The X-Men™ Legends Saga Continues

In a legendary battle for the streets of New York, Professor Charles Xavier and his X-Men restore stability to the world by defeating Magneto™ and his army of Sentinel Robots. Following this magnificent achievement, Xavier and the X-Men return to the X-Mansion to recharge. With Magneto out of the picture, the X-Men finally have a chance to relax.

However, Xavier's mind is still unsettled. During a routine exercise with Cerebro, Professor X detects some strange activity in a remote area of Egypt. Unfortunately, Xavier is unable to investigate this disturbance further because of an obligation to speak at an International Convention for Mutant Awareness. Instead, he assembles a team of X-Men to investigate.

While Cyclops leads a group of X-Men through oppressive heat waves and vicious sandstorms in the Egyptian deserts, a message comes in from Beast. "Return to the X-Mansion at once! Xavier and Polaris have vanished!"

In the time it takes the X-Jet to fly across the Atlantic Ocean, the story hits the international news headlines. Reports from all over the globe inform the masses about this series of unprecedented events. First, a merciless raid at the International Conference for Mutant Awareness, and second, a monumental battle in the skies of the Southern Hemisphere above the Dead Zone. As the story unfolds, most of the details are unclear, but one fact is clear in all the reports, that Professor Xavier and Polaris have been abducted.

X-Men Legends II: Rise of Apocalypse

The X-Men universe is brought to life in a high-action role-playing game that takes you, your favorite heroes and their traditional enemies through an unprecedented adventure. Get ready to take control of a team of X-Men and Brotherhood, travel to exotic locations and embark on daring missions in a quest to save the world from a new face of evil.

***"It seems we both have a
grievance with Apocalypse."
—Magneto***

X-Men Legends II: Rise of Apocalypse allows you to live the adventure while assembling your favorite team, customizing your heroes' character development and launching them into a story of epic scope. It's up to you to decide the fate of the world!

Teaming Up

X-Men Legends II: Rise of Apocalypse is all about customizing your personal team of super heroes. As you progress through the game, you can pick unique teams for every environment, or if you choose, use one team of all-stars from start to finish. The choice is yours. You can also change your team composition at Xtraction Points. These blue X icons don't appear around every corner, so pick your team wisely.

Once in the game, your allies will follow you, use their powers and attack your enemies. Whenever you want your friends at your side, simply press the Call Allies button. During combat, press the Call Allies button to instruct your allies to attack your nearest target with their selected power.

***"Juggernaut, Bishop, take the right side.
Toad and I will take the left."
—Cyclops***

Unique Power Combos

There are many unique power combinations that inflict extra damage and earn bonus experience. Practice various combinations using the Call Allies button to call for specific ally attacks. For example:

Slow Control = Telekenesis + Slow Beam

Fiery Slash = Feral Slash + Ignite

Heads-Up Display (HUD)

The HUD is optimized to allow control over your entire party. The faces that appear in the HUD are configured in four positions, each represented by a direction on the directional buttons. Press in any direction on the directional buttons to get instant control of the corresponding X-Men character.

Health Meter—The current health of the selected *X-Men* character.

Energy Meter—The current energy of the selected *X-Men* character.

Experience Meter—The level of experience approaching the next level.

Xtreme Meter—Fill up the four segments of the Xtreme Meter to light up and enable Xtreme powers.

Saving the Game & Xtraction Points

You are able to traverse missions and acts, as well as save your progress, revive fallen team members and access your team roster, using Xtraction Points. In fact, doing so is very valuable to complete every objective and locate every hidden item. Select **Xtract** to view the world map and travel instantly to any other active Xtraction point in the game.

In-Game Power Switching

All the characters in *X-Men Legends II: Rise of Apocalypse* have more than four powers, but there are only four face buttons on your controller. To access *X-Men* character powers, you need to master in-game power switching. In-game power switching lets you access all unlocked hero powers instantaneously!

To activate in-game power switching, press and hold the **Superpower Selector** button. While holding down this button, press the different directions on the directional buttons to toggle through your list of hero powers and assign them to the respective buttons.

