. Make sure that the MEMORY CARD (8MB) (for PlayStation®2) is in MEMORY CARD slot 1.

MAIN MENU

SAVE GAME

In this menu item you can save your actual score at any time. Make sure that the MEMORY CARD (8MB) (for PlayStation®2) is in MEMORY CARD slot 1.

GAME OPTIONS

Arrows above the Gates: Switch on or off the marker arrows above the gates (in Alpine Skiing).

Ghost: Switch the Ghost Function on or off. The “Ghost” driver races down the track with the best time you have achieved on this track as yet. The Ghost Function allows you to improve your time, track accuracy, and timing. So this mode is an additional challenge for you.

Show Key Assignment: You can choose whether or not to display the control support for the analog controller (DUALSHOCK®2) during the competition.

Ceremonies: You can choose whether or not you wish to see the presentation ceremony at the end of each discipline.

Vibration: Switch the vibration function of the analog controller (DUALSHOCK®2) on or off.

Language: Select your language for the texts in game and menu, as well as for the commentators.

SOUND

You can adjust the volume for the commentators, sound effects, and music in the game and in the menu.

Software - Terms of use

Please read the following terms of use carefully. Your use of the software is subject to the terms of use.

Authorized use

The original software and the original documentation of the enclosed CD-ROM is owned by RTL Games GmbH and is protected by copyrights, trademarks, and other intellectual property rights. Purchase of the original software permits the use of the original software in only one compatible computer for private and non-commercial use only. Additionally, the terms of use are in accordance with intellectual property rights and copyright law.

Unlawful or prohibited use

Any other use of the original software and/or the original documentation, in particular the unauthorized rental, public exhibitions or other forms of presentation (e.g. in schools and/or universities), the duplication, multiple installations, transmission and any other process, that allows the general public access to the original software or parts thereof (especially via the internet or other online systems) is strictly prohibited, unless previous written documentation from RTL Games GmbH has been granted.

Except as expressly authorized by RTL Games GmbH you are also not permitted to grant a license for the original software to a third party or allow access to the software in a form not explicitly approved by RTL Games GmbH. Changing the original software and/or original documentation, modifying (particularly evasion of copy protection systems), adapting or sharing, which includes translating and/or altering the original software for the further use in parts is also strictly prohibited. The terms of copyright law are also applicable here. Decompiling the original software is explicitly prohibited. Every form of damage, alteration or duplication of the name of the original software or parts thereof is prohibited. Violators will be prosecuted.

CONSPIRACY ENTERTAINMENT 90-DAY WARRANTY

CONSPIRACY ENTERTAINMENT warrants to the original purchaser only that the disc provided with this manual and the software program coded on it will perform in accordance with the descriptions in this manual when used with the specific equipment for a period of 90 days from the date of purchase. If the program is found defective within 90 days of the purchase it will be replaced. Simply return the disc to CONSPIRACY ENTERTAINMENT or an authorized retailer along with the dated proof of purchase. Replacement of the disc, free of charge to the original purchaser (except for the cost of replacing the disc) is the full extent of our liability.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES WHETHER ORAL OR WRITTEN EXPRESSED OR IMPLIED. ALL IMPLIED WARRANTIES INCLUDING THOSE OF MERCHANT ABILITY AND FITNESS FOR A PARTICULAR PURPOSE IF APPLICABLE ARE LIMITED IN DURATION TO 90 DAYS FROM THE DATE OF ORIGINAL PURCHASE OF THIS PRODUCT.

CONSPIRACY ENTERTAINMENT shall not be liable for incidental and or consequential damages for the breach of any express or implied warranty including damages for personal injury even if CONSPIRACY ENTERTAINMENT has been advised of the possibility of such damages. Some states do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts so the above limitations or exclusions may not apply to you.

This warranty shall not be applicable to the extent that any provision of this warranty is prohibited by any federal state or municipal law, which cannot be preempted. This warranty gives you specific legal rights and you may also have rights, which vary from state to state.

Please contact us before returning any defective materials.