Automatic Leveling Up

The all new in-game intelligence system allows you to manage and fully customize your team's leveling up and skill development. This system is fully customizable for every character, so you can have totally customized settings for all 16 characters. When your characters gain sufficient experience to level up for the first time, you'll be prompted with the selection menu. From this menu, you can customize how the game allocates skill points, stat points and gear. You can also do this at any time from the team management menu.

Stats & Skills

Leveling up is part of any RPG experience. When a character has accrued enough experience, he or she will gain a new level. You'll know a character has leveled up when you see a double-helix gene around the selection icon at the character's feet. Don't hesitate to enter the menu and level up so you can add points to your character's **stats** and **skills**.

Stats

Stats are basic traits shared by all Mutants: body, focus, strike and speed.

Body—Increases your health points (HP) and chance for double health from potions.

Focus—Increases your energy points (EP), energy regeneration, melee mental damage and chance for double energy from potions.

Strike—Increases the damage (DMG) you do with melee attacks.

Speed—Increases your Attack Rating (ATK) and Defense Rating (DEF).

AI

AI Heal (when full)—Indicates if potions will be used when you run over them without having full health. Helps keep you from leaving health behind.

AI Heal (4 types)—Allows AI to automatically heal teammates using remaining health packs when their health is below a certain level (as long as there are more than two packs remaining).

Note: This setting affects all AI-controlled X-Men.

Never—AI will not use any health packs no matter how much health is remaining.

Less than 20%—AI will use a health pack when a teammate is below 20% of maximum health.

Less than 40%—AI will use a health pack when a teammate is below 40% of maximum health.

Less than 80%—AI will use a health pack when a teammate is below 80% of maximum health.

AI Mode (3 types)—Determines actions of teammates who are not controlled by a human player.

Aggressive—Always attacks your target immediately.

Normal—Attacks when the opportunity arises.

Defensive—Stays away from enemies, attacking only when attacked.

"Hey bub, I'm going to bust you up. Arrrgh!"
—**Wolverine**

AI Skill—Determines the Mutant power used by teammates on a targeted enemy when the Call Allies button is pressed (Xtreme Power not selectable).

AI Auto-Trait—Allows the AI to allocate stat points automatically when you level up.

AI Auto-Skills—Allows the AI to allocate skill points automatically when you level up.

AI Auto-Equip—Allows the AI to distribute and don equipment automatically when you level up.

Skills

Skills are unique to your character, and measure your ability to use your Mutant craft in various ways. Some of your skills are active, which means you must perform a special action to use your power. Other skills are passive, meaning your powers go into effect automatically.

Every character has multiple tiered powers, which become more powerful as you assign points to them. To see what powers you need to unlock, view the skill list in the Skills menu. Grayed-out powers have a prerequisite, which means you must fill a certain number of skill slots in the base power or achieve a certain level to upgrade to the next tier.

Upgrading Mutant powers—Assigning points to an existing skill increases the potency of that skill.

Acquiring new Mutant powers—Assigning points in a new power or unlocking the next tier of a power unlocks that power at the base level of ability.

Boosts, or skills that bolster your attributes either offensively or defensively, appear on the affected character in the game.

Passive skills, such as Mutant Mastery, are always in effect, regardless of whether the character is selected.

Xtreme Powers

Every hero has the potential to unlock ultimate versions of his or her other basic powers. These powers don't use Mutant energy, but instead use Xtreme tokens. Once you've unlocked skills and collected four tokens, your Xtreme powers will be enabled.

Xtreme powers are always activated by holding the **Superpower Selector** button then pressing the **△** button.

Items & Equipment

Equipment is worn by each *X-Men* character to enhance his or her abilities and is always in effect as long as it's equipped.

"Do you think Sunfire will let me borrow his mask? It was really useful against the Sentinels on Asteroid M."

—Iceman

There are three types of equipment you can use.

Belts—Add to defense rating

Armor—Adds to defense rating

Gloves—Add to attack rating

Enhanced Equipment—Occasionally you'll find equipment that's been enhanced through technology or Mutant powers.

Rare Equipment—Rare equipment has a much smaller chance of appearing in the world, but adds significant stat boosts to a character when equipped.

Unique Equipment—The most powerful and uncommon equipment in the game is unique equipment. These enhanced items have unique names and special attributes that never change.

Health Packs—These replenish the health of your currently selected hero. The maximum number of health packs you can carry at level 1 is 10.

Energy Packs—These replenish the energy of your currently selected hero. The maximum number of energy packs you can carry at level 1 is 10.

Purchasing Items

You can purchase items from both Beast and Forge. When there's a piece of equipment you need, Forge and Beast can easily get the job done. All they need in return are mechanical parts, known as "tech bits," which are used to make the items. Forge and Beast can provide unique or rare items as well as more mundane armor and enhancers. The more valuable the item, the more it'll cost you.

"Hey Forge, I need something to keep Magneto from ripping my Adamantium skeleton out again."
—Wolverine

Town Centers

The clash with Apocalypse keeps the X-Men constantly on the run as they battle around the globe. To manage their travels easier, Xavier has established five unique bases for operations. In these headquarters, you can load missions, get objectives, talk to non-playable characters, visit the Danger Room and customize your team members for various missions.

Danger Room

The Danger Room will unlock in the Main Menu after a hero has leveled up to level 6.

Training—Complete a number of pre-set challenges for an experience reward.

Sparring—Compete against the CPU in a race against the clock. Unlocks when you reach level 6 in Story mode.

Records—View your high scores and character rankings for sparring challenges.

Skirmish—Compete against other players in various combat games. Unlocks when you reach level 16 in Story mode.

- **Brawl**—Engage in combat with other players for a predetermined amount of time.
Lives: unlimited.
- **King of the Hill**—Compete with other players to remain king for a predetermined amount of time.
Lives: unlimited.
- **Last Man Standing**—Engage in combat with other players until all but one is defeated.
Lives: 4.
- **Last Man Ladder**—Engage in combat with other players until all but one is defeated. With each progressive knockout, your power level increases.
Lives: 4.

Multiplayer

So you want to play with a friend? At any time during your single-player adventure, plug in an extra game controller and posse up! Up to four players can join in on the action at once.* But be careful—the enemies will be tougher!

**3–4 Players requires a Multitap (for PlayStation®2). Multitap (for PlayStation®2) supported in controller port 1.*

Co-op Mode

When the START button is pressed on the second controller, the HUD divides into four parts, one for each *X-Men* character available on the team. You're still able to switch to a free *X-Men* character on your team at any time by pressing the correct direction on the control pad. When playing with three other players, you are unable to swap characters.

Online Play

To play *X-Men Legends II* online, you need a dedicated broadband connection to the Internet with at least 128kbps upload bandwidth and 128kbps download bandwidth. Sharing your network connection among multiple computers or game consoles may reduce your bandwidth and cause instability when playing online. If you're unsure about the bandwidth of your broadband connection, please check with your service provider. For the best experience, plug your Internet connection from your broadband (DSL or cable) modem directly into your game system. Because of huge variations in routers, not all routers are supported by this product.

Firewall

In order to join or host an *X-Men Legends II: Rise of Apocalypse* game from behind a router with NAT (Network Address Translation), or firewall, you may need to enable PORT FORWARDING. You will need to route, or forward, all data on port UDP Port 5165 to the IP address assigned to your PlayStation®2 console. (Note: Users using DHCP must ensure that their PlayStation®2 console is always assigned the IP address specified in the PORT FORWARDING setup; under these circumstances you may need to change your PlayStation®2 from "Auto Detect (DHCP)" to a "Static IP" address using the Network Configuration GUI or Network Adaptor Start-Up Disc to ensure that forwarded data always gets to your PlayStation®2 console.)

If you are still having trouble connecting to other players, try bypassing the router or firewall by connecting your PlayStation®2 console directly to you DSL modem, cable modem or other broadband device.

For further questions, please contact Activision's Customer Service support department: (310)255-2050 or www.activision.com/support.
